FOCUS AREAS OF NEP 2020

Created with the new dimension of joyful learning based on **National Education Policy, 2020**.

Each chapter begins with **Put into Focus** includes concept

Key Words is a list of difficult words to help learners to understand the topics.

Cognitive Skills gives descriptive writing tasks to develop the written skills of the learners.

Critical Thinking is the ability to examine learner's thoughts and feelings to make decisions based on their life.

Observing Skills includes learning process whereby students learn with their own senses.

Communication Skills includes discussion which is generally a face-to-face interaction promotes confidence level.

Linking Chain increases the ability of students to excel in two or more different subjects.

Activity includes varied activities in which learners construct and demonstrate understanding through an art form.

Computational Thinking provides learners problem solving technique.

Project work is the ability to do effective work together with others by doing some experiments.

UNIT 1 Food and Fitness

- | | |
|----------------------------|----|
| 1. We Need Food | 5 |
| 2. Keeping Fit and Healthy | 10 |
| 3. Our Magical Body | 15 |

UNIT 2 Our Environment

- | | |
|--------------------------|----|
| 4. Air and Water | 21 |
| 5. Web of Life | 26 |
| 6. Plants | 29 |
| 7. New Plants from Seeds | 34 |
| 8. Food from Plants | 40 |

UNIT 3 Living Creatures

- | | |
|----------------------------------|----|
| 9. We Love Animals | 45 |
| 10. Food and Shelter for Animals | 49 |
| 11. Birds | 55 |
| 12. Our Houses | 59 |

UNIT 4 Social Life

- | | |
|------------------|----|
| 13. Pollution | 64 |
| 14. Seasons | 69 |
| 15. Safety Rules | 74 |
| Test Paper-1 | 79 |
| Test Paper-2 | 80 |

PREFACE

Science is an integral part of our lives. It is, therefore imperative that we help our children to learn the importance of science in such a way that it reflects through their attitude. This series '**Integrated Science**' aims to achieve the objective and to fulfil the guidelines of National Education Policy 2020. The series has been written in such a way as to kindle a genuine interest and motivation in a child to develop a scientific attitude and problem solving abilities from an early age.

This series focuses on the development of cognitive, effective and psychomotor skills through process based, activity-oriented learning, rather than through rote memorization of content-efforts have been made to help children in learning without burdening them, through simple text, child-friendly illustrations, pictures and ample activities. The aim is to encourage them to observe, interact, explore the world around them and learn by doing. Based on the experience gained through exploration, children are further guided and encouraged to **construct knowledge** in order to strengthen the foundation of their learning as well as develop language skills.

Wherever possible, the books of this series instil into children '**Values**' such as the importance of conserving nature, keeping health etc.

1

We Need Food

Food gives us energy to work. Our body is like a machine. Like all machines, we also need energy to work.

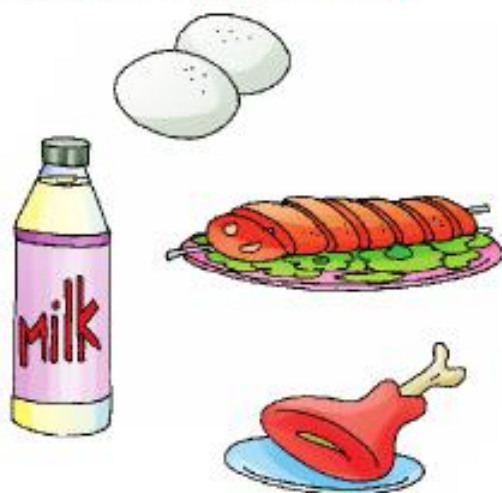

From where do we get this energy?

We get this energy from the food we eat.

We get this food from

- ▶ Animals
- ▶ Plants

Food from animals

We get meat, eggs, milk and fish from animals.

We make butter, cheese, ice-cream from milk.

Food from plants

We get fruits from plants, like **banana**, **apple**, **grapes**, **mango** etc.

We get vegetables from plants like **lady finger**, **potatoes**, **cauliflower**, **brinjal** etc.

We also get **food grains** from plants like **rice**, **wheat** and **maize**.

Put into Focus

- ▶ About food
- ▶ Sources to get food
- ▶ Meals of the day
- ▶ Good food habits

Know More

Milk is a complete food for babies. We should also drink at least two glasses of milk daily.

Meals of the day

We eat three meals in a day.

We must eat our meals at fixed period of time.

Breakfast

Breakfast is referred as the morning meal.

We should always have a glass of milk in our breakfast.

Lunch

We take lunch in the afternoon.

We should eat rice, chapatis, dal, curd, vegetables and salad for lunch.

Dinner

We take dinner at night.

Dinner should be light.

We should have a glass of milk in our dinner.

We should eat our meal at the right time. It keeps us healthy and strong.

Good food habits

Always follow good food habits :

- ▶ Eat slowly and chew the food well.
- ▶ Drink plenty of water everyday.
- ▶ Do not talk or watch T.V while eating.

- ▶ Eat a lot of salads and green vegetables.
- ▶ Wash your hands before and after every meal.
- ▶ Do not waste food.
- ▶ Do not overeat.

KEY WORDS

Food: Food is what people and animals eat.

Energy: Energy is the ability and strength to do active physical things.

Meals: Meal is the food that you eat in breakfast, lunch or dinner.

Habit: A habit is something that you do often or regularly.

OVERVIEW ON THE CHAPTER

- ▶ We all need food to live and grow.
- ▶ We get food from plants and animals.
- ▶ We eat three meals in a day i.e. breakfast, lunch and dinner.
- ▶ We all should follow good food habits.

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. We make butter from _____.
 (a) fruit ☐ (b) milk ☐ (c) vegetables ☐
2. The meal that we take in the morning is called _____.
 (a) dinner ☐ (b) breakfast ☐ (c) lunch ☐

3. We eat _____ meals in a day.
(a) two (b) three (c) four

Fill in the blanks :

1. We have lunch in the _____.
2. We make cheese from _____.
3. Food gives us energy to work and _____.
4. We get fruits and vegetables from _____.

Complete the following sentences :

1.

	We eat	
breakfast in the	lunch in the	dinner at
_____	_____	_____
2.

	We eat food because	
it gives us	it makes us	it helps us
_____	_____	_____

Answer the following questions :

1. Define food.

2. From where do we get food?

3. Name the three meals of the day.

4. Write any five good food habits.

CRITICAL THINKING

Say **Yes** or **No**.

(Self Awareness)

1. Too many sweets, toffees and chocolates can spoil our teeth.
2. Should we waste food?
3. Should we over eat?

☐
☐
☐

COMMUNICATION SKILLS

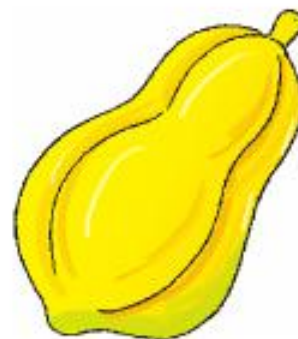

Write any three food items that we should not eat or have.

(Discussion)

OBSERVING SKILLS

Look at the pictures and name them.

(Perceptual Thinking)

2

Keeping Fit and Healthy

Good health keeps us active, strong and fit. We should always follow the rules for good health and hygiene.

- ▶ Exercise daily
- ▶ Keep yourself clean
- ▶ Have good food habits
- ▶ Sleep well

Exercise

- ▶ It is good to exercise everyday. **Exercise** keeps us fit and healthy.

- ▶ We should go for a morning walk daily.

- ▶ Playing **outdoor games** for example cricket, basketball keeps us **healthy** and strong.

Put into Focus

- ▶ How to keep our health good.
- ▶ Good habits to be followed in order to remain fit

Keeping clean

- ▶ We should wash our hands before and after every meal.

Know More

We must clean our nose with a clean handkerchief.

- ▶ We should wear clean clothes.

- ▶ We should keep our nails short and clean.

- ▶ We should brush our teeth in the morning and at night everyday.

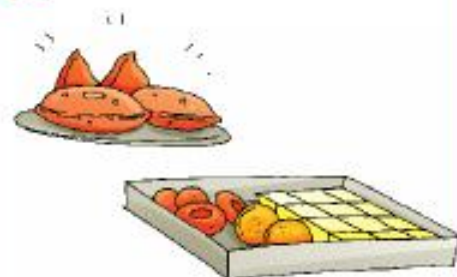

- ▶ We should comb and oil our hair properly.

Good food habits

- ▶ We should not eat too much of **fried** food and sweets. It makes us fat.

X

- ▶ We must drink plenty of water everyday. Water also keeps us healthy.

We should **not** eat :

- ▶ Uncovered food
- ▶ Stale food
- ▶ Food bought from **roadside vendors**.

IT MAKES US SICK

Sleep well

We must go to bed early.

We must wake up early too.

We must sleep for at least 8 to 10 hours everyday.

Follow it !

We must keep ourselves healthy, fit and active.

Follow it !

We should never cover our face while sleeping.

KEY WORDS

Exercise: Moving body energetically in order to get fit.

Comb: Use to tidy your hair.

Fried: Food that cooked in hot fat or oil.

Sleep: State of rest in which your eyes are closed.

OVERVIEW ON THE CHAPTER

- ▶ We should follow the rules for good health and hygiene.
- ▶ We should always keep our body clean.
- ▶ We should do exercise everyday.
- ▶ We must sleep well.

COGNITIVE SKILLS

Multiple choice questions :

(Learning by doing)

Tick the (✓) correct option.

1. If our hair is dry, we should apply _____.
(a) soap ☐ (b) oil ☐ (c) water ☐
2. We must sleep for at least _____ hours.
(a) eight ☐ (b) four ☐ (c) fifteen ☐
3. We must clean our nose with our
(a) shirt ☐ (b) handkerchief ☐ (c) brush ☐

Fill in the blanks :

1. We should wear _____ clothes.
2. We must keep our nails _____ and _____.
3. Food purchased from roadside vendors makes us _____.
4. We must wake up _____ in the morning.
5. We must keep ourselves _____, _____ and _____.

Answer the following questions :

1. Define good health.

2. Write four rules we should follow for good health and hygiene.

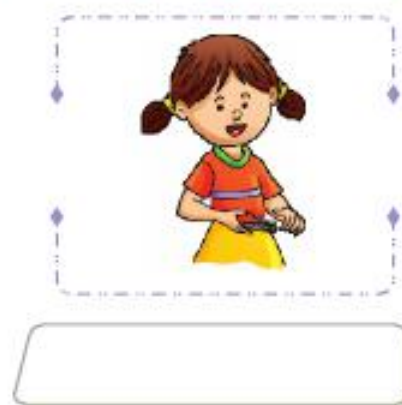

(a) _____ (b) _____

(c) _____ (d) _____

OBSERVING SKILLS

Look at these pictures. What are these girls doing?

(Perceptual Thinking)

COMMUNICATION SKILLS

Circle the odd one out and tell why they are odd :

(Discussion)

1. brushing teeth

washing hands

cricket

taking bath

2. milk

chair

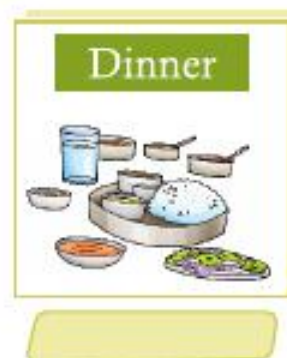

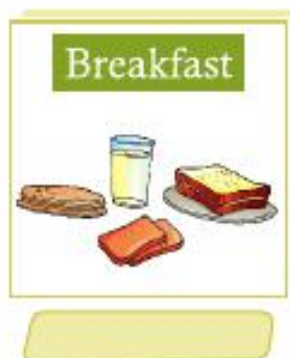

fruits

eggs

CRITICAL THINKING

Tell the time at which we should take these meals.

(Self Awareness)

3

Our Magical Body

Our **body** is simply magical. It can do so many wonderful things.

Each organ in our body has a special function to perform.

We are not able to see all the parts of our body.

Those parts which we cannot see are called the **internal organs** and the parts which we can see are the **external organs**.

Internal organs

Organs which are inside our body are known

Human body
as internal organs.

These are the organs that we cannot see.

Our body is made up of many internal organs.

Each part has a job to do.

Important internal organs

Heart

Heart pumps blood to the whole body.

