PREFACE

In this modern age, computer plays an important role in our daily life. Computers are widely used everywhere for advancement and progress in our life. Mostly every field of our surrounding is depended on computers. So, all the schools and colleges are teaching computer as one of the main subject and preparing students to meet the challenges of the coming time.

This series **Computer Interface** of 8 book (I to VIII) written for the students studying in middle classes following **National Education Policy 2020** and covers every aspect which is related to computer according to the recent development in computer technology. This series is strictly written according to the latest syllabus based on the guidelines given by CBSE. Moreover the language used in this series is very easy to understand by the students, teachers and parents.

This series is designed to provide a complete knowledge with the latest information with lab exercises and more over.

We hope that students will enjoy learning computer with this series. Any suggestions for the improvement of these books will be highly appreciated.

Contents

 1.	My Computer	5
 2.	Know Your Computer Parts	13
 3.	Introduction to Artificial Intelligence	20
 4.	About Mouse	27
 5.	Where Computers are Used Now days	33
 6.	How to Turn On and Off Computer?	40
 7.	Introduction to Microsoft Paint	47

My Computer

Lesson at a Glance

- Know About Machine
- About Computer
- Types of Computer

Know About Machine

A machine is a man-made thing which helps us in doing different activities and makes our work easier.

There are many machines all around us.

Television

Car

Refrigerator

Mobile Phone

Washing Machine

Calculator

All machines are made by man.

Now days all machines work automatically. These automatic machines do not need our effort, they work on electricity or fuel. These machines are easy to handle and save our time.

Must Know!

- A computer is also a machine. It runs on electricity.

About Computer

- A computer is a machine.
- It is an electronic instrument.
- It makes our work easy.
- It shows cartoons.
- It remembers many things.
- It works on electricity.
- It never gets tired or hungry.
- It works very fast and correctly.
- It cannot think itself.

Must Know!

- The first computer was made by Charles Babbage. He is also known as the father of computer.

Types of computer.

DESKTOP

A **Desktop** computer can be seen at home or at our school. It is put on a desk.

LAPTOP

Laptop computer is portable and can be easily carried from one place to another.

NOTE BOOK

Notebooks are ultra-portable computers that are smaller laptops.

TABLET

A **tablet** computer is smaller than laptop or Notebook. We use finger touch to work on it.

SMART PHONE

A **smart phone** is a mobile phone as well as a computer. It is smaller than a tablet.

Tips for The Teacher

Teacher should show the students different types of computer machines and should make them understand about these different computers.

WORK STATION

A Tick (✓) the correct option.

(NEP) Analytical Skills

1. Which of the following is not a machine?

(a)

(b)

(c)

2. Which machine helps us to wash our clothes?

(a)

(b)

(c)

3. Which is a machine?

(a)

(b)

(c)

4. Which machine works very fast?

(a)

(b)

(c)

5. This machine is used in calculating.

(a)

(b)

(c)

B Fill in the blanks.

1. A computer does not make_____.
2. A computer is a_____.
3. A computer can_____ many things.
4. A computer can work very_____.
5. Some machines work on_____.

C Write T for True or F for False.

1. A computer can store all our works done on it.
2. Machines are not made by man.
3. Machines make our work easy.
4. Computer is an electronic machine.
5. Computer LAN think itself.

☐
☐
☐
☐
☐

D Match the followings.

1.  (a) ironing clothes
2.  (b) grinding
3.  (c) transport
4.  (d) entertainment
5.  (e) writing

E With the help of pictures complete the names.

C _ _ M _ _ R _ _

P _ _ I _ _ T _ _ R

C _ _ O _ _ E _ _

T _ _ _ EV _ _ _ I _ _ N

A _ _ R _ _ P _ _ A _ _ E

F Answer the following questions.

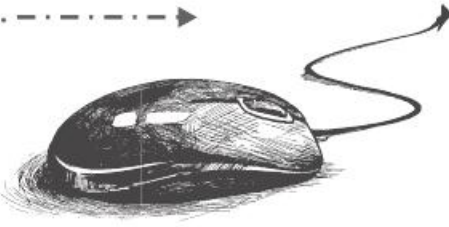

1. Write some man-made machines.

2. Have you seen computer? Write the name of its supporting parts.

3. What is a machine?

4. Can a machine help us to save our time? How?

5. What is a computer?

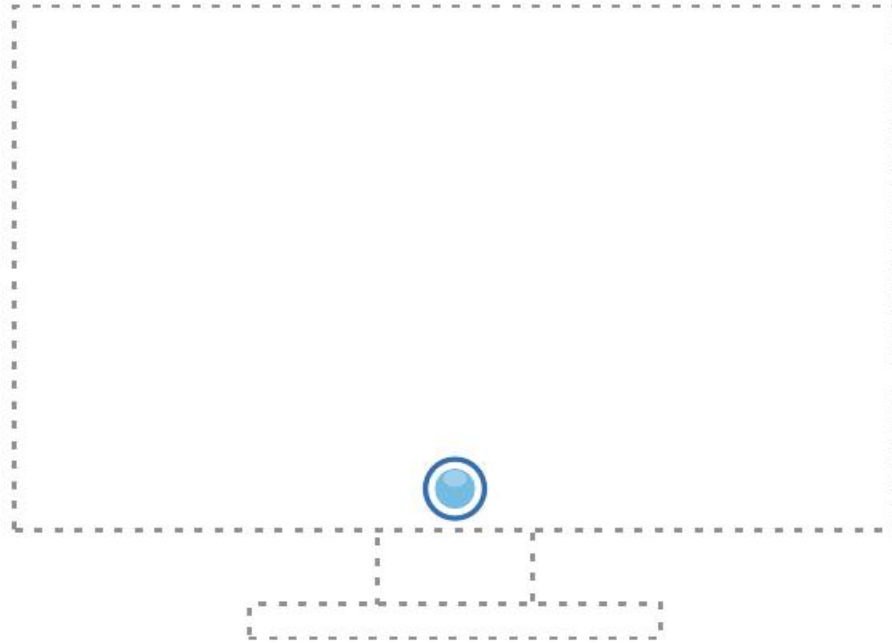

Worksheet

A Join the dots to complete the picture and colour it. You can make a picture on its screen as you like.

(NEP) Creative Learning

B Encircle the name of machines in the world puzzle.

M	A	U	B	C	M	I	X	I	E
U	S	T	I	Q	O	A	E	L	R
S	I	A	C	S	B	U	S	M	L
I	C	B	Y	D	I	B	F	N	U
C	A	L	C	U	L	A	T	O	R
B	N	E	L	G	E	I	C	O	P
C	A	M	E	R	A	T	H	Y	W

C Tick (✓) the machines you see at home :

Know Your Computer Parts

2

Lesson at a Glance

- Input Devices
- Output Devices
- Processing Device
- Storage Devices

We use our different parts of body like eyes, lips, hands and feet to do work, in the same way, a computer also has different body part to perform different task.

