Preface

The aim of the series is to connect our learners to the learning environment. An environment shaped and planned to run through the series.

The aim is to combine exiting, enjoyable moments of awareness with activities and stimulating research work that revalue around knowledge. The mission is to develop aptitudes in every child.

In short, '**Brain Up**' would encourage the readers to think, so that they become confident and exited about learning.

The series caters to grade levels 1 to 8, and brings the subject closer to life. It curiously connects to the multifaceted strums of knowledge, be it environment, science social studies, language and literature sports and so on... with the main aim, which is to boost a "love for learning and knowledge".

Key Features :

- An updated content or knowledge.
- Objective General Knowledge sections.
- Points to gain more knowledge.
- "Mind Booster" Contents
- Answers for reference.
- A Comprehensive and challenging range of knowledge— based worksheets, comfortable to and ideal for each grade level.

Contents

1. Life Under Water	5	28. Rivers of India	41
2. Rainforests	7	29. UN- United Nations	42
3. Australian Animals	8	30. Global Warming	44
4. Birds Kingdom	9	31. Famous Authors	46
5. In the Wildlife	10	32. Bookworm	47

22. Regional Dances of India	33	49. Be Artistic	67
23. Famous Musicians	35	50. Important Dates in Indian History	68
24. Indian Forts	37	51. Famous Quotes	69
25. Monuments Around the World	38	52. Logical Sequence of Words	70
26. Indian Architectural Marvels	39	53. Riddles Time	71
27. Indian Tribes	40	Answer Sheet	72

Life Under Water

As we all know life of many plants and animals also exist under the water.

Let's read some amazing facts about marine life.

Life under water began 3.1 billion years ago. In comparison, creatures on land only appeared 400 million years ago.

Snakes aren't just found on land. The sea snake is found in the warm waters of the Indian and Pacific oceans and usually feeds on small fish. A relative of cobra, it has over sixty different varieties and is highly poisonous.

Jellyfish have no heart, brain, mouth, eyes or lungs. They have been around for 650 million years. It means they were around even before the dinosaurs!

Most starfish have five arms. But some species can have anywhere between 20 and 40 arms.

A type of fish called parrot fish covers itself in a thick layer of mucus at night to avoid being smelled out by predators while it is asleep!

The waterwheel plant is a marine plant that is carnivorous in nature. It is a free-floating, rootless plant that is usually found on the surface of the oceans. While shunning to look at, it snaps its leaves shut to trap its prey.

Squids have the least violent defence mechanism. When under attack, they simply release a dark ink that makes the water cloudy. This reduces the predator's vision and enables the squid to escape!

State whether these statements on Marine creatures are true or false.

1. The tiger shark is the biggest and largest among the sharks. ☐
2. Salmon cannot live in salt water. ☐
3. Angler fish have a 'torch' on their head to attract mates and prey. ☐
4. The mudskipper is a fish that can live on both water and land. ☐
5. Great white sharks are warm-blooded whereas most other sharks cold-blooded. ☐
6. An octopus has eight hearts to help maintain circulation through all its tentacles. ☐
7. A shrimp's heart lies in its tail. ☐
8. All whales have belly buttons since they are mammals. ☐
9. The shock from an electric eel is very weak and cannot prove fatal. ☐
10. The pufferfish, which is a delicacy in Japan, is very safe to eat and not poisonous. ☐

Rainforests

Home to a large variety of flora, fauna and native animals, the rainforests of the world are natural wonders.

Answers these questions about rainforests.

1. The Dehing Patkai Wildlife Sanctuary is located here _____.
2. The Amazonian Rainforest is the world's largest rainforest. It is located in this continent.
_____.

3. These monkeys are found in the rainforests of Indonesia and Malaysia. Their name means 'man of the forest' in the local language. _____
4. The world's tallest tropical tree measures 308.7 feet and is found in the Danum Valley in this country.

5. This is the heaviest snake in the world and it is found in the rainforests of South America. _____.

DO YOU KNOW?

Over 56,000 sq miles of rainforests are lost each year!