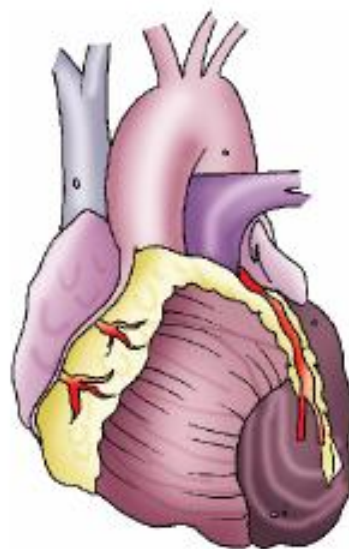

Put into Focus

- ▶ Our body
- ▶ Internal and external organs
- ▶ Sense Organs

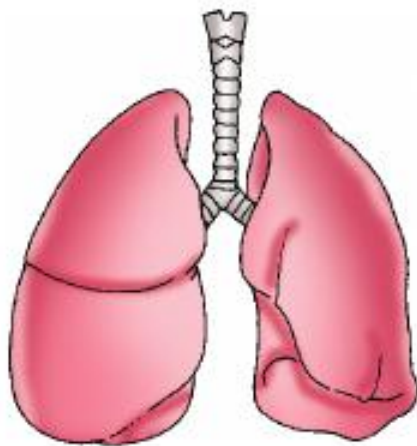

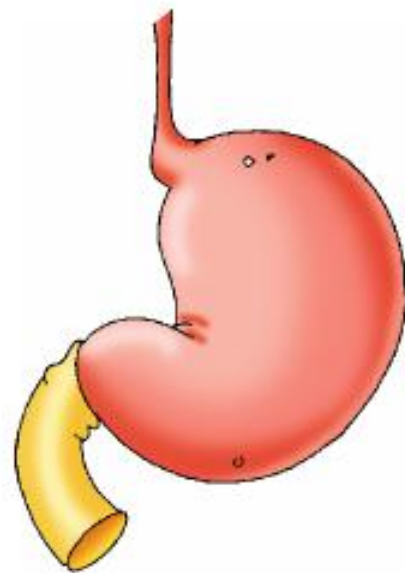

Know More

Parts of the body are also known as organs.

Stomach

Stomach stores the food and helps in digestion.

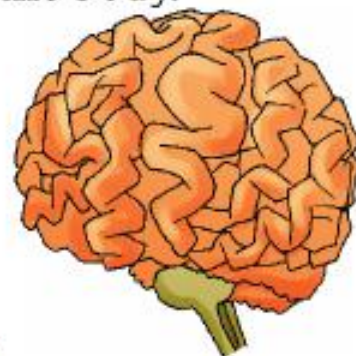

Lungs

Lungs help us to breathe.
They supply oxygen to the body.

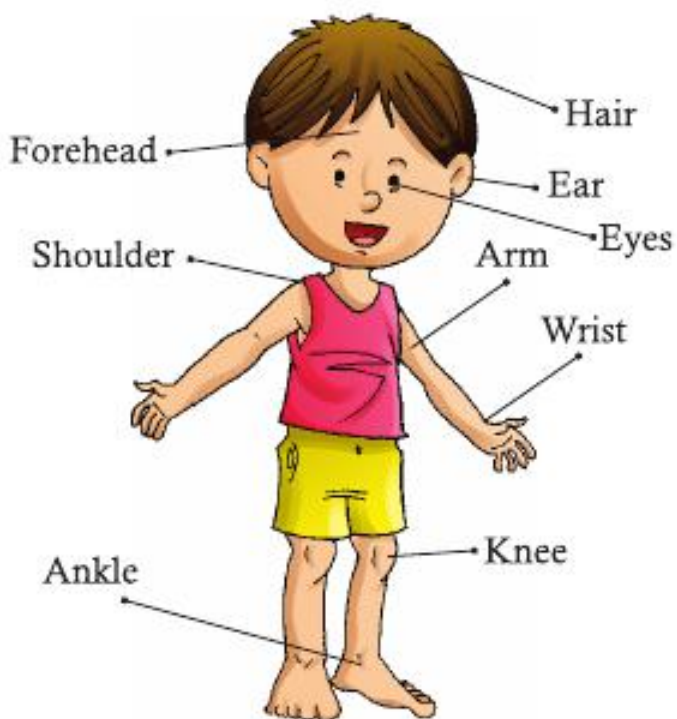

Brain

Brain helps us to think.
It tells other parts of the body what to do.

Know More

Some more internal organs, and tissues that we are not able to see are nerves, bones and muscles.

External organs

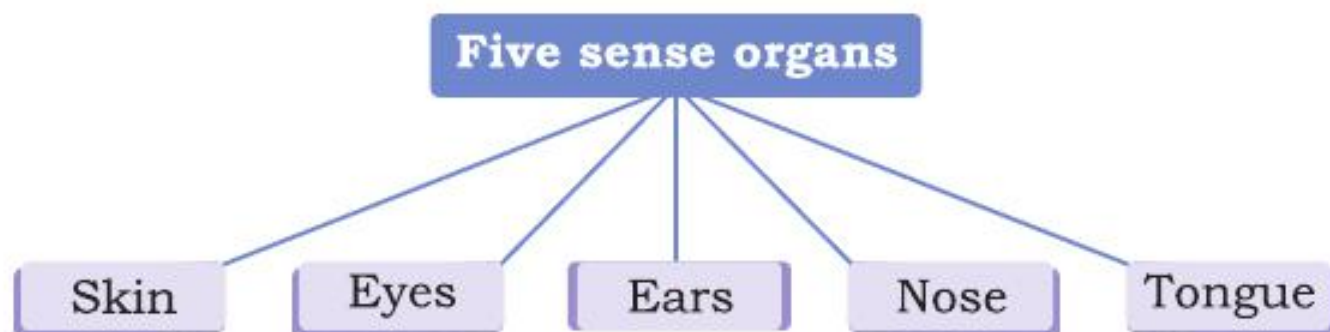

Organs which are outside our body are known as **external organs**.

Shoulders, arms, wrists, ankles, hair, forehead, ears, knees are our external organs.

These are organs that we can see.

Sense organs

We have five sense organs.

Skin

We feel with our skin.

We can feel hot and cold, smooth and rough.

Skin helps us to feel everything around us.

Eyes

We can see with our eyes.

We can see near and far, shapes and colours, light and dark.

Ears

We hear with our ears.

We can hear loud and soft sounds, pleasant and unpleasant sounds.

If a sound is too loud, it can hurt our ears.

Nose

We smell with our nose.

We can smell aromas, fumes and the too things that do not smell good.

We also breathe with our nose.

Tongue

We taste with our tongue.

We can taste sweet, salty, sour and bitter things.

Know More

Tongue helps us to talk and make sounds.

KEY WORDS

Body: It includes all physical parts like head, arms and legs.

External organs: It is used to indicate the organs which are outside our body.

Internal organs: It is used to indicate the organs which are inside our body.

Tissues: It consists of cells that are similar to each other in appearance and that have the same function.

Sense organs: These are the parts of our body that enable us to be aware of things around us.

OVERVIEW ON THE CHAPTER

- ▶ Our body has two types of organs : External and Internal.
- ▶ Brain, lungs, stomach and heart are our internal organs.
- ▶ Shoulders, arms, wrists, ankles are our external organs.
- ▶ The five sense organs of the human body are eyes, ears, nose, tongue and skin.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

- Parts of the body that we cannot see are known as _____.
(a) external organs ☐ (b) internal organs ☐ (c) both of them ☐
- Parts of the body that we can see are known as _____.
(a) external organs ☐ (b) internal organs ☐ (c) both of them ☐
- We can see with our _____.
(a) skin ☐ (b) eyes ☐ (c) nose ☐
- _____ pumps blood to the whole body.
(a) heart ☐ (b) stomach ☐ (c) lungs ☐

Match the followings :

- | | |
|-----------|--------------------|
| 1. Brain | (a) hold |
| 2. Skin | (b) smell |
| 3. Nose | (c) touch |
| 4. Hand | (d) solve problems |
| 5. Ear | (e) walk |
| 6. Leg | (f) breathe |
| 7. Tongue | (g) hear |
| 8. Lungs | (h) taste |

Answer the following questions :

- Why our body is referred as 'magical'?

- Name two types of organs present in our body.

3. Name five sense organs in human body.

ACTIVITY

Can you find the names of at least ten body parts hidden in the grid below. (Creativity)

E	S	B	O	L	N	C	H	F	S
O	K	R	E	E	O	T	A	Y	T
C	I	A	M	G	S	K	N	E	O
L	N	I	H	S	E	I	D	Y	M
U	D	N	N	B	X	D	I	E	A
N	A	I	H	A	I	R	H	S	C
G	G	P	S	E	A	R	S	F	H
S	R	F	I	N	G	E	R	S	A

CRITICAL THINKING

Tick (✓) the correct options.

(Self-Awareness)

- Our body has _____ bones. (205/206)
- There is no _____ in the elephant's trunk. (bone/ears)
- There are spots on our tongue called _____ which help us to taste. (ear buds/taste buds)

OBSERVING SKILLS

(Perceptual Thinking)

Look at the following organs of the human body. Write external or internal under each.

4

Air and Water

Air is all around us.

All living beings need air to breathe.

We breathe in **oxygen** and breathe out **carbon-dioxide**.

We cannot live without air.

Uses of air

- ▶ We need fresh and clean air to breathe and to stay fit.
- ▶ We need air to make a fire.
- ▶ We need air to fill tyres and balloons.

We often do such things that make the air around us dirty.

When people breathe **impure** air they fall ill.

Put into Focus

- ▶ Air and its uses
- ▶ Water and its uses

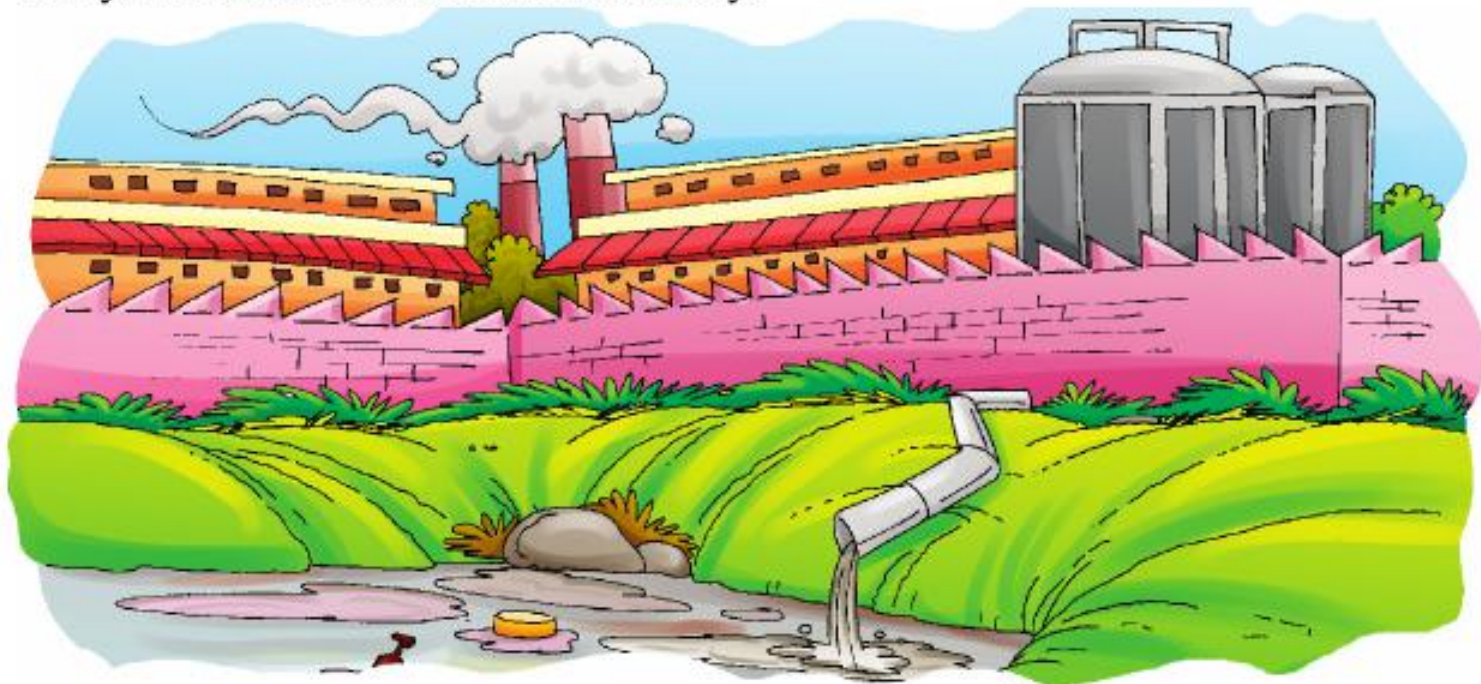

Know More!

