Publication of Key to this book is strictly prohibited.

Every effort has been made to avoid errors of omission in this Publications. In spite of this, some errors might have crept in. Any mistake, error or discrepancy noted may be brought to our notice which shall be taken care of in the next edition. It is notified that neither the Publishers nor the authors, seller will be responsible for any damage or loss of action to nay once, of any kind in any manner, therefrom.

For binding mistakes, misprints or for missing pages, etc., the publishers' liability is limited to replacement within one month of the purchase by a similar edition. All expenses in this connection are to be borne by the purchaser.

PREFACE

The series '**Science Fiction**' of books for classes from 1 to 8. These books reflect the **National Education Policy 2020** prescribed by the government. The content of these books is up to the mark and concept of chapters is easy and interactive. It will help the students to grasp the thought and motion to understand.

The beginning of the chapter have a heading named **Learning Outcomes**. This gives the idea of the content of the chapter.

At the end or completion of the text of the chapter, key words are given which explains some other words of the chapter. **Facts** offers different types of unknown facts. **Backpedal** gives an overall summary of the chapter. It explains the chapter in a nutshell. Then comes the **Testing Time**. It includes the exercises based on the text studied and discussed.

Here starts the exercises based on the NEP. They are: **Think and Respond, Life Skills and Values**, Art Integration (Activity), Understanding Skills, **Funny Projects**.

Wherever possible, the books of the series instill into the children '**Values**' such as the importance of conversing nature.

While designing this series, efforts have been put forth to make it error-free, up to the mark and to the point, still suggestion are welcomed to make it more interesting for the students.

—Author and Publisher

Incorporates NEP 2020

Created with new dimension of joyful learning along with completely mapped parameters of National Education Policy, 2020

Critical Thinking

Strengthening decision making and innovation

Art Integration

Promoting art based learning

Computational Thinking

Enables to help solve problems and make thinking more engaging.

Inter Disciplinary

Connects knowledge across the curriculum for holistic development

Subject Enrichment

Aimed at understanding and skill developing in specific subject

Communication

Emphasis on soft skills and power of language

Experimental Learning

Encourages learning by doing through hands-on activities.

Life Skills and Values

Inclined towards empowering moral values in learner

Creative Learning

Thinking out of the box.

INSIDE

Learning Outcomes includes the topics to be learnt in the chapter.

LEARNING OUTCOMES

- ▶ Kinds of Plants ▶ Parts of a Plant ▶ The Roots ▶ The Stem
- ▶ The Leaf ▶ The Flowers ▶ Fruits and Seeds

Facts includes some facts related to chapter to enhance the knowledge of the students.

There are some organisms which decomposes the dead bodies of animals and plants left by scavengers. They are called decomposers.

Click Your Brain provides a short exercise for having good command on the topic.

Click Your Brain

Name the organs involved in the given organ system.

1. Skeletal system _____
2. Digestive system _____
3. Muscular system _____
4. Respiratory system _____

Keys provides the extended meaning of some important words from the chapter to understand the topic.

KEY WORDS

- | | | |
|--------|---|------------------------------|
| Decay | — | to rot away |
| Gravel | — | mixture of rocks and pebbles |

Backpedal contains something important to remind the chapter at a glance for doing exercises.

Backpedal

- ▶ We have external and internal organs.
- ▶ We have five sense organs — eyes, ears, nose, tongue and skin.
- ▶ Organs come together to make up an organ system.
- ▶ We have the following organ systems:
 - (i) The skeletal system (ii) The muscular system (iii) The digestive system
 - (iv) The respiratory system (v) The nervous system (vi) The circulatory system
 - (vii) The excretory system (viii) The reproductive system

Testing Time contains some exercises to test the knowledge about the chapter.

TESTING TIME

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. Matter _____
 - (i) has mass (ii) occupies space (iii) Both of these
2. Matter has _____ states.
 - (i) one (ii) two (iii) three
3. Solids have definite/ fixed _____.
 - (i) shape (ii) volume (iii) Both of these
4. Gases can _____.
 - (i) flow (ii) fly (iii) None of these

Think and Respond for making answers for some hard and practical questions.

Think and Respond

- An elephant has long teeth outside its mouth? How elephants eat their food?

Critical Thinking

Life Skills and Values includes the life skills and values questions.

Life skills and Values

Environmental Literacy

- We are cutting trees in large numbers. It is causing deforestation. What can you do to check it?

Funny Projects provides some interesting experiments based on chapter contents.

FUNNY PROJECTS

- Explain the uses of water through a flowchart.
- Draw the picture showing the water cycle in your notebook.

Problem Solving

Art Integration

1

LIVING AND NON-LIVING THINGS

LEARNING OUTCOMES

- ▶ Living Things
- ▶ Characteristics of Living Things
- ▶ Characteristics of Non-Living Things
- ▶ Non-Living Things
- ▶ Kinds of Non-Living Things

Look around yourself. You shall see television, mobile phone, sofa, table, fan, vehicles, water, clothes, plants, animals, human beings, birds, etc. All of these are named as **things**. So, we can say that everything around us is known as a **thing**.

Some things have life and some do not. Thus, we can divide the things into two types — living things and non-living things.

LIVING THINGS

Plants

Cow

Human

Things that have life are called **living things**.

NON-LIVING THINGS

Table and Chair

Machines

Water

Things that have no life are called **non-living things**.

CHARACTERISTICS OF LIVING THINGS

Living Things Breathe

All living things breathe. Animals and human beings breathe in oxygen through their noses. Plants breathe in carbon dioxide through tiny holes present on their leaves.

Animals and Humans breathe in O_2

Living Things Feel

All living things feel their surroundings. They feel and sense hot, cold, rough or smooth.

A sunflower always faces the Sun.

Living Things Move

Living things can move on their own. Animals and humans move from one place to another with their legs. Birds fly from one place to another.

Stems of plants move towards light and roots move towards water. Plants cannot move forward or backward.

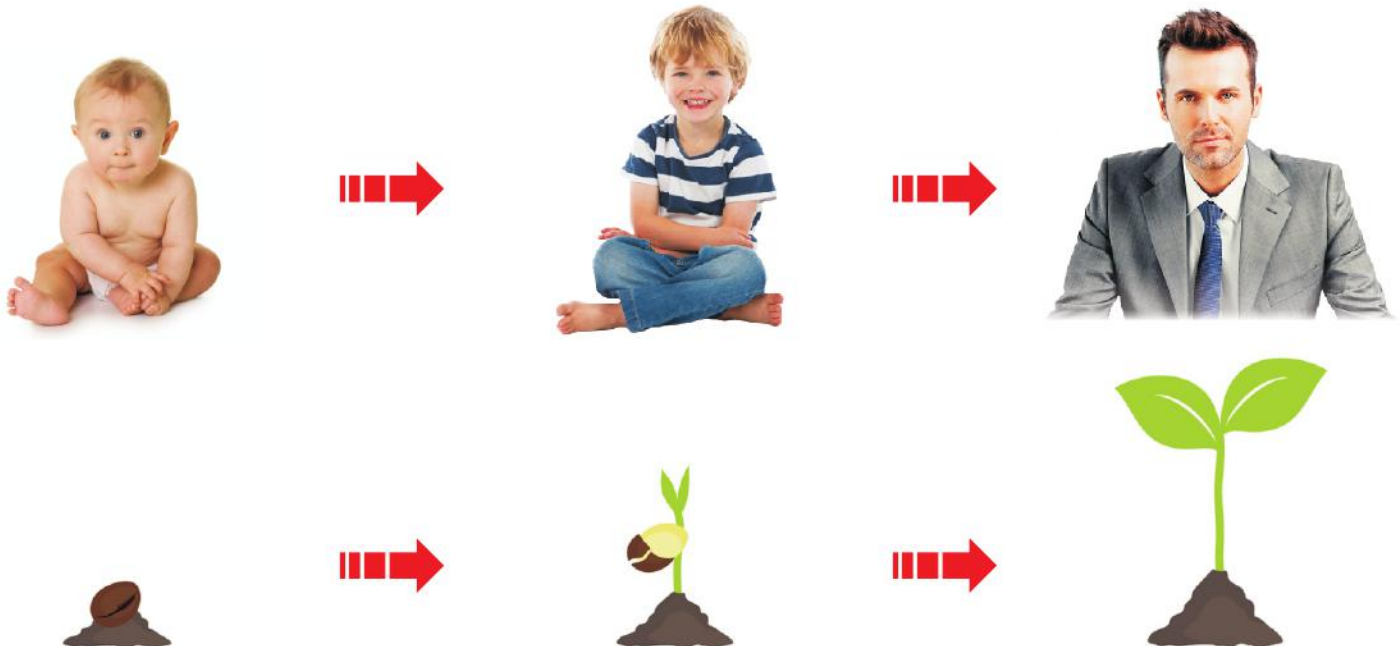

Living Things Need Food

Living things need food and water. They need it to grow well and to be healthy. Food is necessary for living things to live.