Remember that, it is a machine not a living thing.

We divided the computer parts as input devices, output devices, processing device and storage devices.

Must Know!

- Many other electronic devices can be attached or connected with computer.

Let us learn about the parts of a computer one by one.

Input Devices

KEYBOARD

It looks like a typewriter.

It has many small buttons called keys.

It is used to give instructions to the computer.

You can type letter, application, essay etc. on it.

MOUSE

It is used to select and move items on the screen.

It is used to draw pictures.

It has two or more click buttons.

SCANNER

It is used to copy pictures from your book to the computer.

HEAD PHONE/MIC

It is helpful in recording your voice/song on the computer.

Output Devices

MONITOR

A monitor looks like a television.

It displays all the works done on a computer.

You can watch cartoons, movies, pictures, etc. on it.

Must Know!

- A new type of monitor is called LCD (Liquid Crystal Display) Monitor.
- A monitor is also called VDU (Visual Display Unit).

PRINTER

A printer is an output device.
It prints the output on paper.
Its printout on a paper is called 'Hard copy'.

SPEAKER

It is used to listen music, songs, voice, speech on the computer.

Processing Device

CPU

CPU means for Central Processing Unit.
CPU is the brain of a computer.
It controls all the functions of a computer.

Storage Device

CD-DRIVE/FLOPPY-DRIVE/PEN-DRIVE

All these three are used to store your work.
They are used to carry the work from one computer to another.

HARD DISK

It is fixed inside the CPU box.
Computer stores all its informations and data in the hard disk.

Must Know!

- CD stand for Compact Disk.
- Pen drive can store lots of work, movies, graphics games etc. in it.

Tips for The Teacher

Teacher should take the students to the computer lab and show them all the parts of computer and define them how they work.

WORK STATION

A Tick (✓) the correct option.

(NEP) Analytical Skills

- You can watch movies and cartoons on the
(a) Keyboard ☐ (b) Mouse ☐ (c) Monitor ☐
- You can listen songs with the help of
(a) Printer ☐ (b) Head phone ☐ (c) Speaker ☐
- You can print your drawing from
(a) Mouse ☐ (b) Scanner ☐ (c) Printer ☐
- You can type in computer with
(a) Keyboard ☐ (b) Mouse ☐ (c) CPU ☐
- You can draw pictures on computer with
(a) Printer ☐ (b) Keyboard ☐ (c) Mouse ☐

B Fill in the blanks.

- Keyboard looks like a _____.
- You take print out from a _____.
- A _____ help you to draw pictures.

4. You listen songs on _____.
5. A monitor looks like a _____.

C Write T for True or F for False.

1. A keyboard looks like a television.
2. A mouse helps us to point at items.
3. A mouse has one button.
4. Printer is an input device.
5. Keyboard has many small buttons.

☐
☐
☐
☐
☐

D Match the followings.

- | | | |
|----|---|--------------|
| 1. |  | (a) Printer |
| 2. |  | (b) Monitor |
| 3. |  | (c) Speaker |
| 4. |  | (d) Keyboard |
| 5. |  | (e) UPS |

E Guess who I am?

1. I can store all the things in computer.
2. I can copy pictures from your book to computer.
3. I look like a television.
4. I can help you to write on computer.

5. I can point at items shown on the monitor. _____

F Answer the following questions.