We can also write oxygen as O_2 and carbon dioxide as CO_2 .

What makes the air dirty?

Harmful gases produced by cars, buses and other vehicles make the air dirty. Factories too make the air dirty.

To breath clean air

- We can:
- ▶ Plant more trees.
 - ▶ Stop cutting down trees.
 - ▶ Walk for short distances.

Know More

Trees keep on taking in impure air and giving out pure air.

Water

All living things need **water**. Humans, animals and plants cannot live for more than a few days without water.

Uses of water

- ▶ We need water to bath.
- ▶ We need water to drink and cook.
- ▶ We need water for washing utensils, clothes and many other things.

Sources of water

We get water from rain, rivers, lakes, ponds, wells and seas.

- ▶ Rain always fall as drops of water.

- ▶ A small collection of water is called a **pond**.

Know More

Water is precious. We must not waste water.

- ▶ People in villages get water from the well.

- ▶ A large collection of water is called a **lake**.

- ▶ **Seas** and **oceans** are very large areas of water. Sea water is salty. We cannot drink it.

- ▶ A river has flowing water.
Therefore, the earth is our home. We must help to make it clean and healthy.

KEY WORDS

Air: Air is the mixture of gases which forms the Earth's atmosphere.

Oxygen: Oxygen is a colourless gas that is needed to breathe.

Carbon dioxide: Carbon dioxide is a gas. It is produced when animals and people breathe out.

Impure: A substance that is impure is not of good quality.

Water: Water is a clear thin liquid that has no colour or taste.

OVERVIEW ON THE CHAPTER

- ▶ Air is all around us and we cannot live without air.
- ▶ We should try to keep our air clean.
- ▶ Water is needed by all of us.
- ▶ We need water for various purposes like drinking, cooking, washing utensils etc.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. We need _____ to make fire.

(a) air

(b) water

(c) land

2. Walk for _____ distances.

(a) short

(b) long

(c) very short

3. _____ always fall as drops of water.

(a) pond

(b) well

(c) rain

4. We need water to _____ and _____.

(a) drink

(b) cook

(c) both of them

Fill in the blanks :

1. We need _____ and _____ air to stay fit.
2. _____ more trees.
3. _____ cutting down trees.
4. A large collection of water is called a _____.

Write two uses of :

1. Water– (a) _____
(b) _____
2. Air – (a) _____
(b) _____

Answer the following questions :

1. Why do we need air?

2. What makes the air dirty?

3. Why do we need water?

4. Name any three sources of water.

COMMUNICATION SKILLS

Find out the names of the following with the help of your teacher.

(Discussion)

1. The longest river in the world _____
2. A famous holy river of India _____

5

Web of Life

We know that plants and animals are **living things**.

Soil, air, water and sunlight are **non-living things**.

We also need clothes to wear and houses for shelter.

Look at the following picture, we can see many things in this.

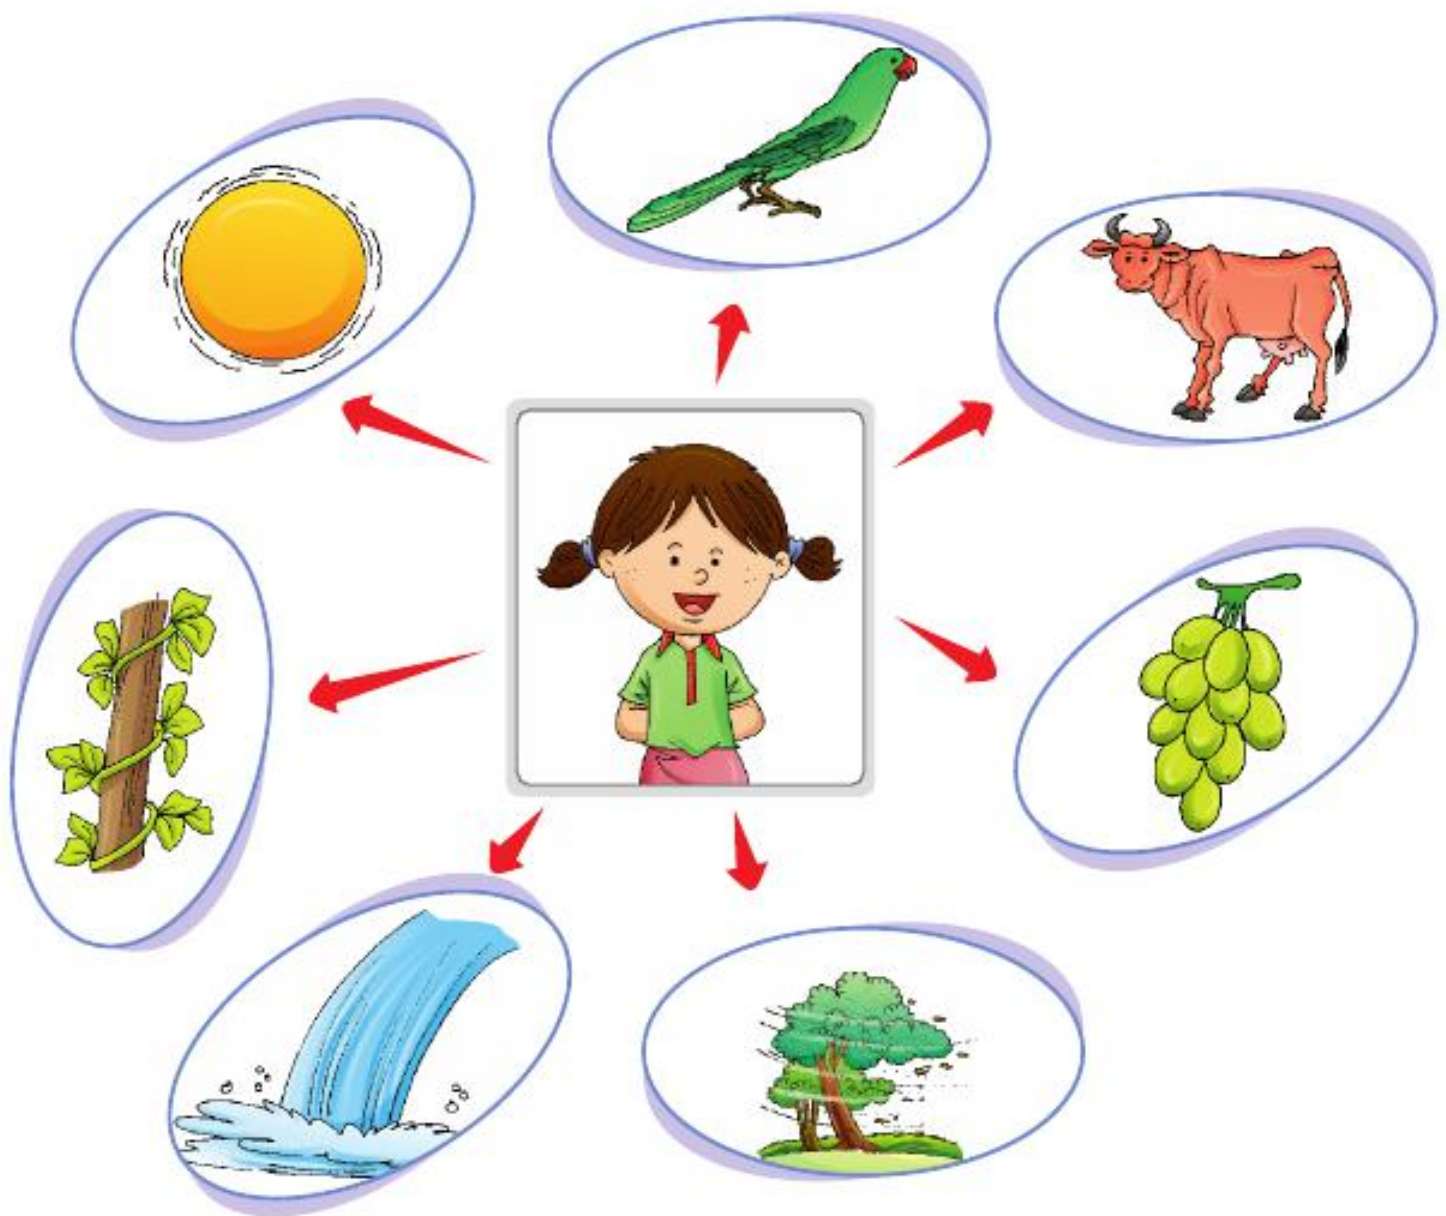

Put into Focus

- ▶ Living things
- ▶ Non-living things

All living and non-living things are linked with one another.

We all need food to live.

We get food from plants and animals.

Look at above picture carefully. Riya is in the centre of the web. The given pictures show all those things which she needs to live. So, we conclude that all living things and non-living things depend on one another.

KEY WORDS

Living things : Things which have life are known as living things.

Non-living things : Things which do not have life are known as non-living things.

OVERVIEW ON THE CHAPTER

- ▶ Plants and animals are living things.
- ▶ Soil, air and water are non-living things.
- ▶ All living and non-living things are linked with one another.

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. Plants and animals are _____ things.

(a) living

(b) non-living

(c) man-made

2. Soil and water are _____ things.

(a) living

(b) non-living

(c) man-made

3. Plants need _____ to make food.

(a) wood

(b) vegetables

(c) sunlight

Answer the following questions :

1. Name two living things.

2. Name two non-living things.

CRITICAL THINKING

(Self-Awareness)

1. What is needed to make bread?

(a) rice

(b) wheat

(c) grams

2. Frog is a

(a) living thing

(b) non-living thing

(c) both of them

6

Plants

We see many kinds of plants around us.

Plants are of different shapes and sizes. Some are very big in size. Tall and strong plants are called **trees**.

For example : banyan, peepal and coconut tree.

Banyan Tree

Neem Tree

Coconut Tree

Small bushy plants like the rose and cotton plants are called **shrubs**.

Plants smaller than shrubs are called **herbs**.

Shrubs

Herbs

Put into Focus

- ▶ Leaves of plants
- ▶ Plants grow in different places
- ▶ Dependence on plants

Know More

Plants provide us oxygen, food and shelter.

Leaves of plants

Plants have leaves.

These leaves are of different shapes and sizes.

Some are round, some are long and some are triangular.

Some have straight margins, and some have uneven margins.

Most leaves are green in colour.

Some are even yellow, red and purple.

Leaves prepare food for plants. They are called the **kitchen of the plant**.

Plants grow in different places

Fir and pine trees grow on mountains where it is always cold.

The **water lily** plant grows in water. The **lotus** plant also grows in water.

Fir Tree

Pine Tree

Water Lily

Lotus

Coconut Tree

Mango Tree

Neem Tree

Mango and **neem** trees grow in warm places.

Know More

Plants also make our environment fresh, clean and green.

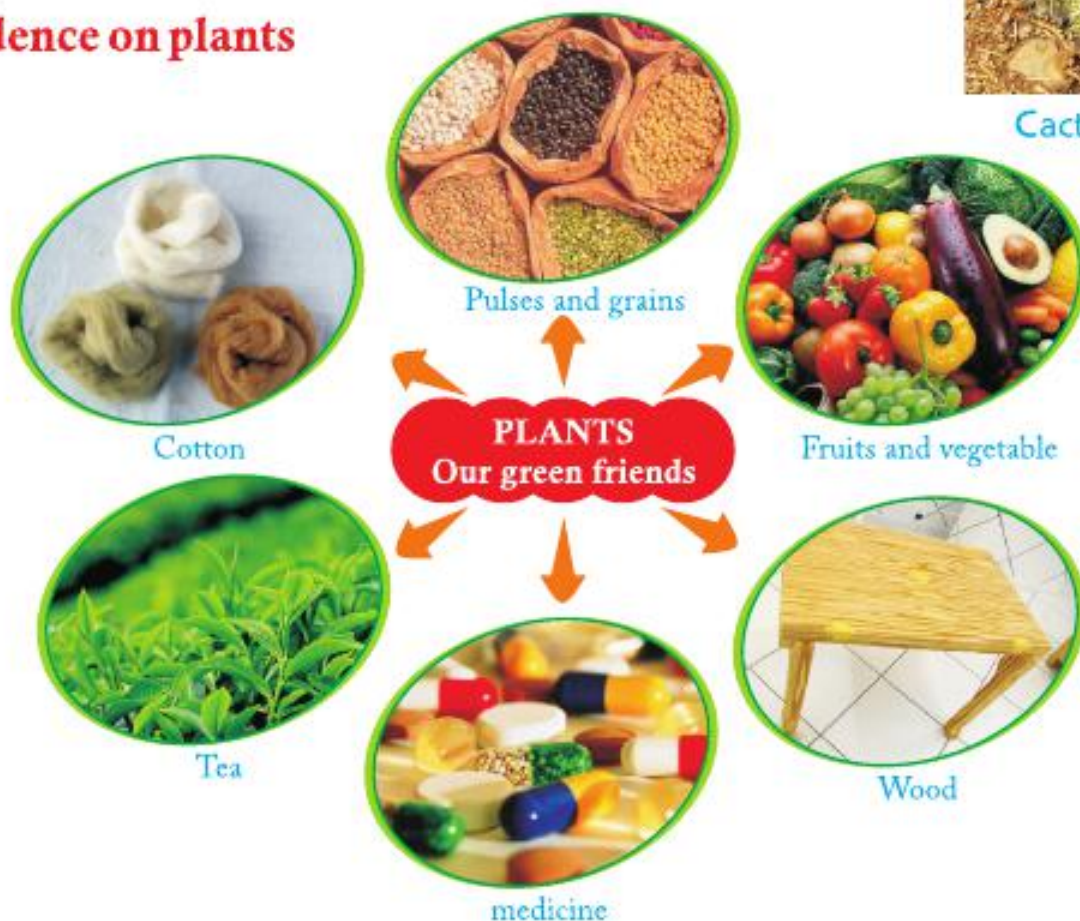

Different Leaves

The cactus plants grows in hot deserts where water is very less.