Brazil Orangutan Assam Anaconda Malaysia

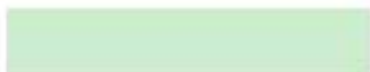

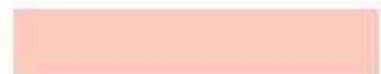

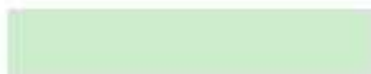

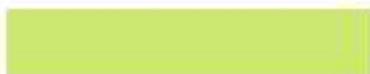

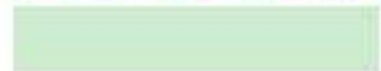

HELP BOX

Australian Animals

Australia is like a house of different kinds of animals.

Identify these animals found in Australia using help box.

Anteater Emu Numbats Galah Wombat Dingo Death Adder Platypus Koala

HELP BOX

Birds Kingdom

Every bird make different sounds.

A. Match the birds name with the sounds they make.

Bird	Sound
1. Bittern	(a) Screech
2. Hen	(b) Caw
3. Sparrow	(c) Hoot
4. Eagle	(d) Cluck
5. Parrot	(e) Boom
6. Night jar	(f) Goobble
7. Dove	(g) Quack
8. Owl	(h) Chirp
9. Crow	(i) Chonk
10. Turkey	(j) call

B. Re-arrange these letters to name these Birds.

They Born to Invent...

Inventions made our lives easy and comfortable.

Identify the names of the inventor from their inventions.

1. An Indian American computer engineer, developed the USB in 1995. _____
2. The Danish engineer invented Bluetooth on behalf of Ericsson in 1994. _____
3. Regarded as the 'father of the cellular phone', this American engineer and his team built the first mobile cellophone in 1973. _____
4. She invented the home CCTV in 1966 by connecting motorized cameras to a monitor and a remote door operating system. _____
5. This computer programmer and entrepreneur developed Whatsapp along with Brian Acton in 2009. _____

Marie van Britten Brown Martin Cooper Ajay Bhatt Jan Koum Jaap Haartsen

HELP BOX

Accidental Inventions

Not all inventions are planned. Given below are stories behind some accidental inventions.

Let's read about them.

While developing a strong adhesive, Spencer Silver accidentally made a weak adhesive that was used to join paper. Thus the **post-its** were invented.

While developing a rust-proof gun barrel, British metallurgist Harry Drearly tested an alloy with lemon juice for corrosiveness and realized it could be used to make cutlery, thus accidentally developed **stainless steel**.

While developing plastic lenses for gun sights, Harry Coover accidentally developed a highly sticky adhesive that is now known as **super glue**.

While trying to use the sap of a South American tree as a substitute for rubber, Thomas Adams accidentally put a piece in his mouth. He loved the taste and thus the **chewing gum** was invented.

In 1905, 11-years old Frank Epperson accidentally left a cup of flavored soda with a stirring stick out in the cold. It froze overnight, and this is how the **popsicle** was invented!

While experimenting with refrigerants, Roy Plunkett accidentally discovered the non-reactive, non-stick **material** **Teflon** which is now used in utensils.

State whether these statements about are True or False.

1. Sir Francis Drake was the first Englishman to sail around the world.
2. The first woman to fly solo across the Atlantic was from France.
3. Christopher Columbus discovered the island of Antigua.
4. In January 2017, Frenchman Francis Joyon and his five member team completed the fastest sail around the world in 57 days.
5. In 2014, Roshni Sharma became the first woman to drive solo on a motorcycle from Kashmir to Kanyakumari.
6. In 1989, British actor Michael Caine undertook the same journey as was done by Phileas Fogg in Jules Verne's book 'Around the world in 80 days'.

Science Mania

Many scientists gave their contributions in the field of science.

Let's read about these famous scientists.

1. APJ Abdul Kalam was one of India's most beloved presidents. He is called the 'Missile Man of India' for developing India's missile technology and ballistic programs including the Agni and Prithvi missiles and the Pokhran II nuclear tests.
2. Subrahmanyan Chandrasekhar was an Indian-American physicist who received the 1983 Physics Nobel Prize for his work on the study of the structure and evolution of stars as well as his study of black holes.
3. A nuclear physicist Homi Bhabha is known as the father of the Indian Nuclear Program. His ground-breaking theory of scattering of positron by electrons is named after him.
4. Vikram Sarabhai is known as the Father of the Indian Space Program. He established the Indian space Research Organization (ISRO) and was instrumental in the development of the program that launched India's first satellite, Aryabhata.