Living Things Grow

Living things grow. A kid or a child becomes an adult. A kitten becomes a cat. A seed becomes a plant. Some plants become trees. When living things grow, their sizes become bigger or larger.

Living Things Reproduce

Living things give birth to their young ones. Some living things lay eggs in place of giving birth to their young ones.

Human with a baby

Dog with a pup

Seed growing into a plant

Living Things Die

Living things are born, grow and live. They become old and die. When living things die, they do not need food, do not breathe, do not move, do not feel and do not reproduce.

Click Your Brain

Complete the following.

1. Things that have life are called _____.
2. Living things can _____.
3. Living things need food and _____.
4. Living things give _____.
5. A kid or a child _____.
6. Living things become old _____.

CHARACTERISTICS OF NON-LIVING THINGS

1. Non-living things do not breathe and feel.
2. Non-living things do not move on their own. They move only when we move them.
3. Non-living things do not need food and water.
4. Non-living things do not grow.
5. Non-living things do not reproduce.
6. Non-living things do not become old.
7. Non-living things do not die; they only rot out or get destroyed.

KINDS OF NON-LIVING THINGS

Non-living things can be divided as natural non-living things and man-made non-living things.

Natural Non-Living Things

Natural non-living things are present naturally. They are not made by human. They are — mountain, rocks, wood, water, etc.

Mountain

Water

Rocks

Wood

Man-Made Non-Living Things

Man-made non-living things are made by human from natural things. They are — car, boat, clothes, house, fan, machines, etc.

Car

Boat

Fan

Washing Machine

KEY WORDS

Things	— everything all around us
Living things	— things that have life in them
Non-living things	— things that are lifeless
Reproduce	— to give birth to young ones or to lay eggs

Backpedal

- ▶ Everything that is around us is a thing.
- ▶ Things can be living or non-living.
- ▶ Living things breathe, feel, move, need food, grow, reproduce and die.

- ▶ Non-living things do not breathe, do not feel, do not move, do not need food, do not grow, do not reproduce and do not die.
- ▶ Non-living things can be natural or man-made.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

- Things are of _____ kinds.
 (i) one ☐ (ii) two ☐ (iii) three ☐
- Things that have life are:
 (i) living ☐ (ii) non-living ☐ (iii) natural ☐
- Non-living things grow.
 (i) Yes ☐ (ii) No ☐ (iii) Can't say ☐

B. Fill in the blanks with correct words:

- We see so many _____ around us.
- Living things _____.
- A seed grows into a _____.
- _____ is a natural non-living thing.

plant
Water
breathe
things

C. Write True or False:

- Only plants, animals and humans have life in them.
- Living things cannot feel and sense.
- Non-living things can be natural or man-made.
- A tree is a man-made non-living thing.

Subjective Type Questions

A. Answer in one word:

- These things have life.

2. These things do not have life.
3. These things are made by man.
4. A chair is this type of thing.

B. Answer the following questions:

1. What is a thing?

2. Define living and non-living things.

3. Compare living and non-living things.

4. What are the kinds of non-living things? Name them.

Think and Respond

- Why does a fish die without water however they it also breathes in oxygen and there is oxygen in the air too?

Critical Thinking

Life skills and Values

Social Literacy

- Observe your surroundings and make a report on the behaviour aspects of street dogs.

FUNNY PROJECTS

- Collect the pictures of things around you and paste them in your scrapbook and tell their kinds too.
- Draw a picture displaying the growth of a seed in your notebook.

Experiential Learning

Art Integration

2

PLANT KINGDOM

LEARNING OUTCOMES

- ▶ Plants
- ▶ Parts of a Plant
- ▶ Types of Plants
- ▶ Care of Plants
- ▶ Importance of Plants

PLANTS

You see greenery in the fields, hills and parks. It is due to the plants. Plants are big or small. They are living things. They make their food on their own. They give us flowers, fruits and vegetables, etc. Plants have different parts. Let's learn about them.

There are some plants that are not green.

PARTS OF A PLANT

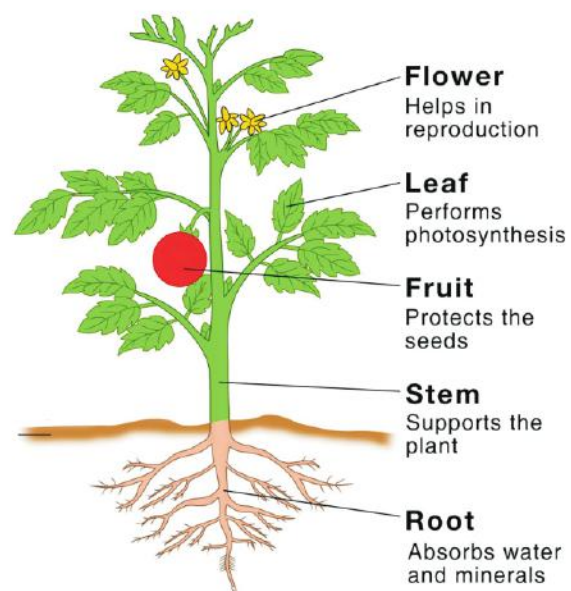

Roots : **Roots** grow under the soil. They keep the plant firm and fixed above the ground. They collect water and minerals from the soil.

Stem : **Stem** bears branches, leaves, flowers and fruits. It carries water and minerals to all parts of the plant. It is the hardest part of the plant.

Branches : **Branches** grow on the stem in all directions. They bear leaves, flowers and fruits.

Leaves : **Leaves** are the green part of a plant. They make food for the plant. They are called **the kitchen of the plant**. Some plants have big leaves and some have small leaves.

Flowers : **Flowers** are the bright and colourful part of a plant. They make fruits and seeds.

Parts of a Plant

Rafflesia Arnoldii is the world's largest flower.

Fruits : **Fruits** are the edible parts of the plant. But all the fruits are not edible. They have seeds in them. Some fruits have one seed like mango and some have many seeds like apple.

TYPES OF PLANTS

Plants are categorised on the basis of their sizes and shapes. They are trees, shrubs, herbs, climbers and creepers.

Trees : Trees are tall, big and strong plants. They have thick and strong stem. Neem, peepal, mango, banyan, coconut are trees.

Mango

Peepal

Neem

Banyan

Coconut

Shrubs : Shrubs are small plants. They are not as strong as trees. Their stems are hard and woody. Rose, cotton, lemon, tulsi, henna, etc. are shrubs.

Rose

Cotton

Lemon

Tulsi

Henna

Herbs : Herbs are smaller than shrubs. They have weak and soft stems. They grow just above the ground. Coriander, wheat, tomato, mustard and mint are herbs.

Coriander

Tomato

Mint

Mustard

Wheat

Climbers : Climbers are weak plants. They have green and tender stems. They need support to stand straight or climb. Peas, grapevine, money plant, cucumber, gourd, etc. are **climbers**.

Peas

Grapevine

Money plant

Cucumber

Gourd

Creepers : Creepers are very weak plants. They grow along the ground. Watermelon, pumpkin, muskmelon, caltrop, etc. are **creepers**.

Pumpkin

Muskmelon

Watermelon

Caltrop

Other Plants : There are some other plants also. They grow in water. They are called **water** or aquatic plants. They are lotus, water lily, water hyacinth, hydrilla, pistia, etc. Some plants like cactus grow in sand, on rocks and in hot places with little water. Tulip and fir trees grow in cold places and on the mountains.