Cactus plant

Dependence on plants

KEY WORDS

Shrubs: Small bushy plants are called shrubs.

Herbs: Plants smaller than shrubs are called herbs.

OVERVIEW ON THE CHAPTER

- ▶ Plants are found in different shapes and sizes.
- ▶ Bushy plants are called **shrubs**.
- ▶ Plants smaller than shrubs are called herbs.
- ▶ Leaves prepare food for plants. They are known as **kitchen of the plant**.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

- Tall and strong plants are called _____.
(a) shrubs ☐ (b) herbs ☐ (c) trees ☐
- The cactus plant grows in _____.
(a) mountains ☐ (b) warm places ☐ (c) deserts ☐
- The rice plant is a _____.
(a) herb ☐ (b) shrub ☐ (c) creeper ☐
- The kitchen of the plant are _____.
(a) root ☐ (b) stem ☐ (c) leaves ☐

Fill in the blanks :

- Fir and pine trees grow on _____.
- The water lily plant grows in _____.
- _____ grows in hot deserts.
- Most leaves are _____ in colour.

Answer the following questions :

- Name a plant which grows in hot deserts.

- Name a plant or a tree that grows.

- on mountains – _____
- in water – _____
- in deserts – _____

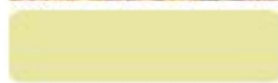

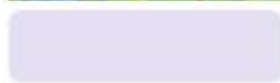

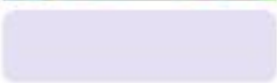

- Name any two :

- trees – _____
- shrubs – _____

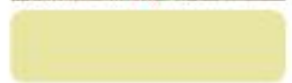

- (c) herbs – _____
4. Where is water lily found?
- _____

OBSERVING SKILLS

Write the names of the pictures :

(Perceptual Thinking)

COMMUNICATION SKILLS

Circle the odd one and tell why they are odd :

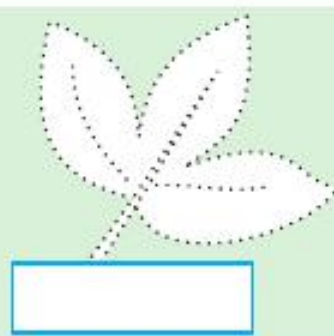

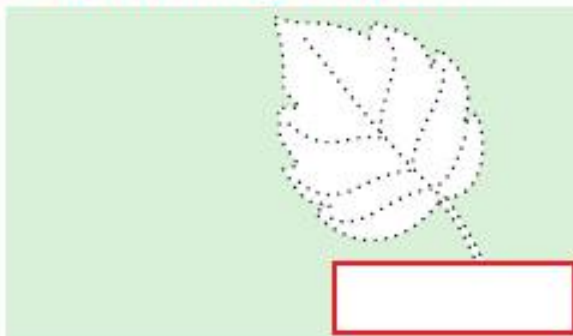

(Discussion)

- | | | | |
|------------|--------|----------|---------|
| 1. banyan | neem | mountain | coconut |
| 2. chair | shrub | creeper | herb |
| 3. coconut | desert | neem | mango |

CRITICAL THINKING

A. Can you identify the leaves?

(Self-Awareness)

B. Circle the correct option.

1. Plants need air/wind.
2. Plants need clouds/sun.
3. Plants need rocks/soil.
4. Plants need water/milk.

7

New Plants from Seeds

Most of the plants bear **flowers**.

Cherry plant

Rose plant

After some time the flowers change into fruits.

The flower of a guava tree **grows** into guava.

Guava flower

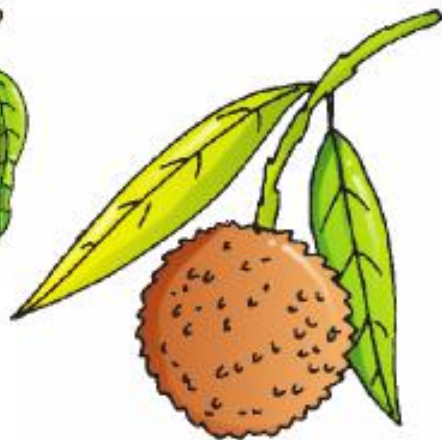

Guava fruit

Put into Focus

- ▶ Each seed contains a tiny plant
- ▶ Know about growing plant from seed

The seeds are present inside the fruit. Some fruits have one seed only, such as **mango**, **blackberry**, **lichee**, etc.

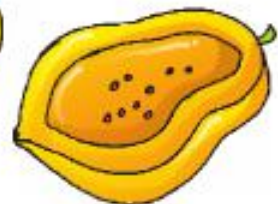

Know More!

Red-coloured fruits keep your heart strong.

Some fruits have many **seeds**, such as **melon**, **watermelon**, **papaya**, **apple**, **guava**, etc.

Seeds are of various types.

There is a tiny plant inside a seed.

A seed grows into a new plant. When a seed is put into the ground and it gets air, water and sunlight, the tiny plant comes out. The tiny or **baby plant** slowly changes into a **big plant**.

KEY WORDS

Seeds: Seeds are present inside the fruits.

Tiny plant: Tiny plant comes out from a seed when it gets air, water and sunlight.

OVERVIEW ON THE CHAPTER

▶ In some plants, flowers change into fruits.

- ▶ Seeds are of various types.
- ▶ Mango has only one seed.
- ▶ A seed grows into a new plant.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. Seeds are present inside the _____.

(a) flower

(b) fruit

(c) leaves

2. Some flowers change into _____.

(a) leaves

(b) roots

(c) fruits

3. Papaya has _____.

(a) only one seed

(b) many seeds

(c) two seeds

4. A seed has a _____.

(a) fruit

(b) tiny plant

(c) stem

B Fill in the blanks:

1. _____ has only one seed.

2. Some flowers change into _____.

3. A seed is changed into a _____.

4. _____ has many seeds.

C Write T for true and F for false for the following statements :

1. Seeds have fruits inside them.

2. Guava has many seeds.

3. Blackberry has only one seed.

4. A tiny plant grows from flower.

D Match the following :

1. Mango

(a) seed

2. Tiny plant

(b) flower

3. Fruit

(c) many seeds

4. Guava

(d) one seed

E Answer the following questions :

1. What does a flower change into?

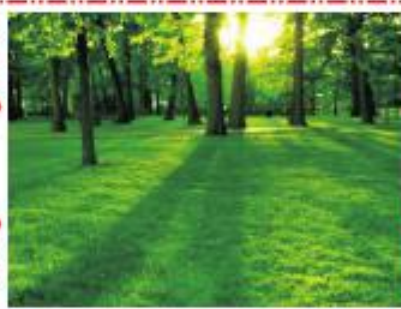

2. What is inside a seed?

3. Why does a seed need to grow into a plant?

4. Write two examples of fruits having one seed.

CRITICAL THINKING

Match the plant to its habitat.

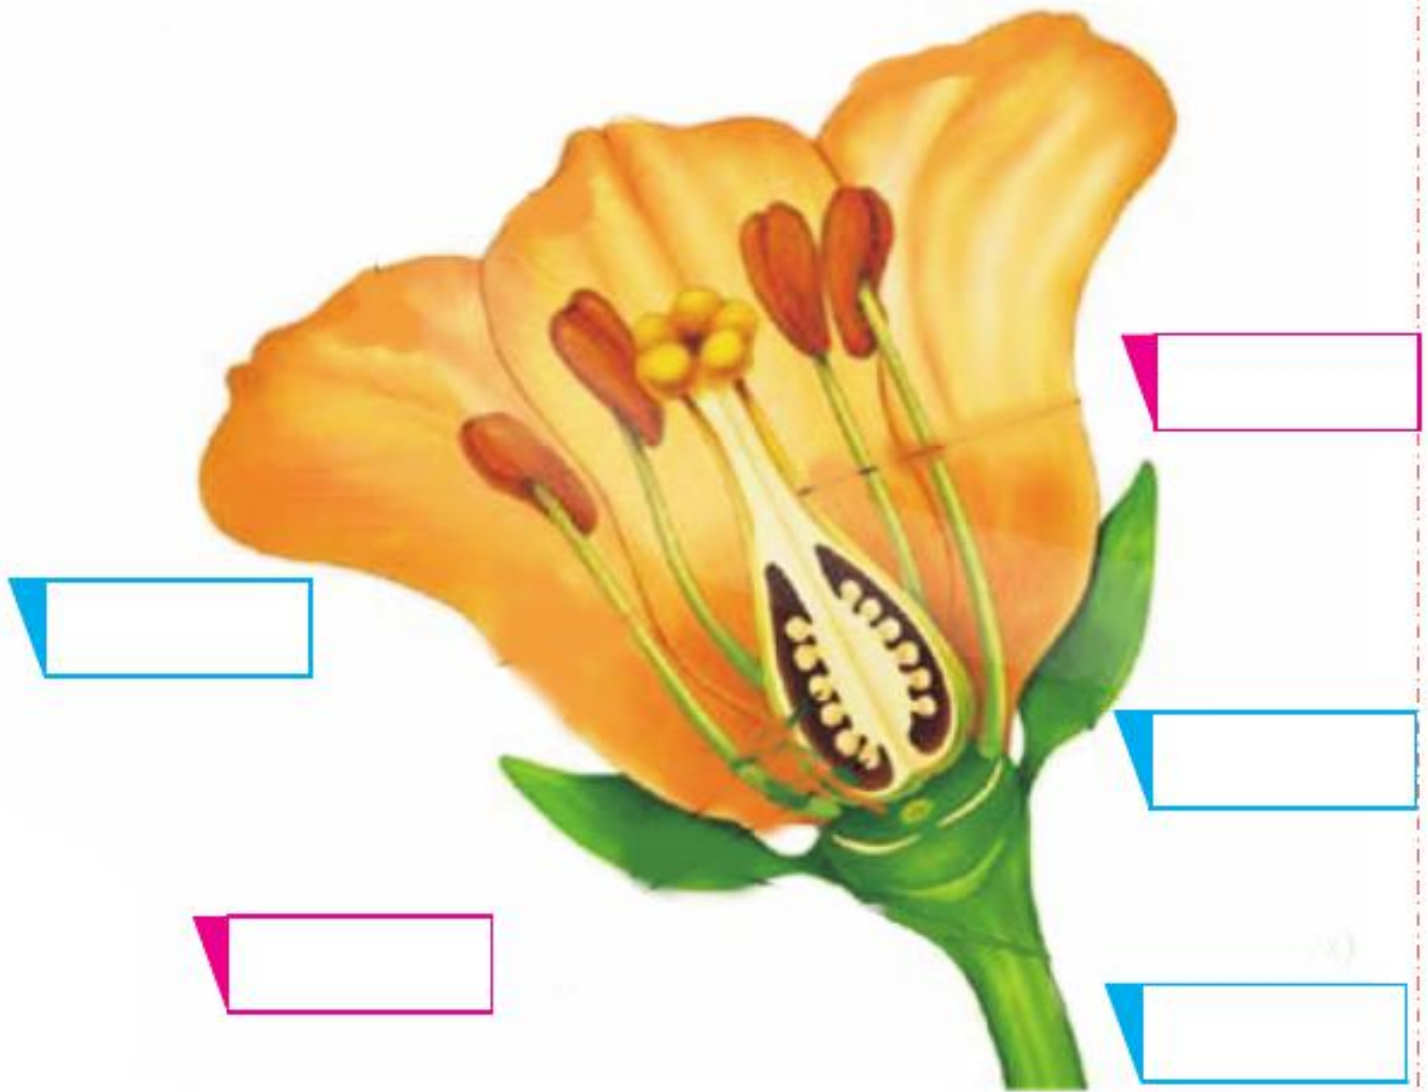

(Self-Awareness)

ACTIVITY

Write the name of each part of the plant with the help of the help box. (Creativity)

flower, seed, stem, root, seed

8

Food from Plants

We get food from plants. We get different foods from plants, such as vegetables, pulses, cereals, fruits and oils.