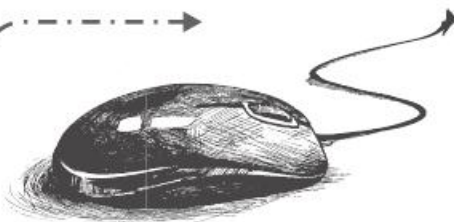

1. Which part of computer is called 'the brain of computer'?

2. On which part of computer you can watch cartoon or movies?

3. Which computer part types the numbers and letter in the computer?

4. What moves or select items on the screen?

5. What helps you to play games on computer?

Worksheet

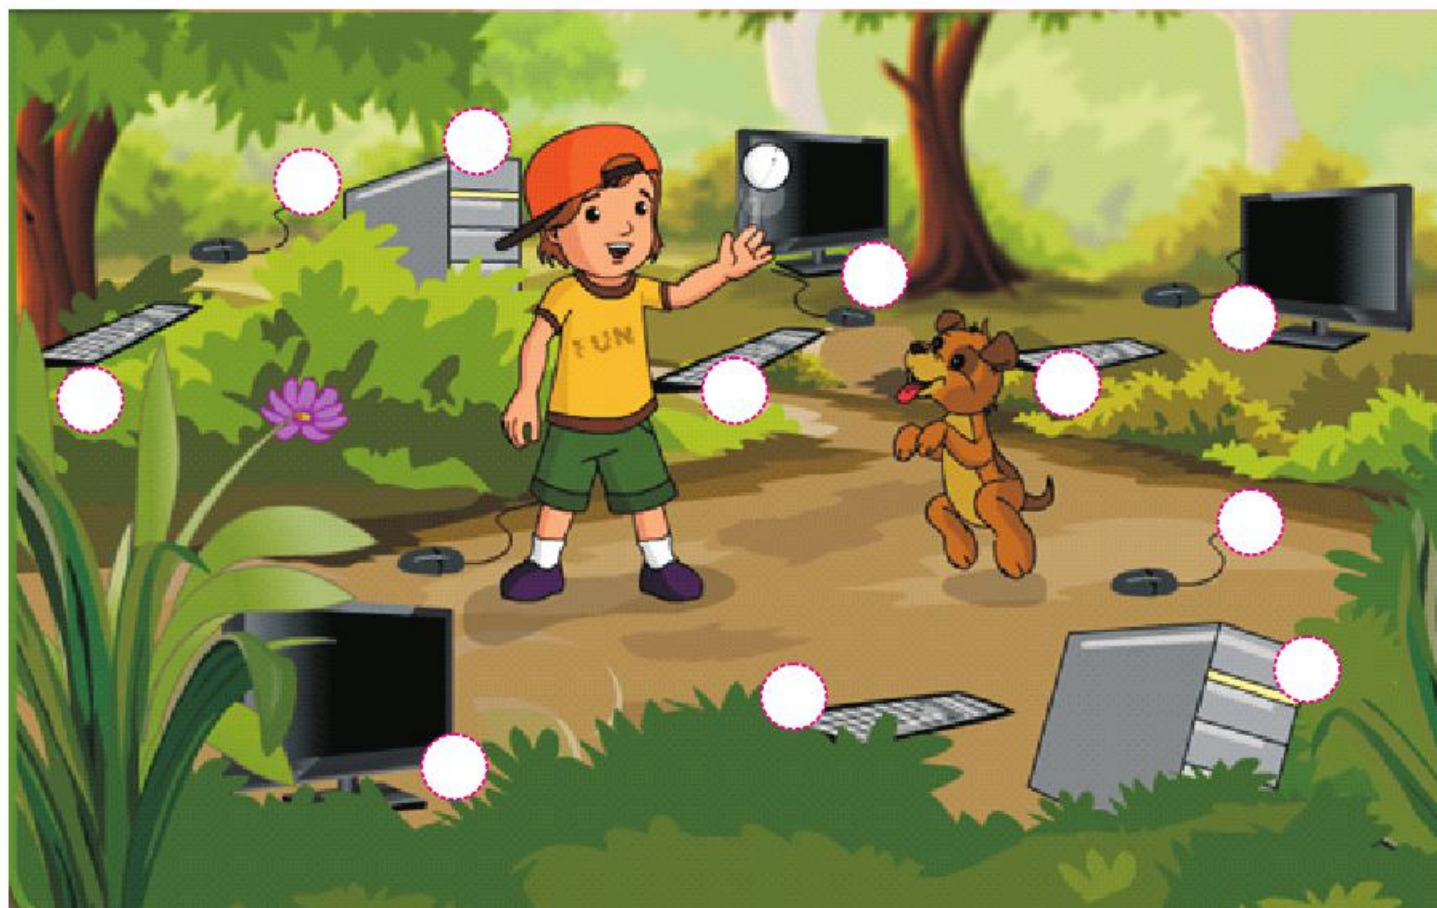

A Write the names of the computer parts in the blank spaces.

(NEP) Creative Learning

Take the help from the picture :

B Search the parts of a computer in the following picture, count them and write their numbers.

Monitor _____ Mouse _____ Keyboard _____ CPU _____

Introduction to Artificial Intelligence

Lesson at a Glance

- Natural Intelligence
- Artificial Intelligence
- Artificially Intelligent Devices

Natural Intelligence

Intelligence is the ability to think, understand and learn from previous experience to act in a given situation.

For example, when you take a sip of hot milk, you feel the heat and put the cup away to cool down. Once this has happened to you for the first time, you always check before taking a sip next time. This is called experience.

Artificial Intelligence

- Artificial Intelligence refers to the intelligence created by humans.
- Artificial Intelligence is the ability of a machine to think and learn.
- Artificial Intelligence makes machines to think and learn.
- Artificial Intelligence makes machines as smart as humans.

Artificially Intelligent Devices

There are many devices made by human beings for different purposes. Let us have a look at a few examples.

Artificial Intelligence in Toy

Aibo is an artificial dog with artificial intelligence. It can do many things that a dog can do, For example, it can bark like a dog, play with toys, listen to your commands and identify different people.

Artificial Intelligence in Machines

Artificially intelligent machines used in factories are capable of lifting, moving, and packing objects just like human beings.

Artificial Intelligence in Television

Artificial Intelligence in television can recognize your voice and natural language to help you control it.

Artificial Intelligence in Smartphones

Artificial Intelligence in smartphones helps you control your applications and other smart devices.

Must Know!

- A machine built in the late 1990s called Kismet can recognize emotion through human body language and voice tone.

Tips for The Teacher

Explain the students about Artificial Intelligence by showing some real life example like: Air conditioner, Smart phone, Smart Refrigerators, Smart Television etc.

WORK STATION

A Tick (✓) the correct option.

(NEP) Analytical Skills

1. Which of the following is a natural thing?

- a. Chair ☐ b. Glass ☐ c. Sand ☐ d. Book ☐

2. Which of these is not a natural thing?

- a. Flower ☐ b. Machines ☐ c. Tree ☐ d. Water ☐

3. Things that are created by human beings are known as :

- a. natural things ☐ b. artificial things ☐
c. creature things ☐ d. grounded things ☐

4. Artificial intelligence makes machines as smart as:

- a. animals ☐ b. humans ☐
c. both (a) and (b) ☐ c. none of these ☐

5. What is the name of the dog having artificial intelligence?

- a. Aibo ☐ b. Aido ☐ c. Allo ☐ d. Aico ☐

B Fill in the blanks.

1. When you look around yourself, you may find two types of objects _____ and _____.

2. Sun is a _____ thing.
3. _____ intelligence is created by humans.
4. _____ is the ability to think, understand and learn from previous experience.
5. Aibo can _____ different people.

C Write T for True or F for False.

1. Things that are found naturally are known as natural things. ☐
2. Artificial Intelligence refers to intelligence created by machines. ☐
3. Aibo is an artificial dog with artificial intelligence. ☐
4. Artificially intelligent machines used in factories. ☐
5. Artificial Intelligence in smartphones helps you control your habits. ☐

D Answer the following questions.

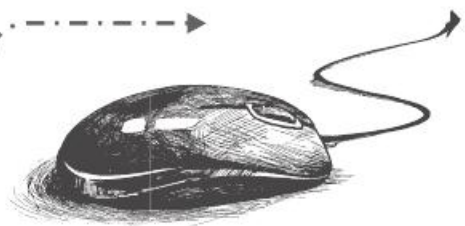

1. What are natural things?

2. Define Intelligence.

3. What is experience?

4. What are artificial things?

5. Define smart device.

Worksheet

A Discuss with your teacher and find any three machines which have artificial intelligence in them. Find their pictures and paste in the space given below:

(NEP) Creative Learning

B Look at the following images and tick (✓) the functions it can perform.

1.

Lift

☐

Eat

☐

Sleep

☐

Pack

☐

Walk

☐

Bath

☐

2.

Bark

☐

Identify people

☐

Cook

☐

Play

☐

LAB ACTIVITY

Circle with green crayon on the objects that have natural intelligence and with red crayon on the objects that have artificial intelligence.

(NEP) Computational Learning

About Mouse

4

Lesson at a Glance

- About Mouse
- Use of a Mouse
- How to hold a mouse

About Mouse

A computer mouse is an input device. With the help of a mouse, we give commands to the computer.

A mouse has three parts : left button, center button and right button.

Use of a Mouse

Mouse is just like a pointing device. We use it to point to a particular object that we wish to select and then click on it.

It is used for :

- to draw picture
- to play games

Must Know!

- Mouse is also called a 'Pointing Device'.

Now, learn how to hold the mouse. Look at the picture.

First, hold the mouse softly to your palm rest.

Second, put your first finger on the left button.

Third, put your second finger on the right button.

Now finally, hold the mouse with your thumb and remaining fingers.

Now, learn how to use the mouse.

We use mouse by pressing its button, which is called 'CLICKING'.

Selecting an item on the screen by clicking them.

LEFT CLICK

Pressing the left button once is called single click.

This is used to select an activity after you point to it.

DOUBLE CLICK

Pressing the left button twice quickly is called double click.