Lotus

Water Lily

Water Hyacinth

Hydrilla

Pistia

Thorns : There are some thorny plants. They are rose, lemon and bush. Thorns protect the plants from animals.

CARE OF PLANTS

We should take care of plants. We should not damage the branches of plants. We should not pluck the flowers and leaves. We should avoid walking on the grass when we visit the parks.

Click Your Brain

Name these.

- | | | | |
|-----------------|-------|-------|-------|
| 1. Trees | _____ | _____ | _____ |
| 2. Shrubs | _____ | _____ | _____ |
| 3. Herbs | _____ | _____ | _____ |
| 4. Climbers | _____ | _____ | _____ |
| 5. Creepers | _____ | _____ | _____ |
| 6. Water Plants | _____ | _____ | _____ |

IMPORTANCE OF PLANTS

1. Plants make the environment green and clean.
2. They give us fruits and vegetables.

3. They give us oxygen to breathe.
4. They give us wood for different purposes.

KEY WORDS

Roots	—	part of a plant that grows under the soil
Trees	—	tall, big and strong plants
Shrubs	—	small plants with hard, woody stem
Herbs	—	smaller plants than shrubs
Creepers	—	plants that grow along the ground
Climbers	—	plants that need support to stand straight

Backpedal

- ▶ Plants are green living things.
- ▶ Plants are of different kinds, like trees, shrubs, herbs, climbers and creepers.
- ▶ There are some plants which grow in water.
- ▶ Plants like cactus grow in sandy and hot places.
- ▶ Thorns protect the plants from animals.
- ▶ Leaves are called the kitchen of the plant.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. Plants are _____.

(i) green

(ii) yellow

(iii) grapevine

2. This grows under the soil.

(i) Stem

(ii) Flower

(iii) Root

3. This is a climber.

(i) Neem

(ii) Rose

(iii) Pumpkin

B. Fill in the blanks with correct words:

1. Plants make their _____ on their own.

2. Roots keep the plant _____ and fixed.

3. Leaves are the _____ of a plant.

4. Plants are very _____ for us.

kitchen
important
firm
food

C. Write True or False:

1. Roots collect water and minerals from the soil.

2. Branches bear leaves, flowers and fruits.

3. Stem is the weak part of a plant.

4. Plants are not important for us.

Subjective Type Questions

A. Answer in one word:

1. What grows under the soil?

2. Where do fruits and flowers grow?

3. What is called the kitchen of a plant?

4. What does a plant give us?

B. Answer the following questions:

1. What are plants?

2. Define root and stem.

3. What are the parts of a plant?

4. How many types of plants are there?

5. What are water plants?

6. How are plants important for us?

Think and Respond

- You know that plants and trees give us food. If there were no plants, what would we eat?

Critical Thinking

Life skills and Values

Environmental Literacy

- Plants are very important for us. But we are cutting them excessively. How can we protect them?

FUNNY PROJECTS

- Paste the pictures of some climbers in your scrapbook and write their names.
- Name the given trees.

Curiosity

Recognising Skills

- Make a chart of different kinds of plants and hang it in your classroom.

Art Integration

3

HOW PLANTS GROW?

LEARNING OUTCOMES

► Flowers

► Seeds

► Growing of a Seed into a Plant

Plants are very important part of our lives. They give us many things. But how do they grow?

Plants grow from seeds. Seeds are found in fruits.

Not all flowers have nice fragrance.

FLOWERS

Most of the plants bear flowers. Flowers are of different kinds. They are of many colours and shapes. They have sweet smell, so they are used in perfumes, soaps and cosmetics. Some flowers are rose, jasmine, sunflower, tulip, etc. These flowers do not become fruits.

Rose

Jasmine

Tulip

Sunflower

Some flowers become fruits. They are mango, guava, neem, chilly, tomato, etc.

Mango

Guava

Neem

Tomato

When the flower fades away or gets dried, fruit starts growing. It has a seed or many seeds. These seeds grow into new plants.

SEEDS

Almost all the fruits have seeds. Some fruits have one seed only like mango, while some fruits have many seeds like watermelon.

Click Your Brain

Mango has one seed. Name some fruits with one seed.

Watermelon has many seeds. Name some fruits with many seeds.

We do not eat seeds of some fruits. We throw away these seeds. But we eat fruits with their seeds, like guava, kiwi, strawberry, corn, etc.

Guava

Kiwi

Strawberry

Corn

Some seeds we eat as food. They are rice, wheat, maize, pulses, beans, grains, etc.

Rice

Wheat

Gram

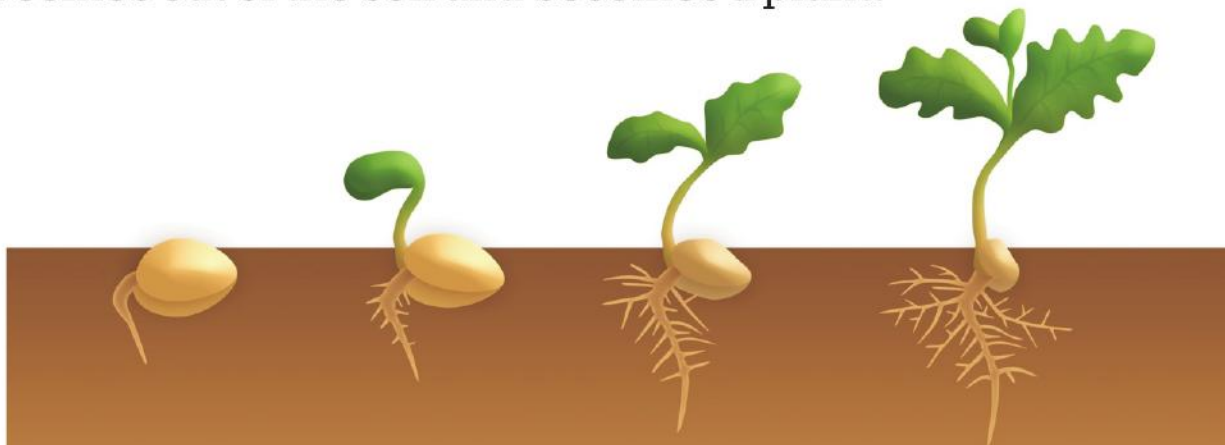

Pulses

GROWING OF A SEED INTO A PLANT

A plant grows from a seed. A seed has a baby plant inside it. To become a plant, a seed needs soil, air, water and sunlight in the right amount.

We sow a seed in the moist soil. The sunlight keeps the seed warm. Air in the soil helps it to breathe. The seed becomes soft and after some days it starts to germinate. The baby plant which resides in the seed comes out of the soil and becomes a plant.

The sunlight gives warmth to the seed. Water provides hydration to the seed and makes it soft. Air helps to breathe and soil provides minerals to the seed. When a seed becomes a plant, its leaves make food for the plant.

Not all plants grow from seeds. Some plants grow from roots, stems and leaves.

KEY WORDS

Seed	—	hard thing inside the fruit
Reside	—	to live
Minerals	—	useful things needed by a plant
Germinate	—	to grow

Backpedal

- ▶ Most of the plants grow from seeds.
- ▶ We do not eat seeds of some plants.
- ▶ Some seeds we eat as food.
- ▶ A seed has a baby plant inside it.
- ▶ A seed needs sunlight (warmth), water, air and soil to become a plant.

TESTING TIME

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. Plants grow from _____.

(i) flowers

(ii) fruits

(iii) seeds

2. Flowers have _____ in them.
 (i) fruits ☐ (ii) seeds ☐ (iii) None of these ☐
3. A seed is sown in the _____.
 (i) sand ☐ (ii) cement ☐ (iii) soil ☐

B. Fill in the blanks with correct words:

1. Most of the flowers bear _____.
2. Not all flowers have _____.
3. Some fruits have only _____ seed.
4. A seed has a _____ inside it.

one
baby plant
fragrance
fruits

C. Write True or False:

1. Flowers are used in perfumes, soaps, etc.
2. All fruits have seeds inside them.
3. There are some seeds that can be eaten.
4. Seeds need soil, warmth, air and water to grow.