5. A chemist by education Asima chatterjee was the first woman to be accorded a doctor of science title by an Indian university. She is best known for the development of cancer medication, and anti-malarial and anti-epileptic drugs.
6. Tessy Thomas is a renowned scientist who was the Program Director for the Angi IV and Agni missiles and is the first woman to head a missile project in India. She is fondly known as the 'Missile Woman of India'.

Match the following international scientists to their discoveries.

- | | |
|------------------------------|----------------------------------|
| 1. Enrico Fermi | (a) Penicillin |
| 2. Alexander Fleming | (b) Rockets |
| 3. Jonas Salk | (c) Nuclear reactor, atomic bomb |

5. IMF : _____

Global Warming

Global warming refers to the increase in the temperature of the earth.

Let's read about it.

Causes →

NATURAL WARMING AND COOLING CYCLES

The earth periodically goes through phases of natural warming up and cooling cycles over time, spanning thousands of years. Right now, it is in the middle of one of its natural warming cycle.

AEROSOL SPRAYS

Hair spray or room freshener contain hydrocarbons and sulphates which increase global warming.

FOSSIL FUELS

The burning of fossil fuels leads to the production of carbon dioxide, which is a green house gas and thus contributes to global warming.

DEFORESTATION

Deforestation results in an increase in the production of carbon dioxide, which in turn leads to an increase in the temperature of the Earth.

Effects

Drastic Changes in global weather patterns.

The threat to animals and the environment.

Acidification of the oceans.

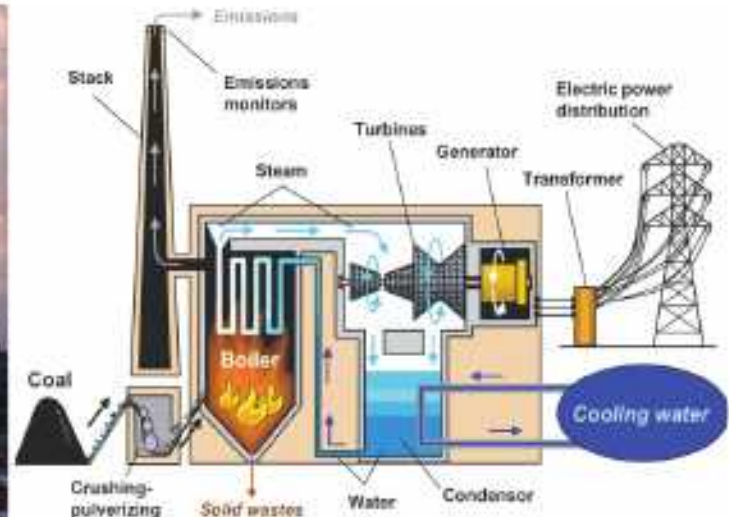

Melting of the polar ice caps.

Rising sea levels.

State whether the statements given below on global warming and climate is (✓) or (×).

1. The Arctic region is heating up at twice the rate as the rest of the world. ☐
2. It takes fifty years for carbon dioxide in the atmosphere to disperse. ☐
3. Melting ice covers accelerate global warming because their cooling effect is reduced. ☐
4. In India, the largest contributing factor for greenhouse emissions is the generation of electricity using coal. ☐
5. According to the WHO, nearly 150,000 death are caused by climate change every year. ☐

Famous Authors

There are many famous authors who got awards for their books.

Guess the name of these famous authors from their books.

1

Year : 1997
Book : The God of Small Things _____

2

Year : 1998
Book : Beloved _____

3

Year : 1999
Book : Disgrace _____

4

Year : 2008
Book : The White Tiger _____

5

Year : 1953
Book : The Old Man and the Sea _____

6

Year : 2006
Book : The Inheritance of Loss _____

Ernest Hemingway
Arundhati Roy

Aravind Adiga
Kiran Desai

Toni Morrison
JM Coetzee

HELP BOX

Rudyard Kipling is the youngest person to win the Nobel Prize for Literature for the 'The Jungle Book'.

Bookworm

This world is full of amazing famous books, authors and characters.

Tick (✓) the correct option.

- Which of these authors invented an entire language to use in his books?