This is used to start the activity after you have pointed at it.

RIGHT CLICK

Click the right button once is called right click.

This is used to control the activity after you have started it.

Now, learn how to move the mouse. Look at the picture.

What do you see in the picture?

Yes, this is an arrow on the monitor.

It is called the mouse pointer.

When you move the mouse, the pointer (arrow) also moves.

The mouse is usually kept on a flat surface called the mouse pad. This way it will always work properly.

Must Know!

- Single click is used to select an item on the computer screen.
- When you do double click the mouse it makes two sharp CLICK Sounds.

Tips for The Teacher

Teacher should show the students a mouse. Give full demonstration of using a mouse i.e. holding a mouse, moving, selecting an object etc.

WORK STATION

A Tick (✓) the correct option.

(NEP) Analytical Skills

1. Pressing the buttons is called a

(a) Selecting ☐ (b) Scrolling ☐ (c) Click ☐

2. A mouse is also called a

(a) Pointing device ☐ (b) Scrolling ☐ (c) Selecting ☐

3. The arrow is called the mouse

(a) Select ☐ (b) Pointer ☐ (c) Scroll ☐

4. The wheel between the left and right mouse is called the

(a) Click ☐ (b) Round ☐ (c) Scroll ☐

5. A mouse is always placed on a

(a) Cloth ☐ (b) Mouse pad ☐ (c) Paper ☐

B Fill in the blanks.

1. A mouse is a part of _____.

2. A mouse has _____.

3. Pressing a button on the mouse is called _____.

4. _____ click is used to select an item.

5. _____ click is used to open an item.

C Write T for True or F for False.

1. A mouse has got three buttons.

☐

2. We cannot play games with a mouse on a computer.
3. Pressing mouse buttons is called clicking.
4. Arrow on a monitor is called object.
5. A mouse has two scroll wheels.

☐
☐
☐
☐

D Match the followings.

- | | |
|---|--|
| 1. A mouse has | (a) 'Pointing Device' |
| 2. Pressing the left button twice quickly | (b) three click buttons. |
| 3. Mouse is also called a | (c) select an item on the computer screen. |
| 4. Click the right button once | (d) is called double click. |
| 5. Single click is used to | (e) is called right click. |

E Fill the missing letters.

1. Select an item on a computer with a _____ O _____ S _____
2. Pressing mouse button once is called _____ I _____ G _____ E CLICK
3. Pressing mouse button twice is called D _____ U _____ L _____ CLICK
4. Arrow on the monitor is called mouse _____ O _____ N _____ E _____

F Answer the following questions.

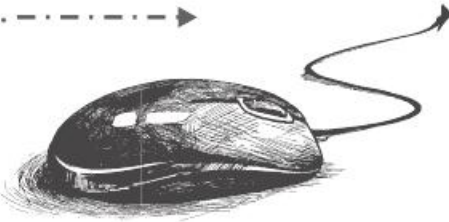

1. What is the use of mouse?

2. By which hand do you use mouse?

3. How many buttons does a mouse have?

4. What do you mean by a single click?

5. What is double click?

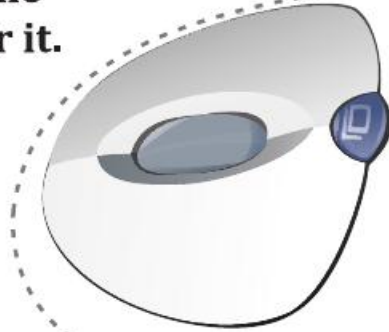

Worksheet

A Join the dots to draw the mouse label and colour it.

(NEP) Creative Learning

B Encircle the name in the word puzzle below:

Object, mouse, button, draw, click, scroll, wheel, page

A	E	M	C	L	I	C	K	W
D	D	O	B	J	E	C	T	H
R	B	U	T	T	O	N	F	E
A	C	S	C	R	O	L	L	E
W	B	E	P	A	G	E	G	L

In the mouse shown below, which button will you press for Left click? Write 'L' on the left button. Which button will you press for Right click? Write 'R' on the right button.

Where Computers Are Used Now days

Lesson at a Glance

- What you can do on a computer?
- Places where computer are used

What you can do on a computer?

A computer is a smart machine that help us to perform many different actions. It helps us to do our work with ease and comfort.

Games : You can play many games on your computer using your keyboard or mouse.

Movies : You can watch cartoons/movies and listen to music stored on your computer.

Reading & Writing : You can write stories and letters on your computer.

Paint : You can draw pictures on the computer with a mouse.

Calculation : You can solve sums and cross check your answer using the calculator on your computer.

Internet : With internet, you can do a lot of things like booking tickets, online shopping, video chat etc.

Places where computer are used

Now, let's learn where computers are used.

AT YOUR HOME

For playing games.

Watching cartoons and movies.

To listen poems and music.

IN YOUR SCHOOL

You can learn write/solve sums and make drawing etc.

IN THE OFFICE

To keep accounts

To keep records.

To type letters.

IN LIBRARY

To store a list of books and their location.

To keep the record of books.

IN THE SHOPS

To make bills.

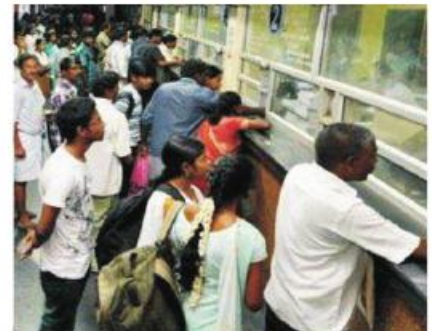

To keep record of goods.

AT RAILWAY STATION AND AIRPORT

To book tickets.

To tell the timings of trains and aeroplanes to passangers.

Must Know!

- One of the main uses of computers in education is the access to the internet for information search about any topic.

IN THE HOSPITALS

To treat and maintain details of patients

To help in operations.

To keep record of patients.

AT BANK

To keep various data of bank.

It stores the informations of account holders.

It maintain the details of your money.

It gives you money from ATM.

IN DESIGNING

Designing books, magazines and newspapers.

Designing advertisement.

Designing pamphlets.

Designing books on various topics.

IN DEFENSE

In launching missiles.

In making weapons, etc.

Tips for The Teacher

- Teacher should explain the students how to play games, draw and type on a computer.
- He should also tell them how it perform many things at one time.

WORK STATION

A Tick (✓) the correct option.

(NEP) Analytical Skills

1. A teacher teaches you computers in
(a) Home ☐ (b) School ☐ (c) Office ☐
2. A computer helps the doctor in
(a) Playing ☐ (b) Calculation ☐ (c) Operation ☐
3. A computer helps at Railways station for
(a) Booking Tickets ☐ (b) Making bills ☐ (c) Keep Records ☐
4. In office computer is used to
(a) Play games ☐ (b) Make bills ☐ (c) Keep accounts ☐
5. A computer is used to store a list of people and their accounts in
(a) Office ☐ (b) Bank ☐ (c) School ☐

B Fill in the blanks.