Subjective Type Questions

A. Answer in one word:

1. Plants grow from this. _____
2. Fruits have these. _____
3. This fruit has only one seed. _____
4. Warmth, air, water and soil are necessary for this to grow. _____

B. Answer the following questions:

1. How are flowers used?

2. What is needed to grow a plant?

3. What does a seed need to grow?

4. Where does the baby plant reside?

Think and Respond

- Can a plant grow without a seed? How?

Critical Thinking

Life skills and Values

Environmental Literacy

- How can you help a seed to grow?

FUNNY PROJECTS

- Collect some seeds. Put them in a pouch and paste them in your scrapbook. Write their names too.
- Name the given seeds that we eat as food.

Experiential Learning

Recognising Skills

- Draw a seed and a plant in your notebook.

Art Integration

4

FOOD FROM PLANTS

LEARNING OUTCOMES

- ▶ Fruits
- ▶ Vegetables
- ▶ Grains
- ▶ Pulses
- ▶ Spices
- ▶ Nuts
- ▶ Beverages
- ▶ Sugar
- ▶ Oil seeds

We have learnt that a seed grows into a plant. Plants give us fruits, vegetables, grains, pulses, etc. These things make our food. Thus, plants give us food.

FRUITS

We eat fruits. Fruits are juicy and fleshy part of a plant. They can be sweet like mango or sour like lemon. Some fruits are apple, banana, pomegranate, guava, etc.

Apple

Mango

Banana

Guava

Pomegranate

VEGETABLES

We get vegetables from plants. We eat them in the form of root, stem, leaf, flower or fruit. They are also fleshy, but not juicy. Some vegetables are potato, onion, brinjal, cauliflower, lady's finger, etc.

Onion

Potato

Brinjal

Lady's finger

Cauliflower

Cucumber is a fruit not a vegetable.

GRAINS

Cereals are the grains that we eat. We get cereals from plants. They are rice, wheat, corn, barley, etc.

Rice

Wheat

Corn

Barley

Pulses

PULSES

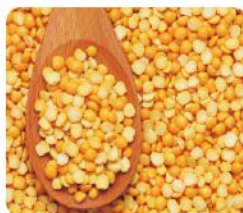

Pulses are also seeds. They are an important part of our food. They are arhar, moong, chana daal, malka, etc.

Arhar daal

Moong daal

Chana daal

Malka daal

Urad daal

Beans are pulses.

Click Your Brain

Identify these pictures.

SPICES

We get spices from plants. They add flavour and taste to our food. They are cumin, turmeric, red chillies, clove, cardamom, etc.

Turmeric

Cumin

Red Chillies

Cardamom

Cloves

Spices have medicinal values also.

NUTS

Nuts are dry fruits. They are oily. They are almond, cashewnut, raisin, pistachio, dates, walnut, groundnut, etc.

Almond

Cashewnut

Raisin

Pistachio

Groundnut

BEVERAGES

We drink beverages. Tea and coffee are beverages. Tea is obtained from tea plant leaves and coffee is obtained from the beans of the cocoa plant.

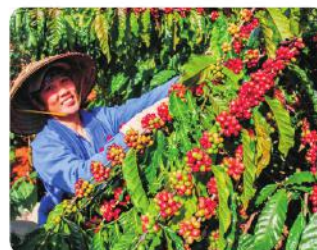

Tea

Tea Garden

Coffee

Coffee Garden

SUGAR

Sugar is obtained from sugarcane plant.

Sugarcane

OIL SEEDS

We get oil from seeds, like mustard, sunflower, etc.

Mustard Oil

Sunflower Oil

KEY WORDS

Grains	—	seeds
Pulses	—	include beans, lentils and peas
Spices	—	food-items that add taste and flavour to our food
Nuts	—	dry fruits
Beverage	—	drinkable food items

Backpedal

- ▶ Fruits have seeds inside them.
- ▶ Plants grow from seeds.
- ▶ We get fruits, vegetables, grains, pulses, beverages, etc. from plants.

TESTING TIME

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

- Fruits are _____.
(i) juicy ☐ (ii) fleshy ☐ (iii) Both of these ☐
- Cucumber is a _____.
(i) fruit ☐ (ii) vegetable ☐ (iii) grain ☐
- Spices add _____.
(i) flavour ☐ (ii) taste ☐ (iii) Both of these ☐

B. Fill in the blanks with correct words:

- Plants give us _____.
- Grains are called _____.
- _____ is a pulse.
- Tea and coffee are _____.

Arhar
beverages
cereals
food

C. Write True or False:

- Plants give us many things.
- Vegetables are grains.
- Rice and wheat are cereals.
- Sugar is obtained from sugarcane.

Subjective Type Questions

A. Answer in one word:

1. These are juicy and fleshy.
2. These are fleshy but not juicy.
3. These have medicinal values also.

B. Answer the following questions:

1. What are the things that we get from plants?

2. What are fruits?

3. Name some pulses and cereals.

4. What do the spices do to our food?

Think and Respond

- There are some fruits which are cooked as vegetables. Write their names.

Critical Thinking

Life skills and Values

Social Literacy

- Many a time, you must have left your food and have thrown it. Should you do this whereas there are so many children who do not have food?

FUNNY PROJECTS

- Make a list of food-items you eat in your different meals.

Experiential Learning

5

ANIMAL KINGDOM

LEARNING OUTCOMES

- ▶ Land Animals
- ▶ Water Animals
- ▶ Land and Water Animals
- ▶ Birds
- ▶ Arboreal Animals
- ▶ Insects
- ▶ Worms

We have learnt about living things. Animals are also living things. We will study about animals in this chapter.

You can see animals around you. They are living beings. They move, breathe, eat food, drink water, reproduce and grow. Animals can be small or big. They live on land, in water or on the trees.

LAND ANIMALS

Animals that live on land are called **land animals**. Examples: dog, cow, lion, giraffe, zebra, elephant and horse, etc.

Cow

Horse

Lion

Giraffe

Zebra

We can divide land animals as wild animals, domestic animals and pet animals.

Wild Animals : Animals that live in forests are called **wild animals**. They are very dangerous and fierce. Examples : lion, tiger, giraffe, zebra, rhinoceros, etc. You can see wild animals in a zoo or sanctuary.

Lion

Tiger

Giraffe

Rhinoceros

Zebra

Domestic Animals : Humans tame some animals for their use. They are called **domestic animals**. They are buffalo, cow, horse, mule, sheep, camel, etc.

Cow

Buffalo

Horse

Mule

Sheep

Pet Animals : Animals that are kept by humans for their company and enjoyment are called **pet animals**. They are dog, cat, rabbit, pig, parrot, etc.

Dog

Cat

Rabbit

Parrot

WATER ANIMALS

Some animals live in water. They are called **water animals**. We call them as aquatic animals also. They are fish, dolphin, shark, whale, octopus, starfish, etc.

Starfish

Shark

Dolphin

Whale

Octopus

LAND AND WATER ANIMALS

There are some animals that live both on land and in water. They are frog, crocodile, tortoise, hippopotamus, etc.

Frog

Crocodile

Tortoise

Hippopotamus

Animals that live both on land and in water are called **amphibians**.

BIRDS

Animals that fly are called birds. They have two wings to fly. They have two legs to walk. Crow, parrot, sparrow, kingfisher, pigeon, owl, kite, etc. are birds. We call them as **aerial animals**.

Parrot

Pigeon

Owl

Sparrow

Kite

Click Your Brain

Which kind of animals are:

1. Frog _____
3. Parrot _____
5. Cow _____

2. Dog _____
4. Lion _____
6. Shark _____

1. Hen and peacock are also birds but they cannot fly high.
2. Kiwi and ostrich are flightless birds.
3. Duck can swim.

ARBOREAL ANIMALS

There are some animals that spend most of their time on trees. They are **arboreal animals**. Examples : monkey, sloth, koala, squirrel, etc.

Monkey

Sloth

Koala

Squirrel

INSECTS

Some animals are very small. They are called **insects**. They have six legs. Most insects have wings. Examples: Ant, housefly, spider, bee, beetle, cockroach, cricket, butterfly, etc. are **insects**.

Spider

Ant

Butterfly

Cricket

Bee

1. Butterfly has four colourful wings.
2. Louse has no wings.

WORMS

Worms are boneless animals. They can only crawl on land. They are earthworm, centepede, leech, nercis, bristle worm, etc.