Vegetables

Some plants give us **vegetables**.

We eat stems, leaves, roots and flowers of some plants, such as we eat **potato** as stem, **radish**, **turnip** and **carrot** as roots; **spinach**, **mint** as leaves and **cabbage** and **cauliflower** as flowers.

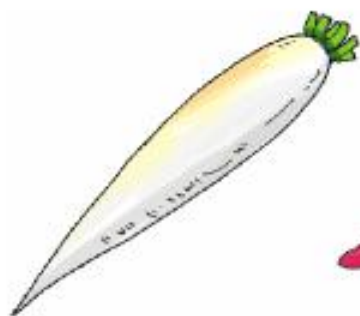

Stem

Know More

The seeds of some plants are used for making oil and more.

Roots

Leaves

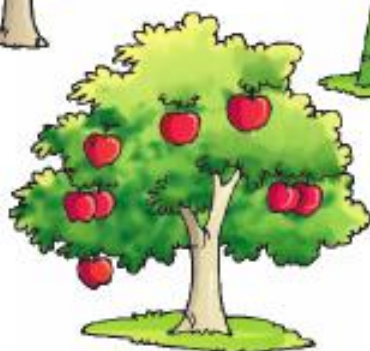

Flowers

Pulses and cereals

We get **pulses** and **cereals** from plants, such as **arhar**, **urad**, **moong**, **masoor**, **gram**, **peas**. These are pulses and **wheat**, **maize**, **rice** are cereals.

Fruits

We get fruits from some plants such as **mango**, **apple**, **banana**, **guava**, **grapes**, **lichee**, **orange**, etc.

Oils

The seeds of some plants are used for making oil such as the seeds of **coconut** and **mustard** plants are used to make oils.

Sugar, tea and coffee

We also get **sugar**, **tea** and **coffee** from plants.

KEY WORDS

Pulses: Arhar, urad, moong, masoor, grain, peas.

Cereals: Wheat, maize, rice are cereals.

OVERVIEW ON THE CHAPTER

- ▶ We get fruits, vegetables, pulses, cereals and oils from plants.
- ▶ We eat stems of some plants as potato.
- ▶ The seeds of Coconut and mustard plant seeds are used to make oils.

Assignment

COGNITIVE SKILLS

(Learning by Doing)

A Multiple choice questions :

Tick (✓) the correct option.

- We eat potato as _____.
(a) root ☐ (b) stem ☐ (c) leaves ☐
- Mango is a _____.
(a) vegetable ☐ (b) pulse ☐ (c) fruit ☐
- Arhar is used as _____.
(a) fruit ☐ (b) vegetable ☐ (c) pulses ☐
- We eat carrot as _____.
(a) root ☐ (b) stem ☐ (c) leaf ☐

B Fill in the blanks:

- _____ is a stem.
- _____ give us food.
- _____ is a flower.
- Carrot is a _____.

C Write T for true and F for false for the following statements :

- Turnip is eaten by humans as stem.
- We eat spinach as leaves.
- We eat masoor as cereals.
- Guava is a fruit.

☐
☐
☐
☐

D Match the following :

- | | |
|------------|------------|
| 1. Mango | (a) root |
| 2. Wheat | (b) flower |
| 3. Turnip | (c) fruit |
| 4. Cabbage | (d) cereal |

Answer the following questions :

1. Name two plants which we eat as roots.

2. Name two plants which we eat as leaves.

3. Name two cereals.

4. Name four fruits.

ACTIVITY

Paste the pictures of any 4 fruits and also write the names in the given box. (Creativity)

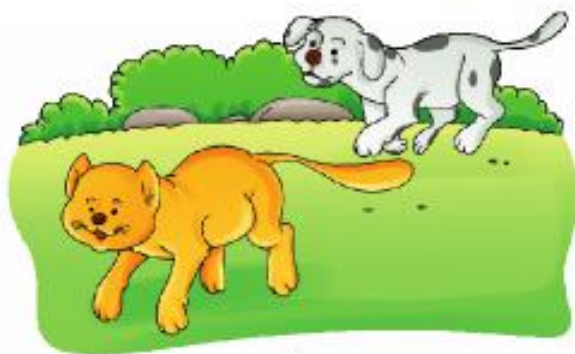

9

We Love Animals

God has created so many different types of animals.

They are of different shapes and sizes and types. Some are small and some are big. Some animals live on land, some in water

and some have wings and can fly.

Domestic and farm animals

Animals like dogs and cats that live with

humans are **domestic animals**.

Animals like cow, goat, sheep, horse etc that are kept and raised on the farms are called as **farm animals**.

Men provide them food, water and shelter.

Put into Focus

- ▶ Wild animals
- ▶ Farm animals
- ▶ Domestic animals
- ▶ Aquatic animals and amphibians

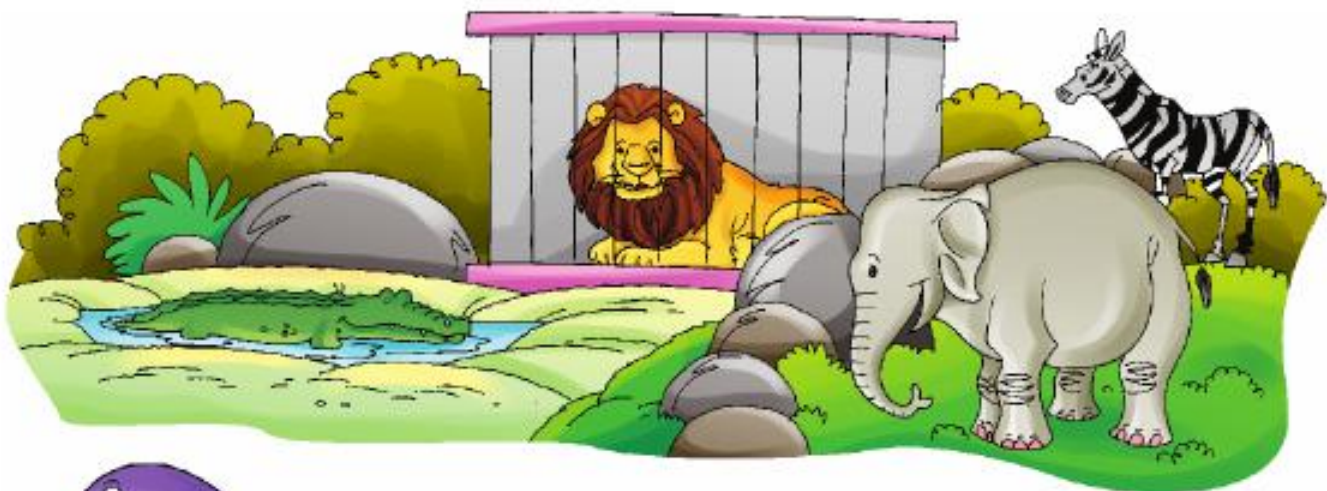

Know More

A cat can run about 20 Km/hr when it grows up. The cheetah is the fastest animals.

Wild animals

Animals like tiger and wolves that live in the jungle are called **wild animals**. We can also see them in the zoo.

Aquatic animals and amphibians

Aquatic animals are animals which live in water like fish and dolphin.

Know More

Dolphins sleep with one eyes open.

Amphibians are animals that can live both in water and on land like frog and crocodile.

KEY WORDS

Domestic animal : Animals that live with humans are called domestic animals.

Farm animals : Animal that are kept and raised on the farms are called as farm animals.

Aquatic animals : Animals which live in water are called aquatic animals.

Amphibians : Animals that live both in water and on land are called amphibians.

OVERVIEW ON THE CHAPTER

- ▶ Animals that live in the jungle are called wild animals.
- ▶ Animals that are kept and raised on the farm are called farm animals.
- ▶ Animals that live with humans are domestic animals.
- ▶ Animals which live in water are aquatic animals.
- ▶ Animals that can live both in water and on land are amphibians.

Assignment

COGNITIVE SKILLS

A Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. Cow is a _____ animal.

(a) wild

(b) domestic

(c) farm

2. _____ animals live in jungle.

(a) wild

(b) domestic

(c) farm

3. _____ sleep with one eye open.

(a) frog

(b) dolphins

(c) ant

B Answer the following questions :

1. Define wild animals.

2. Name any two farm animals.

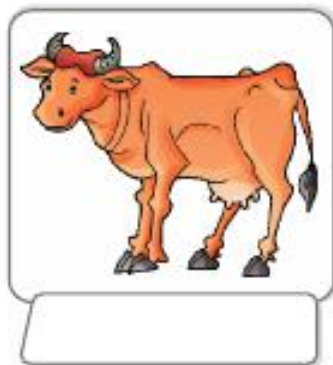

3. Which animals are called amphibians?

4. Define Aquatic animals.

OBSERVING SKILLS

Here farm animals have got mixed up with wild animals, categorise them as farm/wild animals :

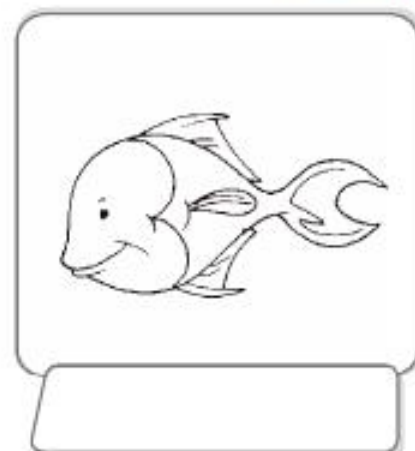

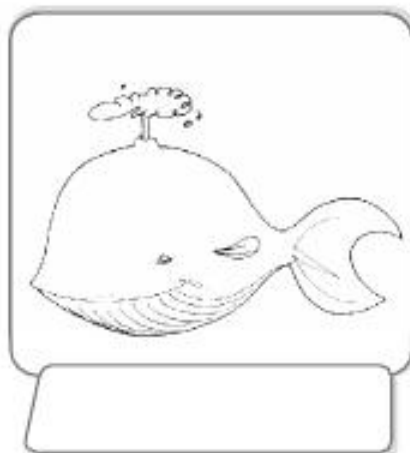

(Perceptual Thinking)

ACTIVITY

Colour and name the water animals in the pictures :

(Creativity)

CRITICAL THINKING

(Self-Awareness)

1. It's head adorns Lord Ganesh.

2. It has one horn on its nose.

3. It is also known as the water horse.

COMMUNICATION SKILLS

(Discussion)

With the help of your teacher write the names of the homes of the following wild animals. Choose them from the help box.

den burrow nest cave eyrie burrow river tree hole tree

Lion _____

Fox _____

Rabbit _____

Monkey _____

Tiger _____

Eagle _____

Crocodile _____

Bird _____

Koala _____

Snake _____

10

Food and Shelter for Animals

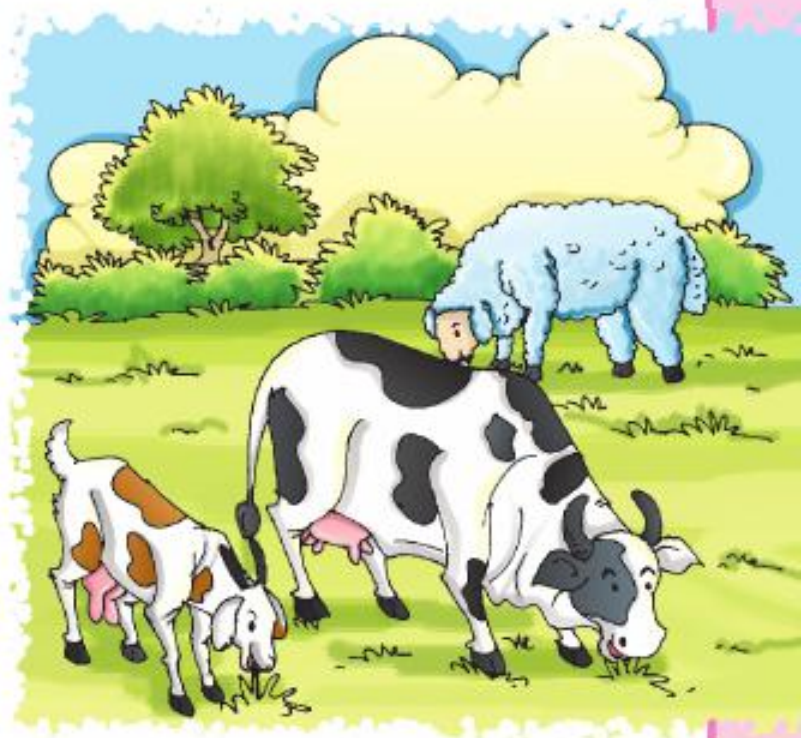

We eat **food** to live physically and mentally healthy. Similarly animals also eat food to live healthy. Different animals eat different types of food. Like lion, elephants, dog, cat and mouse.