1. Computer helps in _____ information.
2. A computer solves _____ for you.
3. You can watch _____ on a computer.
4. Computer makes _____ on a shop.
5. Computer makes your work _____.

C Write T for True or F for False.

1. Computer helps in listening music and songs.
2. You can not play games on a computer.
3. A computer can do only one thing.
4. Computers are used to keep records.
5. Computer can solve your sums.

☐
☐
☐
☐
☐

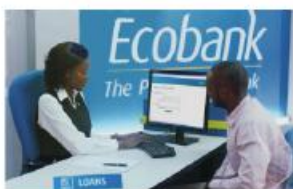

D Match the followings.

1.

(a) Home

2.

(b) Railway Station

3.

(c) School

4.

(d) Bank

5.

(e) Office

E Fill the missing letters.

1. On computer you can watch _____ A _____ T _____ N _____
2. On computer you can play G _____ E _____

3. On computer you can make _____ RA _____ N _____
4. Computer can solve your _____ U _____
5. On computer you can write A _____ P _____ A _____ E _____ S _____

F Answer the following questions.

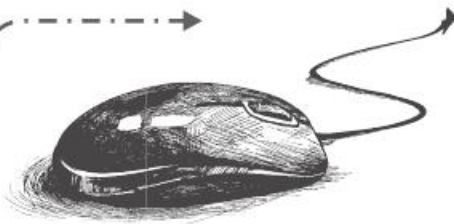

1. What is the use of computer at railway station?

2. What can you do easily on a computer at home?

3. What type of work is done on computer in office?

4. Name different place where you have seen the computer.

5. What is the use of compute in schools?

Worksheet

A Identify and write the name of the place where computers are used.

(NEP) Creative Learning

B Tick (✓) the name of the person who is using the computer.

- ☐ teacher
- ☐ nurse
- ☐ banker

- ☐ student
- ☐ nurse
- ☐ teacher

- ☐ teacher
- ☐ nurse
- ☐ designer

- ☐ banker
- ☐ salesman
- ☐ officer

- ☐ banker
- ☐ nurse
- ☐ shopkeeper

- ☐ teacher
- ☐ soldier
- ☐ salesman

How to Turn On and Off Computer?

Lesson at a Glance

- How to start your computer
- How to shut down your computer
- What is desktop

This is very important to learn the right way to Turn On a computer to work on it.

How to start your computer

Read carefully and follow the steps to open a computer.

STEP 1:

First Switch 'ON' main power supply.

STEP 2:

Switch 'ON' the UPS power button.

STEP 3:

Press the System Unit (CPU) power button.

STEP 4: Switch 'ON' the monitor power button.
Wait and see till your screen look like this.

What is desktop

You will see the screen as given when your computer is turned on. It is called desktop.

Start button: Click on this button to go to the list of programs on the computer.

Taskbar: This is bar at the bottom of the desktop and shows important things like start button, date, time etc.

Icons: Important programs are kept on the desktop, like This PC, Recycle bin etc. These small symbols are called icons.

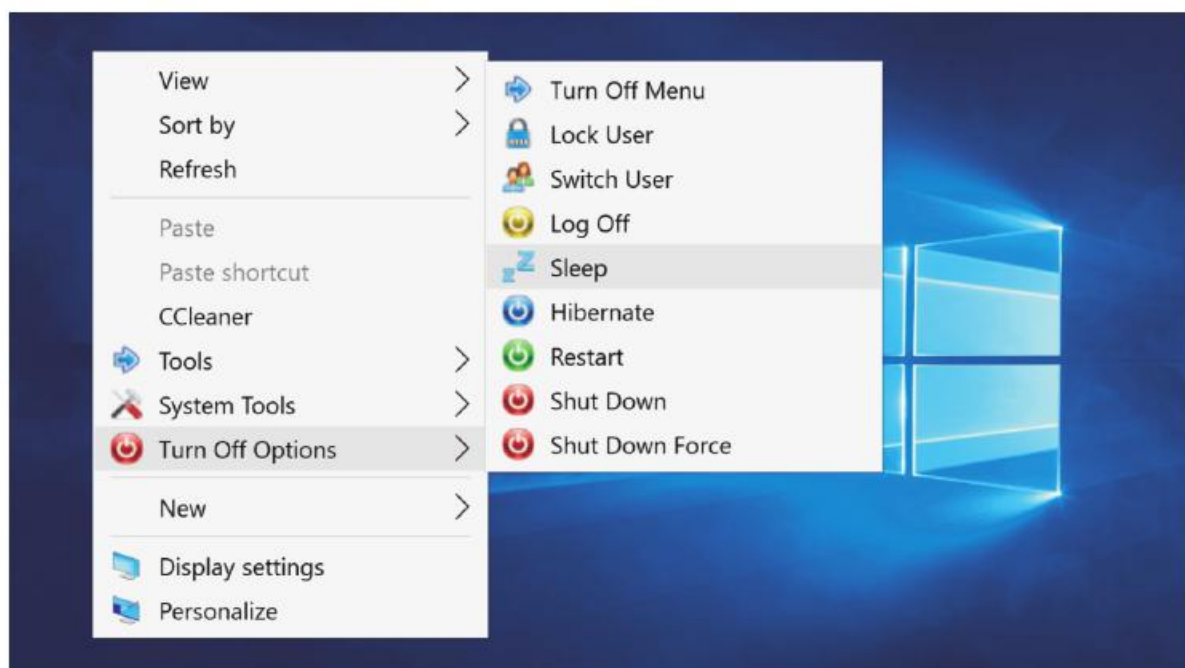

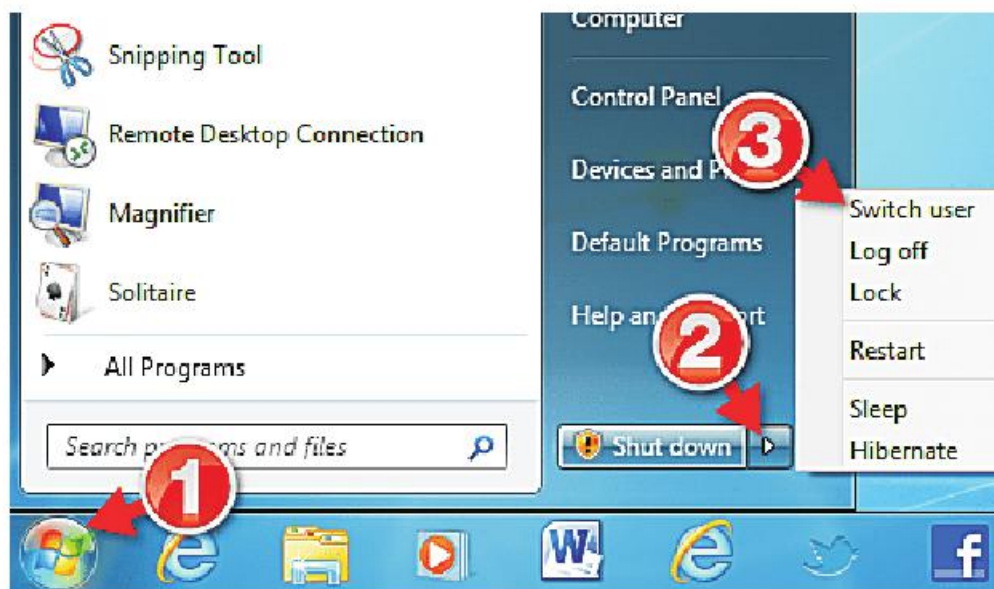

How to shutdown your computer

After finishing your work on the computer, you can shut it down by following these steps :