Earthworm

Centepede

Leech

Bristle

Nercis

Click Your Brain

Give examples:

Arboreal animals	_____	_____
Insects	_____	_____
Worms	_____	_____

Snakes, lizards, crocodiles are reptiles. They have scales on their bodies.

KEY WORDS

Aquatic animals	—	animals that live in water
Amphibians	—	animals that can live both on land and in water
Arboreal animals	—	animals that live on trees
Aerial animals	—	animals that spend most of their time in the air
Insects	—	very small animals
Worms	—	boneless animals
Flightless	—	that cannot fly

Backpedal

- ▶ Animals are divided as land animals, aerial animals and water animals.
- ▶ Land animals can be wild, domestic and pet.
- ▶ Arboreal animals spend most of their time on trees.
- ▶ Insects are very small animals with wings and six legs.
- ▶ Worms are boneless animals.

TESTING TIME

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. Animals generally have _____ legs.

(i) two

☐

(ii) three

☐

(iii) four

☐

2. A lion is a _____ animal.

(i) land

☐

(ii) water

☐

(iii) air

☐

3. Birds _____.

(i) crawl

☐

(ii) walk

☐

(iii) fly

☐

B. Fill in the blanks with correct words:

1. _____ animals live in jungle.

2. _____ is a domestic animal.

3. An octopus lives in _____.

4. Monkeys live on _____.

Horse
water
trees
Wild

C. Write True or False:

1. Land animals live on land.

2. Fish have wings.

3. Insects have six legs.

4. Earthworm is a water animal.

Subjective Type Questions

A. Answer in one word:

1. What are the animals called that live in water? _____
2. What type of animal is a squirrel? _____
3. Who crawls? _____
4. Name one worm and one insect. _____

B. Answer the following questions:

1. What are land animals? What are their types?

2. What are water animals? Give examples.

3. What are birds? Give examples.

4. Which animals live on trees?

Think and Respond

- How are animals useful for us?

Critical Thinking

Life skills and Values

Social Literacy

- How should we behave with animals?

FUNNY PROJECTS

- Make a list of animals you see around yourself in daily life. Experimental Learning

6

TYPES OF ANIMALS

LEARNING OUTCOMES

► Food

► Shelter or House

Every living thing has some basic needs. They are food, shelter and clothes. Animals also need food and shelter.

FOOD

Food is the primary need to grow and live. It gives energy and nutrition. Animals eat different kinds of foods. They eat grass, plants, leaves, fruits, seeds, and flesh of other animals. On the basis of food they eat, animals can be herbivores, carnivores, omnivores or scavengers.

Herbivores : Some animals eat plant products like grass, leaves, fruits, seeds, grains, etc. These animals are called **herbivores**. They are cow, horse, goat, camel, elephant, giraffe, etc.

Cow

Horse

Goat

Elephant

Camel

Carnivores : Some animals eat only flesh of other animals. They are called **carnivores**. They are lion, tiger, crocodile, fox, leopard, etc.

Lion

Tiger

Fox

Crocodile

Leopard

Omnivores : Some animals eat both plant products and flesh of other animals. They are called **omnivores**. They are dog, cat, crow, bear, mouse, kiwi, etc.

Dog

Cat

Crow

Bear

Kiwi

Scavengers : Animals that eat dead animals are called **scavengers**. They are vulture, jackal, coyote, piranha fish, raccoon, etc.

Vulture

Jackal

Coyote

Piranha

Raccoon

SHELTER OR HOUSE

Animals also need shelter. They need it to lay eggs and for protection. Some animals make their shelter themselves. Some of them are:

A lion lives in a den.

A Bird lives in a nest.

A rabbit lives in a burrow.

A snake lives in a hole.

A spider lives in a web.

Bees live in a beehive.

Ants live in an ant colony.

Elephant and giraffe live under trees.

Humans also make shelters for animals.

A cow lives in a shed.

A dog lives in a kennel.

A horse lives in a stable.

Hens live in a coop.

Click Your Brain

Name these.

1. Herbivores
2. Carnivores
3. Omnivores
4. Scavengers
5. Birds build it
6. Lions live here
7. Horses lives here
8. Hens live here

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

KEY WORDS

Herbivores — plant-eating animals
Carnivores — flesh-eating animals

Omnivores	—	plant and flesh-eaters
Scavengers	—	dead animal eaters
Shelter	—	place for living and protection
Flesh	—	soft part of animals or humans under the skin

Backpedal

- ▶ Animals need food and shelter.
- ▶ Herbivores are plant-eaters.
- ▶ Carnivores are flesh-eaters.
- ▶ Omnivores are plant and flesh-eaters.
- ▶ Scavengers eat dead animals.
- ▶ A shelter is needed for protection and to lay eggs.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

- The basic need of animals is _____.
 (i) food ☐ (ii) shelter ☐ (iii) Both of these ☐
- A horse is a _____.
 (i) herbivore ☐ (ii) carnivore ☐ (iii) omnivore ☐
- _____ eat dead animals.
 (i) Carnivores ☐ (ii) Omnivores ☐ (iii) Scavengers ☐

B. Fill in the blanks with correct words:

- Food and shelter are _____ needs.
- _____ are omnivores.
- A house gives _____.
- A cow lives in a _____.

protection
shed
Crows
basic

C. Write True or False:

1. All living things need food and shelter.
2. A carnivore eats grass.
3. Bees live in a beehive.
4. A horse lives in a kennel.

Subjective Type Questions

A. Answer in one word:

1. They eat grass.
2. They eat flesh of other animals.
3. They eat both grass and flesh.
4. They eat dead animals.

B. Answer the following questions:

1. What are basic needs?

2. Why do animals need food and shelter?

3. Differentiate between herbivores and carnivores.

Think and Respond

- Why do different animals eat different foods? **Critical Thinking**

Life skills and Values

Environmental Literacy

- We are destroying our trees and forests. How can we maintain our earth green?

FUNNY PROJECTS

- Paste the pictures of some wild animals in your scrapbook.
- Draw a den and a spider's web in your scrapbook.

Curiosity

Art Integration

7

OUR BODY

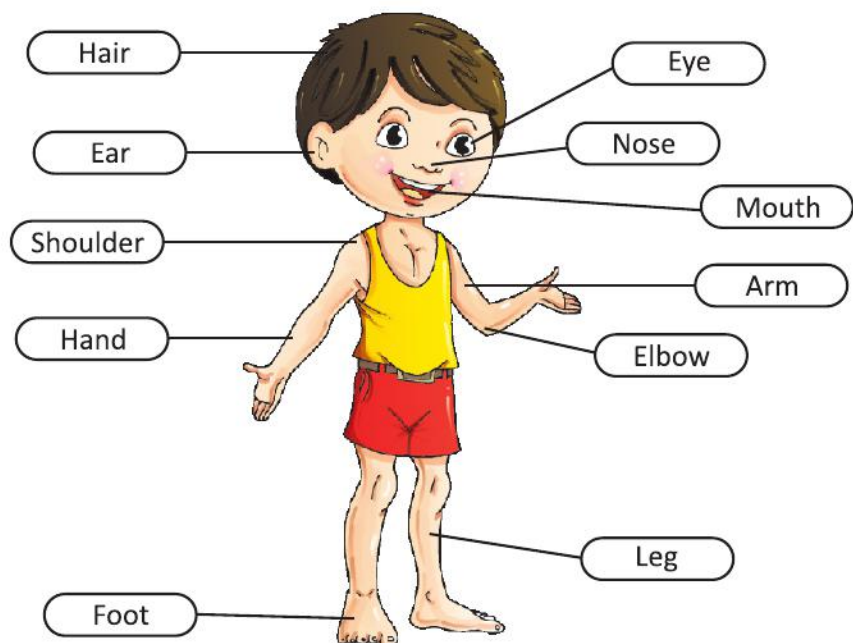

LEARNING OUTCOMES

- ▶ Outer Body Parts
- ▶ Inner Body Parts
- ▶ Uses of Body Parts
- ▶ Sense Organs

You have learnt about the parts of plants. Let us learn about the parts of our body.