Some animals eat grass and leaves of plants. They are known as **plant eating animals**, such as horse, cow, goat, buffalo, sheep, donkey, elephant, deer, etc.

Put into Focus

- ▶ About how animals get food
- ▶ Study of shelters
- ▶ How do shelters protect animals.

Some small animals eat grains to live healthy. These kind of small animals are known as **grain-eating animals**, such as pigeon, hen, mouse, squirrel, sparrow, etc.

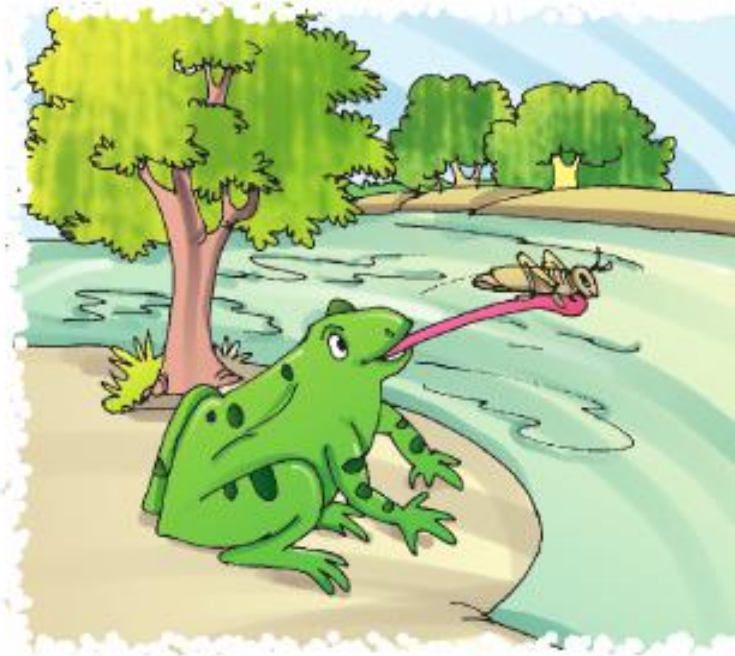

Some animals eat the flesh of other animals. These animals are known as **flesh-eating animals**, such as lion, tiger, wolf, bear, etc.

Some animals eat insects. These animals are known as **insect-eating animals**, such as spider, lizard, chameleon, frog, grasshopper, etc.

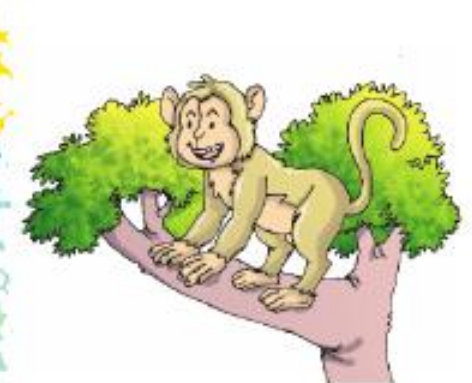

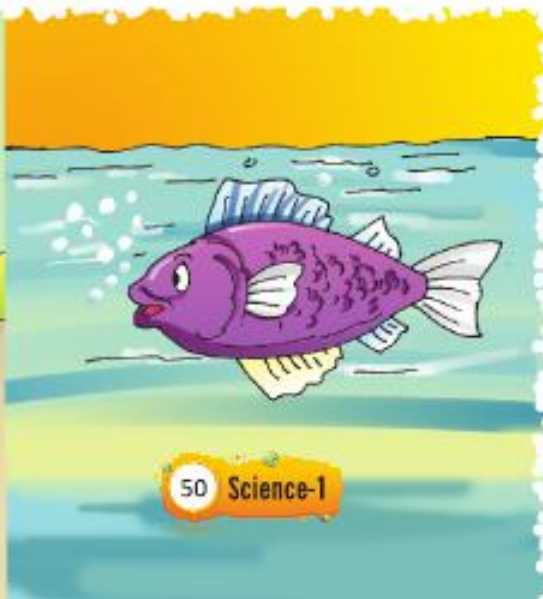

Know More!

Frogs drink water through their skin.

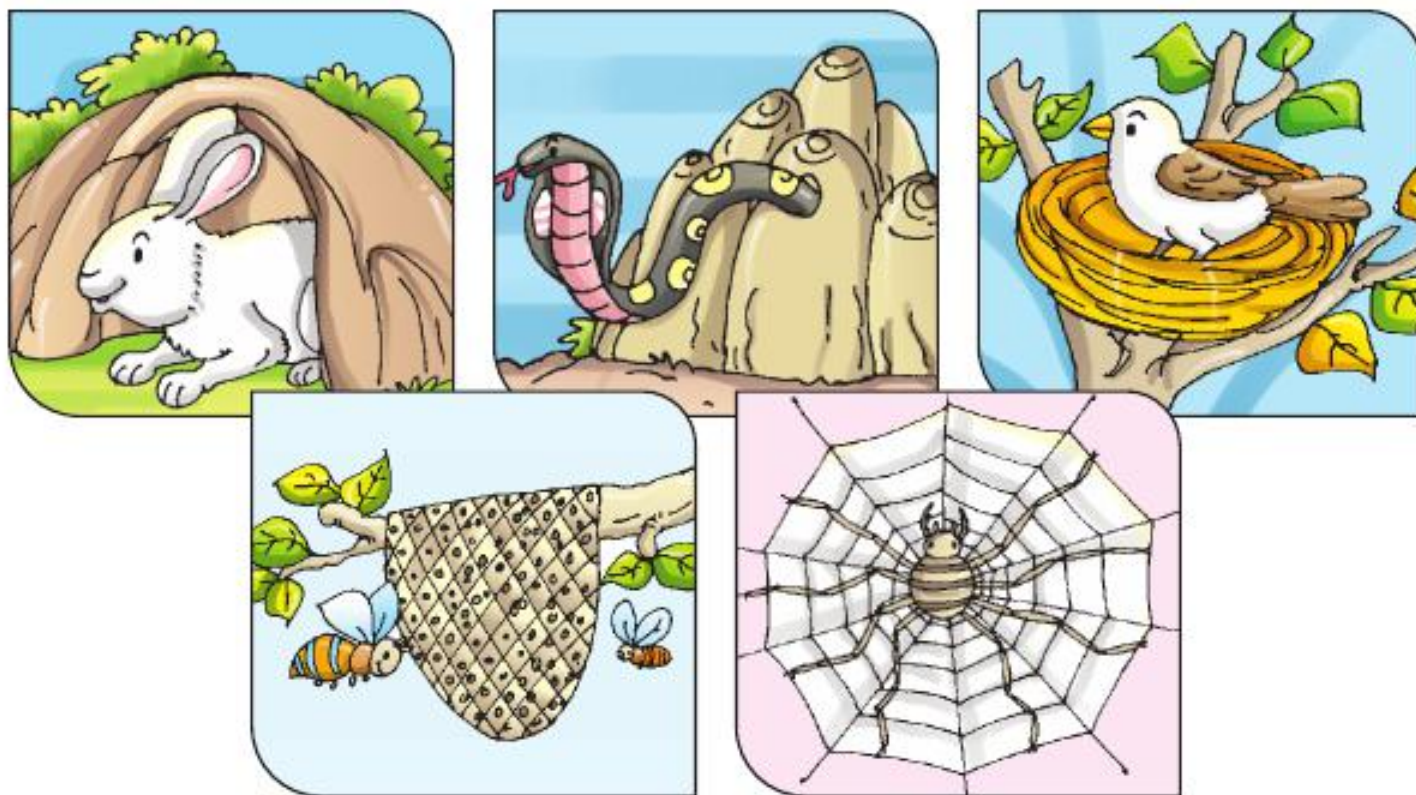

Shelter (houses) for animals

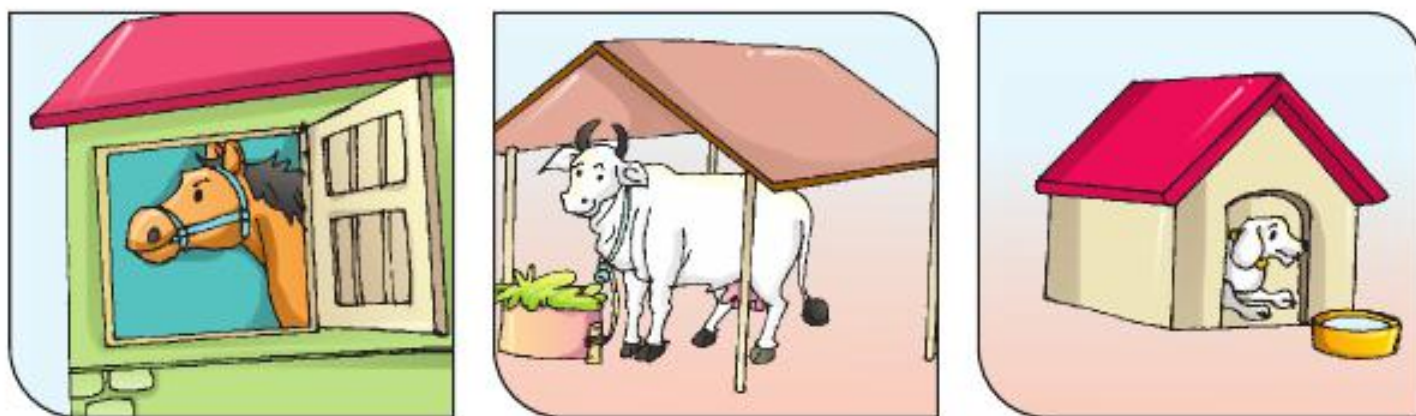

Animals feel safe from cold, heat, rain and enemies in their shelters. Different animals live in different types of shelters. Animals like lion, tiger, monkey, fish live in natural houses such as lion and tiger live in **den**, monkeys live on **trees** and fish live in **water**, crocodiles also live in water.

Some animals like rabbit, honeybees, rats, snakes, birds and spiders make their own houses such as rabbits make **burrows** to live, rats and snakes dig holes in the ground to make their houses. Birds make nests. Honeybees make beehive and spiders spin their **webs**.

Some animals (pet animals) live in houses made by men such as horses live in **stables**, cows, buffaloes and donkeys live in **sheds**. Dogs live in kennels and pigs live in **stys**. Hens live in **coops**.

KEY WORDS

Grain-eating animals : Small animals which eat grains to live healthy are known as grain-eating animals.

Insect-eating animals : Animals which eat insects are known as insect-eating animals.

OVERVIEW ON THE CHAPTER

- ▶ The animals which eat grass and leaves of plants only are called plant-eating animals.
- ▶ The animals which eat the flesh of other animals are called flesh-eating animals.
- ▶ Different animals live in different types of shelters.

Assignment

COGNITIVE SKILLS

Multiple choice questions :
Tick (✓) the correct option.

(Learning by Doing)

1. Lions eat _____.
(a) flesh ☐ (b) leaves ☐ (c) both of them ☐
2. Birds make _____.
(a) web ☐ (b) nest ☐ (c) den ☐
3. Horse lives in a _____.
(a) hole ☐ (b) stable ☐ (c) nest ☐
4. Rabbits live in _____.
(a) burrows ☐ (b) coops ☐ (c) den ☐

B Fill in the blanks:

1. Deer eats _____.
2. Horse lives in _____.
3. Frog eats _____.
4. Birds make _____.

C Write T for true and F for false for the following statements :

1. Lion eats grass and leaves.
2. Wolf eats flesh.
3. Fish live in water.
4. Spider makes burrows.

☐
☐
☐
☐

D Match the following :

- | | |
|-----------|------------|
| 1. Lion | (a) kennel |
| 2. Monkey | (b) den |
| 3. Dog | (c) shed |
| 4. Cow | (d) tree |

E Answer the following questions :

1. Name three animals which eat flesh only.

2. Name three animals which eat grains only.

3. Why do animals need shelter?

4. Name three animals which live in houses made by men.

5. Which animals eat insects?

LINKING CHAIN

(G.K.)