STEP 1:

Click on the Start button on the desktop with the help of mouse.

STEP 2:

Click on the Turn Off computer with the help of mouse.

STEP 3:

Switch off the monitor by pressing the power button.

STEP 4:

After switching off the monitor button, switch off the power button on the UPS.

STEP 5:

At last, switch off the power switch.

Must Know!

- If you do not shut the computer down properly, it might create errors.
- Start button is present on the left corner of computer screen.

Tips for The Teacher

- Teacher should explain the students how to switch 'ON' and 'OFF' the computer.
- Try practicing to open and close some of the programs like: Notepad, WordPad, Calculator etc.
- Play some computer game or draw same pictures.

A Tick (✓) the correct option.

(NEP) Analytical Skills

1. To open a computer, first switch 'ON'

(a) Monitor button ☐ (b) Power button ☐ (c) CPU button ☐

2. To close the computer, first switch 'OFF'

(a) Monitor button ☐ (b) UPS button ☐ (c) CPU button ☐

3. The screen appears on the monitor

(a) Desktop ☐ (b) Palmtop ☐ (c) Display ☐

4. Switch 'OFF' of the computers means

(a) Switching ☐ (b) Shut down ☐ (c) Closing ☐

B Fill in the blanks.

1. Switch on the _____ switch is the first step to start a computer.

2. Switch on the _____ after switching on the monitor to start a computer.

3. The screen appears after starting of the computer is called _____.

4. Small pictures on the desktop are called _____.

C Write T for True or F for False.

1. To close the computer first turn 'OFF' the power button. ☐

2. To open the computer first turn 'ON' the monitor button. ☐

3. Monitor is known as visual display unit. ☐

4. Icons are shortcuts of the programs. ☐

D Unscramble the words in the left column and then match them with those in the right column:

1. ODUTWHSN

(a) Desktop

2. TORNIMO

(b) Icons

3. PEODTKS

(c) Switch

4. CISNO

(d) Monitor

5. WSHCTI

(e) Shutdown

E Answer the following questions.

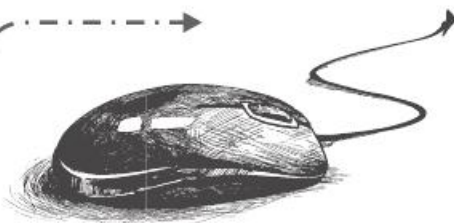

1. What do you mean by UPS?

2. What is CPU?

3. What is a Desktop?

4. What are Icons?

5. What do you mean by Startup?

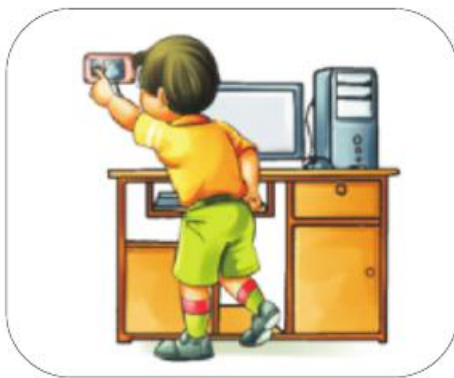

Worksheet

A Write down the steps to start a computer in the space given below:

(NEP) Creative Learning

B In the pictures given below, Rahul is shutting down his computer. Write the correct steps to shut down the computer.

Introduction to Microsoft Paint

Lesson at a Glance

- How to open a Paint Program?
- Drawing Tools
- Interface with Paint Window

Just like your drawing book, the computer also has a program in which you draw and color pictures using different tools like :

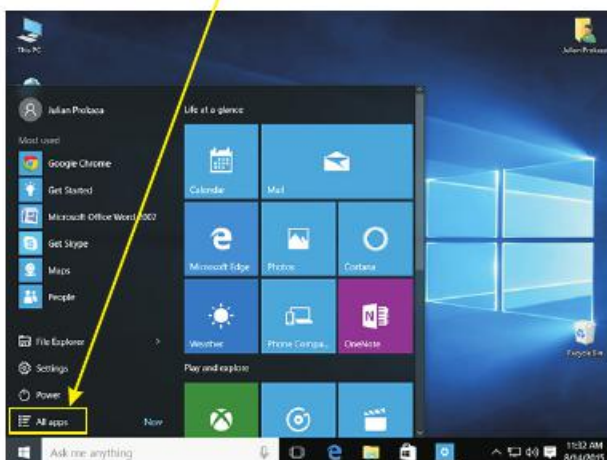

It is called a Paint program. Mouse is used in Paint to perform actions like pointing, clicking and dragging.

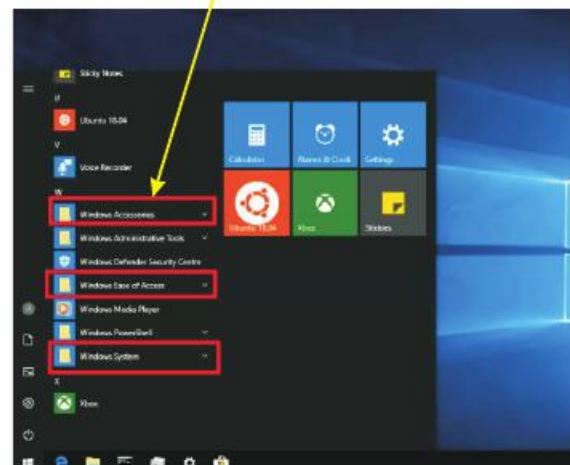

How to open a Paint Program?