Our body has different parts. Some parts are outside of our body. They are called **outer body parts**. They are eyes, nose, ears, hands, legs, feet, teeth, fingers, etc. Some parts are inside of our body. They are called **inner body parts**. They are heart, lungs, kidneys, intestines, etc. Each part of our body is important.

OUTER BODY PARTS

Parts of Human Body

You can touch your outer body parts.

INNER BODY PARTS

Heart

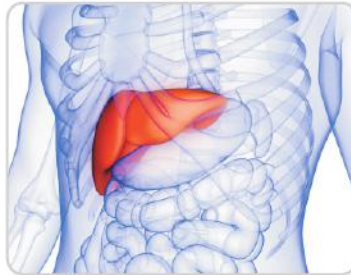

Lungs

Intestines

Kidneys

Liver

Brain

We cannot touch our inner body parts.

USES OF BODY PARTS

We use our outer body parts differently.

Hands : Hands hold, push or pull things and write.

Legs : We use legs to walk, run, kick, etc.

Mouth : Mouth helps to eat and speak.

Teeth : Teeth cut and chew food.

Likewise other body parts have different uses.

Our inner body parts have the following uses:

Brain : Brain thinks and controls the functions of the body.

- Heart** : Heart pumps blood to the whole body.
- Lungs** : Lungs help in breathing.
- Kidneys** : Kidneys remove wastes out of our body.
- Intestines** : Intestines absorb important materials of food and separate the waste.
- Liver** : The liver helps in digestion.

Click Your Brain

Give examples :

1. Outer body parts _____
2. Inner body parts _____

SENSE ORGANS

Sense organs help us to know our surroundings. They are eyes, ears, nose, skin and tongue.

Eyes help us to see. **Ears** help us to hear or listen.

Nose helps us to smell good or bad odour.

We feel with our **skin**. It tells us things as hot, cold, rough, smooth, etc.

We taste with our **tongue**. It tells us about sweet, sour or salty things.

Eyes

Ears

Nose

Skin

Tongue

Click Your Brain

Complete the following.

1. We hear with _____.
2. We see with _____.
3. We smell with _____.
4. We feel with _____.
5. We taste with _____.

KEY WORDS

Outer — outside
Inner — inside

Organs — body parts
Odour — smell

Backpedal

- ▶ Our body has different parts.
- ▶ We can touch our outer body parts.
- ▶ We cannot touch our inner body parts.
- ▶ We have five sense organs— eyes, ears, nose, tongue and skin.
- ▶ Every body part has a different work to do.
- ▶ Each part of our body is important.

TESTING TIME

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. We have different _____ parts.

(i) body

(ii) machine

(iii) outer

2. We can touch our _____ body parts.

(i) outer

(ii) inner

(iii) upper

3. We have _____ sense organs.

(i) four

(ii) five

(iii) six

B. Fill in the blanks with correct words:

1. Eyes, ears, nose, etc. are _____ body parts.

2. We cannot touch our _____ body parts.

3. The _____ thinks and controls the body.

4. We _____ with our skin.

inner

brain

feel

outer

C. Write True or False:

1. Some body parts are outside of our body.

2. Hands hold, push or pull things.

3. Kidneys help in digestion.

4. Nose helps us to smell good or bad odour.

Subjective Type Questions

A. Answer in one word:

1. What do we call the body parts that we can touch? _____

2. Which body parts cannot be touched? _____

3. How many sense organs are there in our body? _____

4. What helps us to feel? _____

B. Answer the following questions:

1. What are outer and inner body parts?

2. Name some inner body parts.

3. Write the uses of any two outer body parts.

4. Name all the sense organs.

Think and Respond

- How are the sense organs different from other outer body parts?

Critical Thinking

Life skills and Values

Healthy Literacy

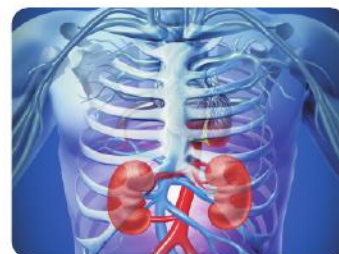

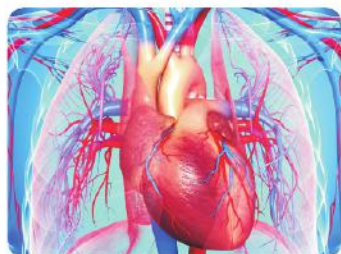

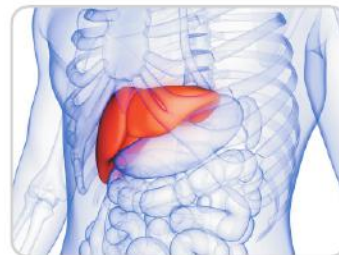

- How can we take care of our body parts?

FUNNY PROJECTS

- Name the given body parts.

Recognising Skills

- Draw the pictures of sense organs in your notebook.

Art Integration

8

STAYING HEALTHY

LEARNING OUTCOMES

► Cleanliness

► Keeping Fit

In the previous chapter, you have learnt about different body parts. In this chapter, we shall teach you about some habits which keep you healthy and fit. To be healthy, you must follow cleanliness.

CLEANLINESS

Cleanliness means to be free from germs, dirt and waste. To maintain cleanliness, follow the given schedule:

- Take bath everyday.
- Brush your teeth twice a day. Use soft brush to clean your teeth.
- Wash your hair with mild shampoo.
- Go to washroom daily.
- Oil your hair when they are dry.
- Wash your hands as to needed.

- Trim your nails regularly.
- Wash your eyes with fresh water.
- Keep your nose clean. Never put your finger into your nose.
- Cover your mouth while sneezing and coughing.
- Do not bite your nails.
- Use only your towel and comb.

Germes are tiny; we cannot see them. So cleanliness is necessary.

Click Your Brain

Write some ways to keep yourself clean.

Tick (✓) the activity, which is right.

KEEPING FIT

We also do some activities to keep ourselves fit. Here are some of them.

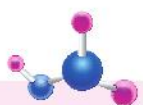

- Go to bed early at night and get up early in the morning.

- Eat healthy food slowly and chew it well. Drink plenty of clean water.
- Maintain correct posture while walking or sitting.
- Breathe through your nose.
- Do some light **yoga asanas**.
- Do **Pranayam**.
- Go for a walk every morning.
- Play any game or go for cycling.
- Do some exercises.
- Eat healthy food on time.
- Do not spend too much time on mobile.
- Never cover your face while sleeping.

KEY WORDS

Cleanliness	—	state of being clean
Pranayam	—	a yoga pose
Asanas	—	sitting meditation poses

Backpedal

- ▶ To be healthy and fit, we should maintain cleanliness.
- ▶ We should do some exercises, yoga, pranayam, etc. to be fit and healthy.
- ▶ Eat healthy food slowly and chew it well. Drink plenty of clean water.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

- To be healthy, you must follow _____.
 (i) unhygienic habits ☐ (ii) bad habits ☐
 (iii) cleanliness ☐
- Take a bath _____.
 (i) daily ☐ (ii) once a week ☐
 (iii) sometimes ☐
- _____ makes us fit.
 (i) Exercise ☐ (ii) Yoga ☐ (iii) Both of these ☐

B. Fill in the blanks with correct words:

- Brush your teeth _____ a day.
- Trim your _____ regularly.
- Do not _____ your nails.
- Drink _____ of clean water.

plenty
bite
twice
nails

C. Write True or False:

- Use soft brush to clean your teeth.
- Wash your eyes with warm water.
- Go to bed early at night and get up early in the morning.
- Do not do the exercise.

Subjective Type Questions

A. Answer in one word:

- You should trim these. _____
- You should do this before and after having food. _____
- Breathe through this. _____

4. You should eat this to be fit and healthy. _____

B. Answer the following questions:

1. What is the meaning of cleanliness?

2. What should we do to keep our body clean?

3. What activities should we do to be fit?

4. Write two ways of cleanliness and being healthy?

Think and Respond

- Why is it important to be fit and healthy?

Critical Thinking

Life skills and Values

Healthy Literacy

- What type of activities should we do to be fit and healthy?

