Preface...

Children learn from everything they see, hear and do. They make no distinction between things done for fun and those adults consider educational. This is why learning through play is always effective and more beneficial. This general knowledge series tries to put this idea to practical use by blending fun with informative content. Carefully graded and loaded with up-to-date information, Current General Knowledge goes a step further by introducing values and life skills in an appealing way. The exercises are both fun and stimulating.

Another striking feature of Current General Knowledge is its attractive and pleasing design, integrating text, photographs, motifs, infographics and other visual elements according to tasteful and logical aesthetic principles.

The creators of this series are confident that parents and educators will find Current General Knowledge a practical and wholesome general knowledge package. We are also quite sure that children will find these books irresistible – in spite of their being textbooks.