To open the Paint program on your computer, follow the steps :

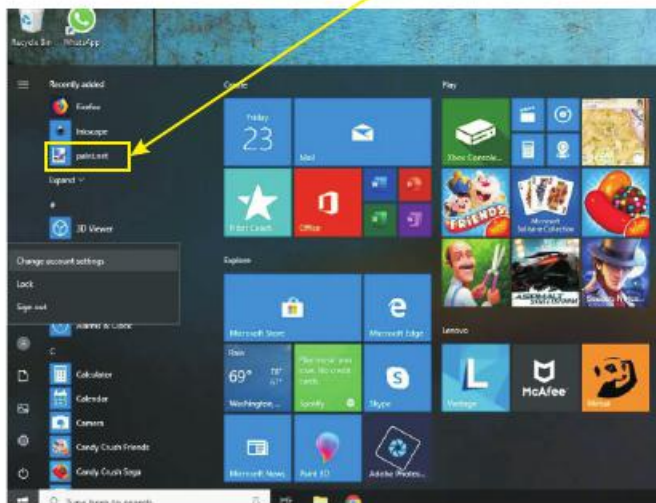

1. Click "All apps"

2. Click "Windows Accessories"

3. Double-click the “Microsoft Paint” icon

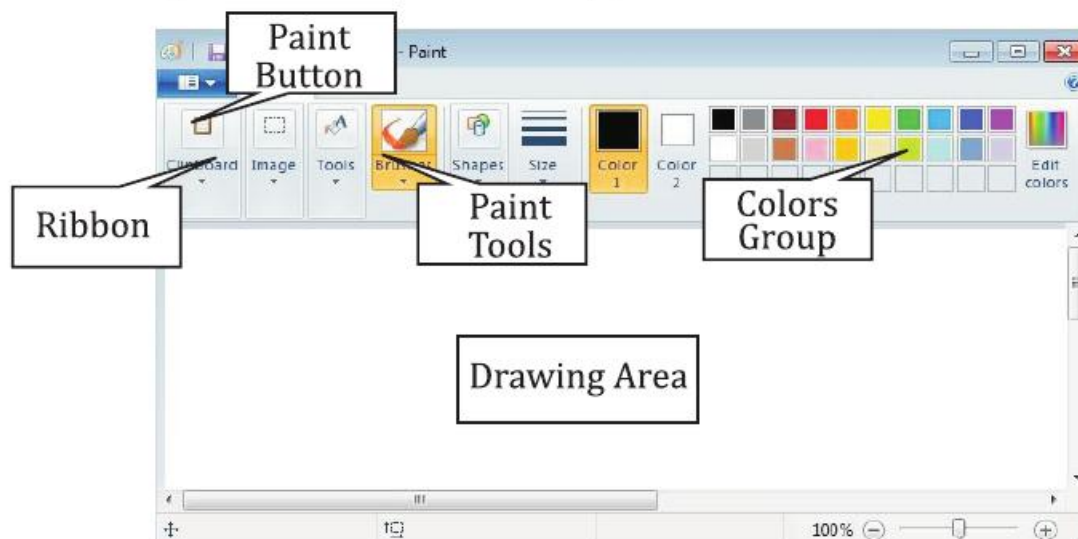

THINK
OVER

How many tools are in tool box?

Interface with Paint Window

The following Paint window will appear on the screen :

Ribbon: Ribbon area contains tools and colors which help us to draw and color.

Paint Tools: Paint tools help us to draw, make corrections in the drawings and color the drawings.

Colors Group: From the Colors group we can select colors to fill in our drawings.

Drawing Area: This is the area where we work to draw and color our pictures or drawings.

Paint Button: Paint button has the options to start a new drawing, save the drawing or printing the drawing, etc.

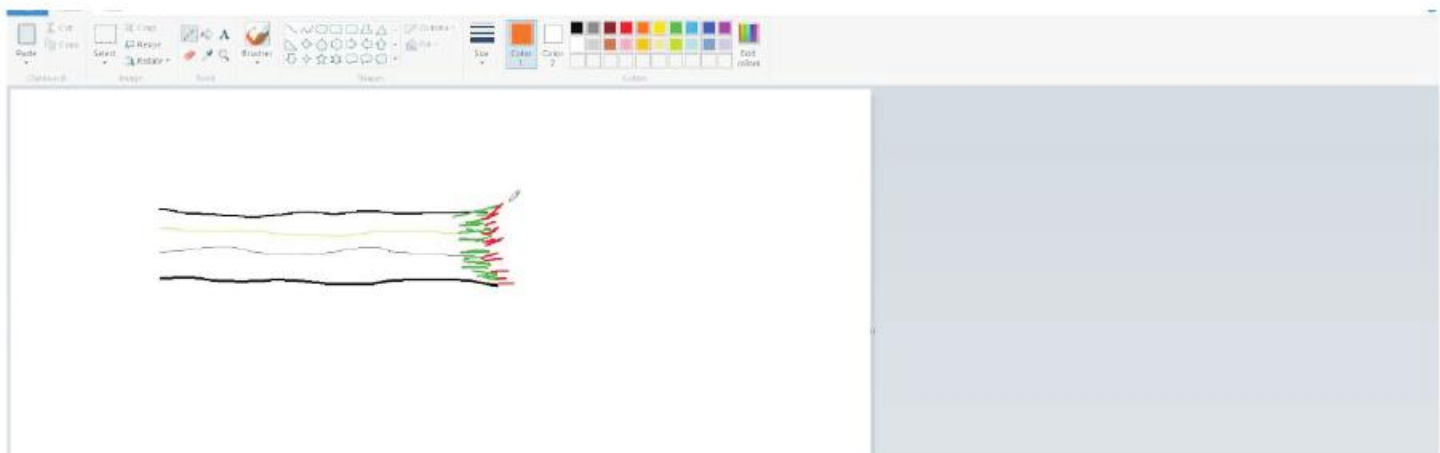

Drawing Tools

Now we work by clicking and dragging the mouse for drawing and coloring in Paint.

PENCIL TOOL

Pencil Tool is used to draw freehand drawings.

1. Click on the Pencil tool.
2. Select the size of the pencil.
3. Select the color.
4. Go to drawing area and draw whatever you like.

ERASER TOOL

Eraser Tool is used to make corrections in the drawing.

1. Click on the Eraser tool.
2. Select the size of the eraser.
3. Hold the left mouse button and drag it on the incorrect area of your drawing.