Collect and paste some pictures of plant-eating animals and name them also :

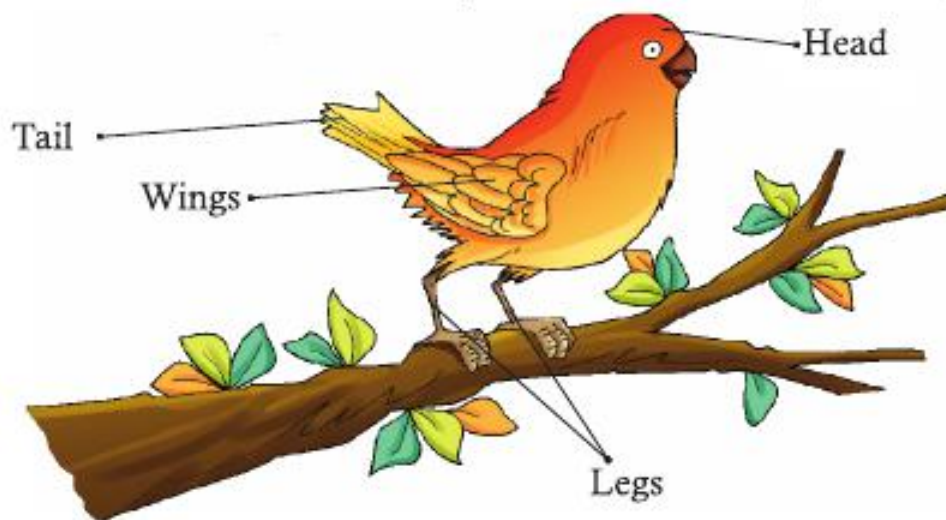

All birds have two wings and two legs. The wings help them to fly. Birds are the only animals that have wings.

and tail.

What helps a bird to fly?

- ▶ Its body is shaped like a boat. This shape helps it to fly in the air easily.
- ▶ Its bones are hollow and filled with air. This makes them light.
- ▶ A bird has strong muscles that move the wings up and down.

These are called flight muscles.

Put into Focus

- ▶ Birds
- ▶ What helps a bird to fly?
- ▶ Nest of birds

Know More!

The home of a bird is called a nest.

- ▶ Its tail helps it to change its direction during flight.

Nests of Birds

Tailor bird

It sews its nest with its beak. The materials it uses to make its nest are thread, wool and vegetable fibres.

Know More!

Weaver bird uses grass and twigs to make its nest.

Sparrow

It makes its nests in houses, trees or any protected place.

The materials it uses to make its nest are mainly grass, leaves, straw and cotton.

Woodpecker

It makes its nests in tree trunks. It uses its chisel-like beak to make a big hole in a tree trunk.

This hole is used as a nest.

KEY WORDS

Trunk: The main woody axis of a tree.

Beak: The bill or nib of a bird.

OVERVIEW ON THE CHAPTER

- ▶ Birds have wings and legs.
- ▶ Different types of birds make different types of nests.

(Learning by Doing)

A Multiple choice questions :

Tick the (✓) correct option.

1. A bird's bones are filled with _____.
 (a) water ☐ (b) flesh ☐ (c) air ☐
2. The feathers that keep the bird warm _____.
 (a) flight ☐ (b) down ☐ (c) body ☐
3. _____ bird sews its nest.
 (a) tailor bird ☐ (b) sparrow ☐ (c) woodpecker ☐

B Fill in the blanks :

1. Birds have _____ bones filled with air.
2. The tailor bird sews its nest with its _____.
3. All birds have two _____ and _____ legs.
4. _____ makes its nest in tree trunks.

C Answer the following questions :

1. What is the body of a bird consist of?

2. How does a woodpecker make its nest?

3. How does a tailor bird make its nest?

COMMUNICATION SKILLS

Circle the odd one and tell why they are odd.

(Discussion)

- | | | | |
|---------|---------|---------|---------|
| 1. bear | pigeon | crow | sparrow |
| 2. duck | nest | crane | swan |
| 3. kiwi | penguin | ostrich | dog |

OBSERVING SKILLS

Write the names of the following birds.

(Perceptual Thinking)

CRITICAL THINKING

1. Name two birds that

(a) fly over long distances

(b) fly at low heights

2. The webbed feet of ducks help them to

(a) run

(b) jump

(c) swim

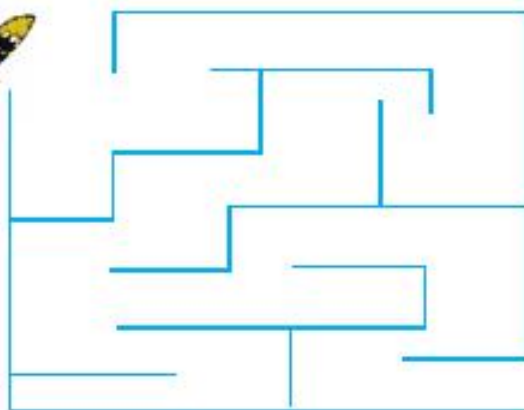

3. Birds have three types of feathers

(Self-Awareness)

ACTIVITY

Help the butterfly to find the flower.

(Creativity)

12 Our Houses

We all need a house to live in.

Our house protects us from **heat**, **cold** and **rain**. It also protects us from **wild animals** and **thieves**.

We feel safe and comfortable in our houses.

The houses we live in are not the same everywhere.

Some are **kachcha** houses, while others are **pakka** houses.

Types of houses

Kachcha
House

Pakka
House

Kachcha house

A house made of mud, dry leaves, straw and bamboo is a **kachcha** house.

It is usually made by the people who live in it.

It is mostly found in villages.

A **kachcha** house is not very strong.

Put into Focus

- ▶ Need of a house
- ▶ Types of houses
- ▶ Characteristics of a good house

Know More

The early man did not know how to make a house. He lived in a cave.

Heavy rainfall and strong winds can destroy it.

Pakka house

In towns and cities, most of the houses are made of bricks, steel and cement. They are called pakka houses. There are different types of Pakka houses. A house can be temporary. These are namely :

- ▶ Wheel caravan
- ▶ Houseboat
- ▶ Tent

Special houses

Some houses are made according to their place.

- ▶ Igloo
- ▶ Stilt houses
- ▶ Houses with slanting rooftops

A good house

- ▶ A good house may be big or small.
- ▶ A good house must have windows to let in sunlight and fresh air.
- ▶ It must have a neat and clean floor.
- ▶ There should also be a strong roof to cover the top of the house.

We should look after our house and keep it clean. A clean house is good for health.

KEY WORDS

Kachcha house : House made of mud, dry leaves, straw are called kachcha house.

Pakka house : House made of bricks, steel and cement are called pakka house.

OVERVIEW ON THE CHAPTER

► We all need home to live in.

► A house made up of mud, dry leaves, straw is called a **kachcha house**.

► A house made of bricks, steel and cement is called a **pakka house**.

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. A place in which we live is called a _____.

(a) cloth

(b) food

(c) house

2. A kachcha house is also called a _____.

(a) flat

(b) bungalow

(c) none of them

3. A house made of bricks, cement and steel is called _____.

(a) igloo

(b) tent

(c) pakka house

Fill in the blanks with the help of the help box :

bricks

villages

steel

mud

is very strong

bamboo

straw

is not so strong

cement

cities

A kachcha house is :

- ▶ made of _____.
- ▶ _____ and _____.
- ▶ mostly found in _____.
- ▶ and _____.

A pakka house is

- ▶ made of _____, _____
and _____.
- ▶ mostly found in _____.
- ▶ and _____.

Answer the following questions :

1. What is a kachcha house?

2. What is a pakka house?

3. Why do we need a house?

4. How can a house be called as 'Good House'?

OBSERVING SKILLS

Look at the pictures and name them :

(Perceptual Thinking)

COMMUNICATION SKILLS

With the help of your teacher fill in the blanks :

(Discussion)

1. Nomads live in _____ .
2. A _____ is a floating house.
3. A house made of canvas is called a _____ .

CRITICAL THINKING

Write down the complete address of your house.

(Self-Awareness)

Your name

House number

Lane or street/colony

Name of city/town

State

13 Pollution

Put into Focus

- Pollution and pollutants
- Types of pollution
- How can we save trees
- Recycle

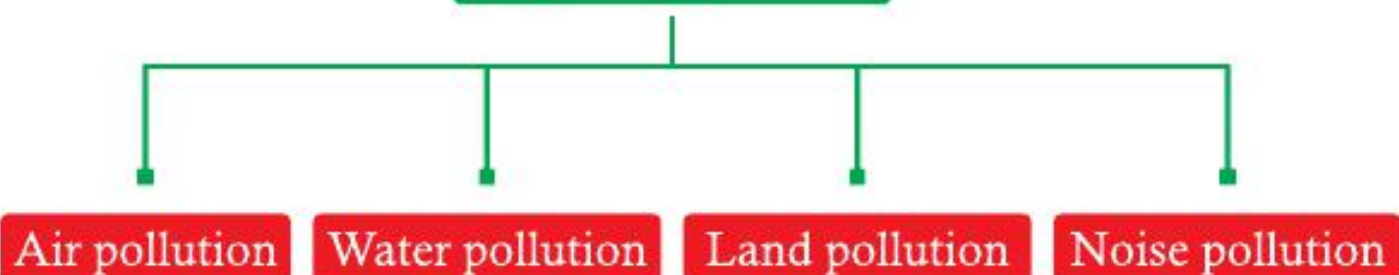

Introduction of harmful materials into the environment is called **pollution**.

It damages the natural environment and causes harm to humans and other living organisms.

Anything that makes the environment dirty is called **pollutant**.

Types of pollution

Air pollution

Dust and smoke from vehicles and factories cause air pollution. We often do things that make the air around us dirty.

Water pollution

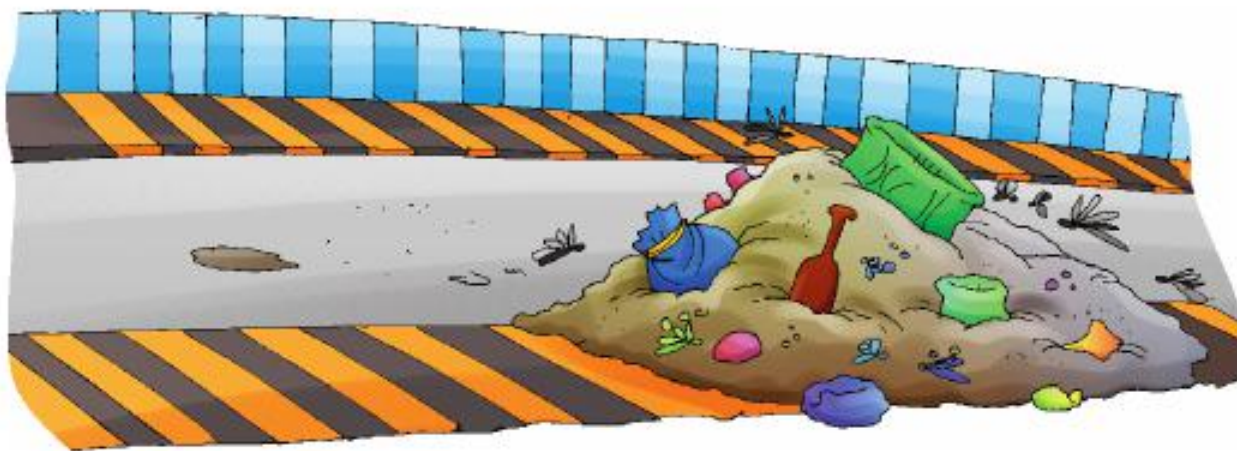

Wastes from houses and factories cause water pollution.

We must not dirty the rivers, lakes, ponds and seas.

Dirty water can cause many serious diseases.

Land pollution

Land is made dirty when plastic bottles, tin cans, wrappers, poly bags are thrown around.

Noise pollution

Loud noises like vehicles horns, loudspeakers and bursting of crackers cause noise pollution.

Such noises can cause deafness, sleeplessness, headaches and other illness.

Save the trees

Plants are helpful to us in many ways.

- ▶ Green plants purify air.