FUNNY PROJECTS

- Identify the pictures and write the names of these activities. **Recognising Skills**

- Paste the pictures of some healthy activities in your scrapbook. **Art Integration**

9

HOUSES AND CLOTHES

LEARNING OUTCOMES

- ▶ Need for a House
- ▶ Types of Houses
- ▶ Some Other Houses
- ▶ A Good House
- ▶ Clothes

All living beings need a house to live in. It is the basic need of living beings.

It protects us from heat, cold, rain, storm, thieves and wild animals.

NEED FOR A HOUSE

House is a place where we live in. It keeps us safe.

TYPES OF HOUSES

Mainly houses are of two types — kutchha house and pucca house .

Kutchha House : A kutchha house is made up of mud, straw, bamboo, etc. Kutchha houses are mostly found in villages. They are not much strong.

Kutchha House

Pucca House

Pucca House : A pucca house is made of cement, bricks, iron, etc. Pucca houses are strong and found mostly in cities. Nowadays, you can see them in villages too.

SOME OTHER HOUSES

Some other houses are tent, houseboat, bungalow, caravan, igloo, etc.

Tent

Houseboat

Bungalow

Flats

Caravan

Stilt House

Igloo

Stone House

An Igloo is a house made of snow blocks.

A GOOD HOUSE

- A good house is airy.
- It has good ventilation.
- There are high walls in a good house.
- There is net on windows and doors.
- A good house is spacious. It has bedroom, drawing room, dining room, study room, kitchen, storeroom, bathroom and toilet.
- A good house has good drainage system.

Click Your Brain

Look at the pictures given below and write kutcha house or pucca house.

CLOTHES

We need clothes to cover our body. Clothes protect us from heat, cold, dust, rain and germs.

There are different types of clothes, like cotton clothes, woollen clothes, silk clothes, etc.

We wear clothes according to seasons.

We wear light-coloured cotton clothes in summer. They keep us cool.

Clothes in Summer

Clothes in Rainy Season

We wear synthetic and cotton clothes in rainy season. We use raincoats, umbrellas, gumboots to protect ourselves from being wet.

We wear woollen clothes in winter. They keep us warm and protect us from cold.

Clothes in Winter

KEY WORDS

- Ventilation — a passage to let go the warm air out
 Drainage system — a system to let go the dirty water out

Backpedal

- ▶ A house protects us from heat, cold, rain and thieves.
- ▶ A house can be kutcha house or pucca house.
- ▶ Some other houses are houseboat, igloo, tent, caravan, bungalow, stilt house and flat.
- ▶ Clothes protect us from heat, cold, rain and germs.
- ▶ We wear clothes according to seasons.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. A house _____ us.
 (i) harms ☐ (ii) protects ☐ (iii) troubles ☐
2. A house can be _____.
 (i) kutcha ☐ (ii) pucca ☐ (iii) Both of these ☐
3. We wear a raincoat in _____ season.
 (i) summer ☐ (ii) winter ☐ (iii) rainy ☐

B. Fill in the blanks with correct words:

1. A house protects us from heat, cold, _____ and thieves.
2. A pucca house is _____.
3. We need clothes to _____ our body.

strong
rain
cover

C. Write True or False:

1. A kutch house can be seen in a village.
2. A good house does not have ventilation.
3. We wear only one type of clothes.

Subjective Type Questions

A. Answer in one word:

1. These houses are found in cities.
2. These houses are found in villages.
3. We wear these clothes in summer.

B. Answer the following questions:

1. Why do we need a house?
2. How many kinds of houses are there?
3. Why do we need clothes?

Think and Respond

- Why are house and clothes important for us? **Critical Thinking**

Life skills and Values

Environmental Literacy

- Why do some houses have flat roofs and some have slopy roofs?

FUNNY PROJECTS

- Make a model of an igloo with thermocol.

Creativity

10

WATER : A PRECIOUS GIFT

LEARNING OUTCOMES

- ▶ Need of Water
- ▶ Sources of Water
- ▶ Uses of Water
- ▶ Clean Water

Water is precious. We cannot live without water. About 70% area of our earth is covered with water. A normal human body also contains 70% of water. Humans, animals, birds, plants, all need water.

NEED OF WATER

Everyone needs water to drink. Water keeps the body cool. It helps in digestion.

USES OF WATER

We use water for:

- washing clothes.
- cleaning floor, utensils, etc.
- cooking food.

- putting off fire.
- flushing toilets.
- bathing.
- watering plants and fields.

You get water from taps. But there are many places where people have to go very far-off places to fetch water.

SOURCES OF WATER

The main source of water is the rain. It is the purest form of water.

Rain

River

Pond

Lake

Well

Rivers, lakes and ponds are some other sources of water. We also get water from wells. Oceans and seas also have water. But it is not fit for drinking.

Water in oceans and seas is salty.

Click Your Brain

Complete the following.

1. We need water to _____.
2. We use water for _____, _____, _____, etc.

3. The main source of water is _____.
4. Some other sources of water are _____, _____, _____.
5. There is salty water in _____ and _____.

CLEAN WATER

We should drink clean water. If we drink dirty water, we can fall ill. We can make the dirty water clean by:

- boiling.
- filtering.
- putting chlorine into water.

Waste and germs make the water impure.

KEY WORDS

Utensils — pots and pans used in the kitchen

Backpedal

- ▶ We need water to drink.
- ▶ We use water for washing, cleaning, bathing, etc.
- ▶ The main source of water is the rain.
- ▶ We get water from rivers, ponds, lakes and wells.
- ▶ Oceans and seas have salty water.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

- We need water to _____.
 (i) drink ☐ (ii) bath ☐ (iii) Both of these ☐
- The main source of water is the _____.
 (i) river ☐ (ii) pond ☐ (iii) rain ☐
- Oceans and seas have _____ water.
 (i) sweet ☐ (ii) bitter ☐ (iii) salty ☐

B. Fill in the blanks with correct words:

- We cannot live without _____.
- Water is used in _____ the plants.
- Water helps in _____.
- Water in oceans and seas is not _____ for drinking.

watering
digestion
fit
water

C. Write True or False:

- About 70% area of our earth is covered with water.
- Only humans need water.
- Water keeps our body cool.
- We can clean water by boiling it.

Subjective Type Questions

A. Answer in one word:

- How much water is there on the earth? _____
- It is the purest form of water. _____
- It may make us ill. _____
- We can clean water by doing this. _____

B. Answer the following questions:

1. Why do we need water?

2. What are the uses of water?

3. What is the main source of water?

4. What are the methods to make the water clean?

Think and Respond

- Why is it not good to drink dirty water?

Critical Thinking

Life skills and Values

Environmental Literacy

- Should we waste water or not? Why?

FUNNY PROJECTS

- Write a paragraph on 'Water'.

Curiosity

- Make a water drop on a drawing sheet and colour it.

Art Integration

11

AIR : OUR LIFELINE

LEARNING OUTCOMES

► Uses of Air

► Qualities of Air

We cannot live without air. Air is one of our basic needs. Every living being needs air to breathe and to be alive.

There is no life without air. Air has oxygen which we breathe in and carbon dioxide which plants breathe in.

USES OF AIR

Air is used for:

- breathing.
- burning fire.
- blowing balloons.
- gliding hot air balloons.
- flying kites.
- drying clothes.

Breathing

Flying Kites

Blowing Balloons

Drying Clothes

QUALITIES OF AIR

Air has the following qualities:

- We cannot see air, we can feel it.
- Air is colourless.
- Air occupies space.
- Air has force.
- Air has weight.
- Air has mass.
- Air exerts pressure.

Air

ACTIVITY

Air Helps in Burning.

Take two candles, two glasses and one lid. Light both the candles. Put each candle under each glass. Now, cover one glass with the lid. After some time, the candle kept in the glass with lid on it, blows out and the other candle keeps on burning. It proves that the fire needs air.

Air Occupies Space.

Take one glass and a half filled tub with water. Try to put the glass into water straight. It will not get into the water. Now, tilt the glass. Push the glass into the water again. Now it can go into the water. It proves that air occupies space.

KEY WORDS

- Breathing — process of taking the air in and out
Gliding — move smoothly and easily without power

Backpedal

- ▶ Air is very important.
- ▶ Air is needed to breathe.