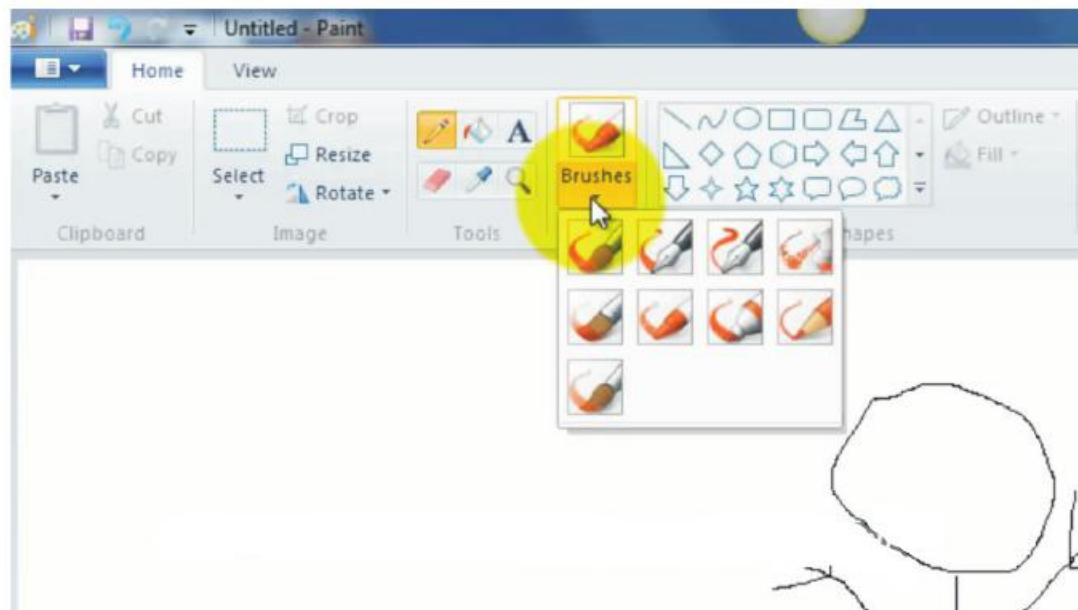

BRUSH TOOL

Brushes Tool is used to draw thick and thin lines like the real paint brushes.

1. Click on the Brushes tool and select your brush type.
2. Select the size of the brush.
3. Select the color of the brush.
4. Hold the left mouse button and move your brush in the drawing area.

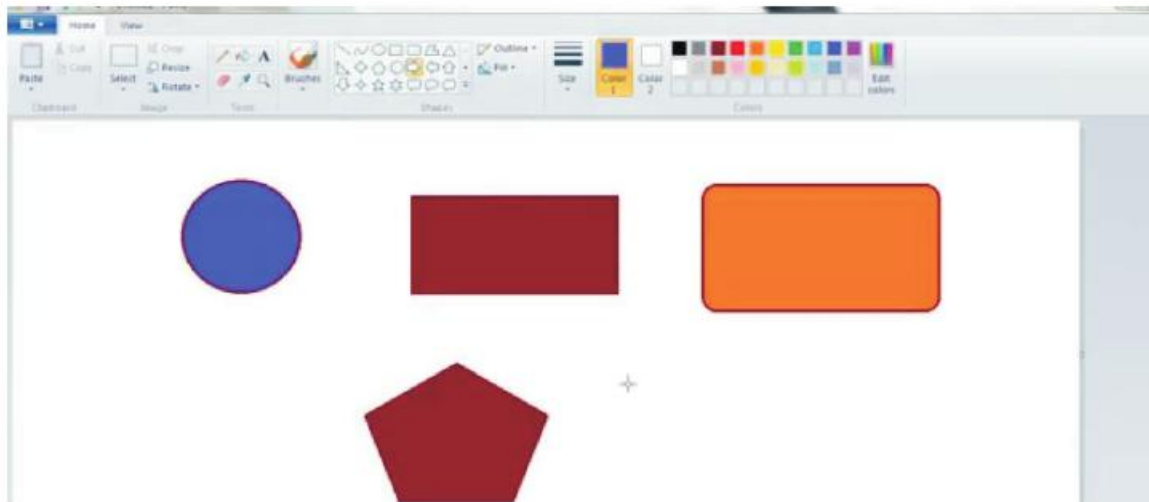

DRAWING SHAPES

You can draw shapes like square, line, circle, etc. using Shapes tools.

1. Click on Shapes group and choose the shape you want to draw.
2. Select the color of the shape.
3. Hold the left mouse button and drag to draw the selected shape.

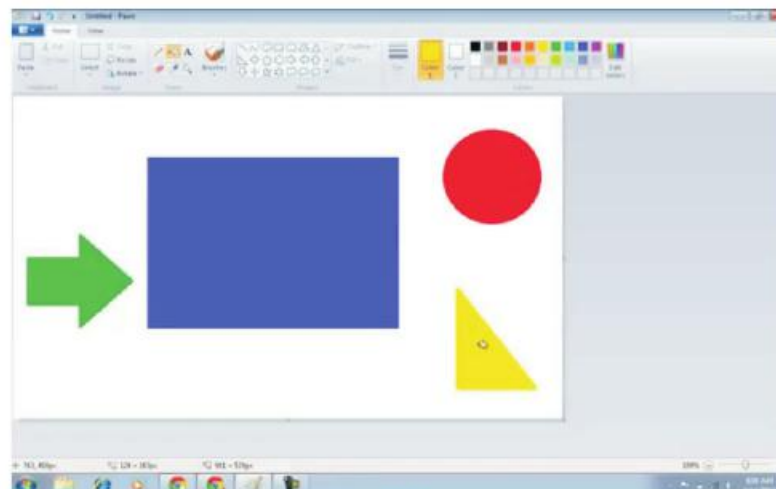

FILL WITH COLOR TOOL

Fill with color Tool helps us to fill colors in a drawing.

1. Click on the Fill with Color Tool.
2. Select the color to be filled in the drawing.
3. Bring the color bucket in the closed area in which color is to be filled.
4. Click left mouse button. The selected color will spread in that area.

Tips for The Teacher

Teacher should help the students to understand which tool is more suitable and easy to use while creating drawing in Paint.

WORK STATION

A Tick (✓) the correct option.

(NEP) Analytical Skills

Fill the missing words:

1. D _ A _ G _ N _
2. L _ N _
3. _ R _ S _
4. P _ I _ T
5. E _ A _ E _

Identify and name the tools that are used to draw the given picture in paint :

Find and circle the names of paint tools in the grid.

P	A	U	S	T	R	A	E	R	A	S	E	R
E	S	D	E	U	I	B	R	U	S	H	E	S
N	I	E	L	I	B	J	D	M	C	H	V	G
C	A	F	R	I	B	A	N	I	J	K	T	F
I	A	M	E	R	O	C	A	O	L	M	A	S
L	K	P	O	Q	N	O	N	P	A	B	R	U
H	A	M	A	G	N	I	F	I	E	R	C	W
E	H	P	A	M	E	N	U	B	A	R	T	P
R	I	S	R	C	A	T	L	A	N	T	I	C
N	E	T	I	T	L	E	B	A	R	U	C	A
D	R	A	W	I	N	G	A	R	E	A	O	V

Rearrange the jumbled letters to make a meaningful word:

U	B	S	H	R

R	A	E	S	R	E

R	C	T	E	N	A	L	E	G

I	N	L	E

S	A	H	E	P

A	O	V	L