- ▶ They help in bringing rains.
- ▶ Forests are home to our wildlife.
- ▶ We get many valuable products from trees.

Man cuts trees and harms the environment. We should not cut trees.

Recycle

Waste is bad for the environment.

Recycle means to use a thing again and again.

We should try to recycle as many things as possible.

For example

Glass is broken down to make new bottles.

Paper is pulped to make new books.

Plastic is melted to make new toys.

Know More

We can use :

- Empty cans to make pencil holders.
- Use empty jam jars and bottles to grow water plants.
- Save paper by using plain side of old calendars.

KEY WORDS

Environment : Natural surroundings in which you live or exist.

Vehicles : A vehicle is a machine such as a car, bus or truck which has an engine.

OVERVIEW ON THE CHAPTER

- ▶ Pollution is the introduction of harmful materials into the environment.
- ▶ Types of pollution are air, water and land.
- ▶ We must save trees.
- ▶ We should try to use things again and again instead of throwing them away.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. Forests are home to _____.
(a) domestic animals ☐ (b) wild animals ☐ (c) farm animals ☐
2. More _____ should be grown.
(a) plants ☐ (b) air ☐ (c) fire ☐
3. One should use _____ for carrying things.
(a) polythene bags ☐ (b) paper bags ☐ (c) sack ☐

Fill in the blanks :

1. Dust particles may carry _____ germs.
2. Smoke comes from _____.
3. Impure _____ harms our health.
4. Plastics and _____ should not be used.

Answer the following questions :

1. Define pollution.

2. Define pollutants.

3. Name types of pollution.

4. How can we save our trees?

5. Define the term 'Recycle'.

CRITICAL THINKING

A. Try to rewrite these puzzled sentences :

(Self-Awareness)

1. water clean the keep.

2. water not waste do.

3. clean the air keep.

4. more grow trees.

5. use bags plastic do not.

B. Choose the correct option and fill in the blanks :

(Self-Awareness)

1. We should (save/waste) electricity by switching _____ (off/on) the lights every time when it is not in use.

2. Metal containers are melted to make new things like _____.
(bullockcart/bikes)

3. Recycle _____ money. (waste/save)

LINKING CHAIN

(Art & Craft)

Create a collage by cutting out pictures from old magazines and pasting them on a chart paper or on the plain side of a calendar.

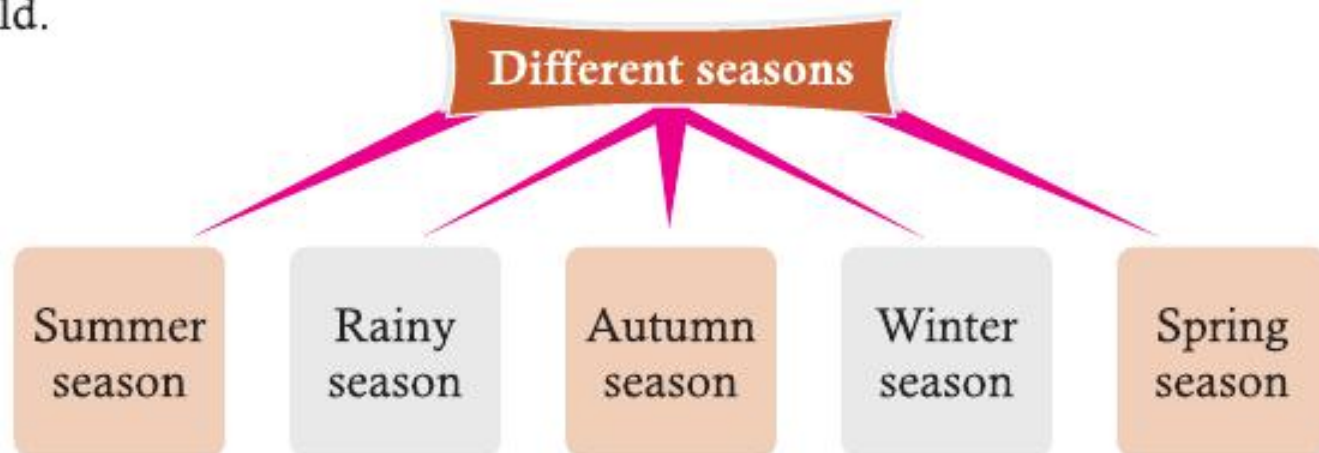

When the weather remains the same for a long period, we call it **season**.

We have some months when it is very hot, some months when it rains heavily and some months when it is cold and chilly. We also have spring and autumn seasons when it is neither too hot nor too cold.

Put into Focus

- ▶ Seasons
- ▶ Different seasons

Summer season

April and May are the hot months of the year.

This period is called the **summer season**.

People like to stay indoors and use fans, coolers or air conditioners. People like to have cold water, cold drinks and ice creams.

Rainy season

After hot summer comes the **rainy** season or the **monsoon** season.

The rain comes in June, July and August.

We use raincoats and umbrellas to protect ourselves from rain.

Know More

The rain fills the dried ponds, wells, lakes and rivers.

Autumn season

September and October are the **autumn** months.

Autumn season follows the rain. This is a short season.

It is neither hot nor cold.

Winter season

November, December and January are the **winter** months. People wear woollen clothes. They use heaters.

Know More

People enjoy being out in the sun during winter.

Spring season

February and March are the **spring** months. During the spring season, it is neither hot nor cold.

KEY WORDS

Season: One of the divisions of the year.

Autumn: The third season of the year.

Spring: Spring refers to the season, which means rebirth, renewal and regrowth.

OVERVIEW ON THE CHAPTER

- ▶ April and May are the hot months of the year.
- ▶ Rainy season comes after summer season.
- ▶ September and October are the autumn months.
- ▶ February and March are the spring months.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. In which season, people like to stay indoor?
 (a) summer season ☐ (b) winter season ☐ (c) rainy season ☐
2. _____ season follows the rain.
 (a) summer ☐ (b) autumn ☐ (c) rainy ☐
3. In which season people wear woollen clothes.
 (a) summer ☐ (b) winter ☐ (c) rainy ☐

Fill in the blanks :

spring	summer	monsoon	autumn	winter
--------	--------	---------	--------	--------

1. May is _____ season.
2. July is _____ season.
3. December is _____ season.

4. March is _____ season.
5. October is _____ season.

 Answer the following questions :

1. Define season.
- _____
2. Name different types of seasons.
- _____
3. What people like to have in summer season?
- _____
4. Which type of clothes we wear in winter season?
- _____

OBSERVING SKILLS

Complete them :

I come after the summer season.
I am _____ season.

(Perceptual Thinking)

I come before winter.
I am _____ season.

Heaters and sweaters make me cozy.
I am _____ season.

In the scorching heat I like to eat ice cream.
I am _____ season.

CRITICAL THINKING

1. (WISMIGM) This is an activity which children love to do during summers.

(Self-Awareness)

2. (IBAORWN) When the sun comes out after rain, we see this across the sky.

3. (WONS) _____

It is seen in the hill stations.

ACTIVITY

Draw a scene showing your favourite season.

(Art Integration)

15 Safety Rules

We must follow safety rules all the time.
They help to keep us safe.

Safety at home

We must not play with sharp objects like **blades**, **knives** and **scissors**.

They can hurt us.

We must not touch electric wires, plugs

and heaters.

They can give us an electric shock.

We must not play with **matchsticks** or **fire**.

They can burn our skin.

We must not try to climb on a window or shelf, we can fall down and get hurt.

Put into Focus

- ▶ Safety rules to be followed at home
- ▶ On road
- ▶ While travelling
- ▶ While swimming

Safety on the road

We must always walk on the footpath.

We must cross the road at the zebra-crossing.

While crossing the road, we must watch the traffic lights carefully.

The **red light** says, 'Stop'.

The **yellow light** says, 'Wait'.

The **green light** says, 'Go'.

We must not play

on or near the road.

Safety while travelling

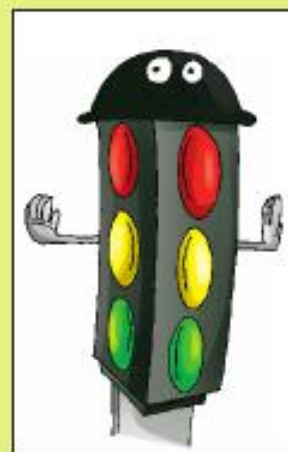

We must stand in a queue at the bus stop while boarding the bus.

We must not get in or out of the moving bus.

Know More

The pedestrian green light tells you to cross the road at the zebra crossing.

We must not lean out or put out hand from the moving bus.

We must not disturb the bus-driver.
We must keep quiet in the bus.

Safety in the playground

We must play in a park or playground.
We must always play games in a safe way.

First aid

When someone gets hurt, we must help him/her till the doctor comes.

We must wash the wound, apply medicine and tie a bandage or clean cloth or put a band-aid. This help is called **first aid**.

We must have a first aid box in our home, class, car and school bus.

Safety while swimming

We must use the **swimming tube** if we do not know how to swim.

We must not go deep into the pool.

We must not go into the swimming pool, if there is no adult with us.

KEY WORDS

Safety: Safety means keeping yourself and others free from danger.

First aid: Measure to be taken immediately after an accident.

OVERVIEW ON THE CHAPTER

- ▶ We all should follow the safety rules all the time.
- ▶ We must follow the safety rules at home, swimming pool, on road and while travelling.

Assignment

COGNITIVE SKILLS

Multiple choice questions :

(Learning by Doing)

Tick the (✓) correct option.

1. We must not play with a _____.

(a) ball

(b) toy

(c) knife

2. To learn swimming, we must use a _____.

(a) scissor

(b) blade

(c) swimming tube

3. We must _____ in a park.

(a) play

(b) dance

(c) pray

Fill in the blanks :

footboard

electric plugs

safe

footpath

safety rules

1. We must not touch _____.

2. We must always walk on the _____.

3. We must always play games in a _____ way.

4. We must follow _____ all the time.

5. We must not travel on the _____ of the bus.

Answer the following questions :

1. Which safety rules should be followed on road?

2. Which safety rules should be followed while travelling?

3. Define first aid.

ACTIVITY

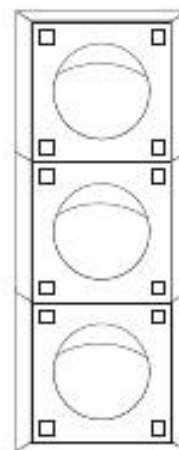

Colour these traffic lights and fill in the blanks :

The red light says _____

The yellow light says _____

The green light says _____

The green pedestrian light says _____

(Creativity)

CRITICAL THINKING

Write three uses of 'First aid'.

1. _____
2. _____
3. _____

(Self-Awareness)

OBSERVING SKILLS

Cross (X) out the unsafe actions given in the pictures.

(Perceptual Thinking)

A Multiple choice questions :

Tick the (✓) correct option.

- We eat _____ meals in a day.
(a) two ☐ (b) three ☐ (c) four ☐
- We must clean our nose with our _____.
(a) shirt ☐ (b) handkerchief ☐ (c) brush ☐
- We can see with our _____.
(a) skin ☐ (b) eyes ☐ (c) nose ☐
- We need _____ to make fire.
(a) air ☐ (b) water ☐ (c) land ☐
- Soil and water are _____ things.
(a) being ☐ (b) non - living ☐ (c) man-made ☐

B Fill in the blanks :

- Food give us energy to work and _____.
- We must wake up _____ in the morning.
- _____ pumps blood to the whole body.
- _____ more trees.
- Trees gives us _____ for pencil, bats and chairs.

C Answer the following question :

- Define food.

- Write three ways to keep ourselves clean.

- Name five human body sense organs.

- Name types of pollution.

- What are shrubs?

A Multiple choice questions :

Tick the (✓) correct option.

1. _____ animals live in jungle.
(a) wild ☐ (b) domestic ☐ (c) farm ☐
2. _____ bird sews its nest.
(a) tailor ☐ (b) sparrow ☐ (c) woodpecker ☐
3. A place in which we live is called a _____.
(a) cloth ☐ (b) food ☐ (c) house ☐
4. More _____ should be grown.
(a) plants ☐ (b) air ☐ (c) fise ☐
5. _____ season follows the rain.
(a) summer ☐ (b) autumn ☐ (c) rainy ☐

B Fill in the blanks :

1. Smoke comes from _____.
2. December is _____ season.
3. _____ sleep with one eye open.
4. Birds have _____ bones filled with air.
5. A kachcha house is also called a _____.

C Answer the following question :

1. Why do we need a house?

2. What safety rules should be followed while travelling?

3. Name any two farm animals.

4. Name different types of season.