- ▶ We need air for burning fire, flying kites, etc.
- ▶ Air has many qualities.

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

- | | | | |
|------------------------------------|-------------------------------------|--|--|
| 1. We cannot live without _____. | | | |
| (i) pen ☐ | (ii) paper ☐ | (iii) air ☐ | |
| 2. We need air to _____. | | | |
| (i) see ☐ | (ii) eat ☐ | (iii) breathe ☐ | |
| 3. Air is used for burning _____. | | | |
| (i) paper ☐ | (ii) fire ☐ | (iii) cloth ☐ | |

B. Fill in the blanks with correct words:

- We need air to _____.
- Air has _____.
- Air is _____.
- Air occupies _____.

colourless
space
oxygen
breathe

C. Write True or False:

- Every living being needs air.
- Plants breathe in oxygen.
- Air helps in flying kites.
- Air has no mass.

Subjective Type Questions

A. Answer in one word:

- What do we need to be alive?

2. Air exerts this.
3. Air occupy this.
4. Plants breathe in this.

B. Answer the following questions:

1. Why do we need air?

2. What do we breathe in?

3. Write three uses of air.

4. What are the qualities of air?

Think and Respond

- Do water animals breathe? How?

Critical Thinking

Life skills and Values

Environmental Literacy

- How are we responsible to make the air dirty?

FUNNY PROJECTS

- Write some uses of air other than discussed in the chapter. **Experiential Learning**

- Draw a picture showing the hot air balloon in your notebook.

Art Integration

12

OUR PLANET EARTH

LEARNING OUTCOMES

► The Earth

► The Sun

► The Moon

► The Stars

THE EARTH

We live on the Earth. It is our home. It is the third planet in the solar system. It is round in shape. It is called the **blue planet** because of water on its surface.

There are plants and trees on the Earth.

It moves around the Sun and on its axis. It completes one round around the Sun in every 24 hours. We call this time period as **one day**.

Earth

The Earth is the only planet to have life on it.

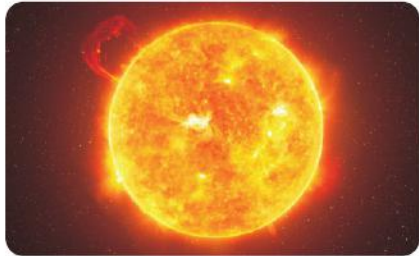

THE SUN

The Sun is a star. It is very big. It is a huge ball of fire. It is very hot. It gives us heat and light. It is very far from the Earth. It brings day and night on the Earth.

The Sun rises in the east and sets in the west.

The rays of the Sun produce heat. Heat is very important for the growth of plants.

There will be no light and heat in the absence of the Sun.

Sun

Rising Sun

Setting Sun

THE MOON

The Moon is a satellite of the Earth. It does not have its own light. It shines bright with the light of the Sun.

You can see it in the night sky.

It moves around the Earth. It changes its shape everyday. When it is a complete circle, it is called the **full moon**. When there is no moon, it is called the **new moon**. New moon generally cannot be seen.

Moon

Phases of the Moon

THE STARS

We see stars in the sky at night.

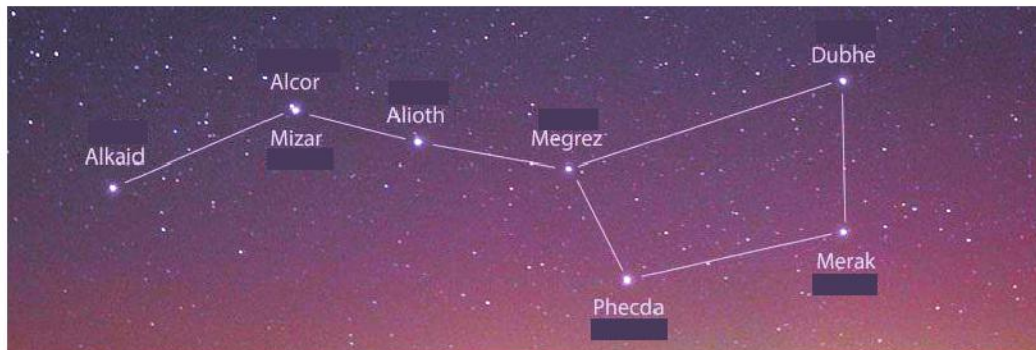

They are bright and twinkling. They are of different sizes. The Sun is also a star. Stars are stationary. They have their own light.

They look so small because they are very far from us. Some stars are bigger than the Sun.

There are some stars which form some shape. These are called **constellation**. Example – **Saptarishi**.

Stars

Saptarishi

Click Your Brain

1. What is the Sun?

2. What is the Earth?

3. What is the Moon?

Stars are there in the day time, but in the Sun's bright light they are not visible to us.

KEY WORDS

Planet — a body which revolves around the Sun.
Stationary — fixed

Backpedal

- ▶ The Earth is a planet. We live on it.
- ▶ The Sun is a huge ball of fire.
- ▶ The Moon is a satellite of the Earth.
- ▶ We see the stars at night.

TESTING TIME

Objective Type Questions

Continuous Review

A. Tick (✓) the correct option:

1. We live on the _____.
(i) Earth ☐ (ii) Moon ☐ (iii) stars ☐
2. The earth moves around the _____.
(i) Moon ☐ (ii) Sun ☐ (iii) stars ☐
3. The _____ is the satellite of the Earth.
(i) Sun ☐ (ii) Moon ☐ (iii) stars ☐

B. Fill in the blanks with correct words:

1. The Earth gets light from the _____.
2. The Sun is a _____.
3. The Sun rises in the _____.
4. The Moon is a _____ of the Earth.

satellite
east
star
Sun

C. Write True or False:

1. The Earth moves around its axis.
2. The Sun is very near to us.
3. The Moon moves around the Sun.
4. The stars are stationary.

Subjective Type Questions

A. Answer in one word:

1. What is the Earth?
2. What is the Sun?
3. What is the Moon?
4. What do we see at night in the sky?

B. Answer the following questions:

1. Why is the Earth called the blue planet?

2. What do we get from the Sun?

3. What is the full moon?

4. What is the Saptarishi?

Think and Respond

- How do we get light?

Critical Thinking

Life skills and Values

Environmental Literacy

- The Earth moves. But we do not fall. How?

FUNNY PROJECTS

- Write the names of other planets that move around the Sun.
- Draw the picture of the Earth with the Sun and the Moon in your notebook.

Curiosity

Art Integration

13

WEATHER AND SEASONS

LEARNING OUTCOMES

► Weather

► Seasons

There is a blanket of gases all around the earth. It is called the **atmosphere**. The air, heat and water present on the earth, make its conditions cool, hot, windy, etc. on the earth.

WEATHER

When one morning you wake up, it is cool, by the noon it becomes hot, and in the evening it becomes pleasant and starts to rain. These changing conditions of atmosphere are called as **weather**.

Cool Morning

Hot Noon

Rainy Evening

The weather changes hour to hour or day to day. When the sun is strong, it is **sunny**; when air is strong, it is **windy**; when there are

clouds in the sky, it is **cloudy**; when the clouds pour down water, it is **rainy**.

Sunny day

Windy day

Cloudy day

Rainy day

SEASONS

When the weather remains the same for a long time, we call it **season**. There are three main seasons in India. They are:

- Summer Season
- Rainy (Monsoon) Season
- Winter Season

Summer Season : Summer season is hot and dry. The sun shines brightly. It is harsh at noon. People wear light-coloured cotton clothes. They like to stay indoors. They enjoy cold drinks that make the atmosphere cool. They sit in AC rooms or in front of the coolers.

Summer Season

Warm winds blow during this season. They are called **Loo**. Many people go to hill stations to escape from the hot season.

Rainy Season : Rainy season comes after the summer season. It is cloudy, wet and rainy. It rains heavily. It rains now and then.

Rainy Season

The weather is pleasant when it rains. People use umbrellas and raincoats when they go out of their houses.

People also wear gumboots. Sometimes there is a rainbow in the sky.

Winter Season : Winter season is cold and dry. It comes after the rainy season. People wear woollen clothes in winter season.

The sun is not bright. It is cold in winter. Snow falls on the Himalayas in winter season.
